In addition to the alphabetical list of public comments received by the United States in the matter of United States v. Microsoft Corp., below is a list of these comments organized into six categories. These categories are, comments that: (1) Wholly unrelated to the Revised Proposed Final Judgment or the Microsoft case in general; (2) Do not related to the Revised Proposed Final Judgment, but relate to the Microsoft case; (3) Express an overall view of the Revised Proposed Final Judgment, but offer no analysis; (4) Express an overall view of the Revised Proposed Final Judgment and offer a limited degree of substantive analysis; (5) Express an overall view of the Revised Proposed Final Judgment and offer more substantial analysis, and; (6) Detailed comments provided to to the Court on February 14, 2002. The United States emphasizes that this list is intended only as an aid to the reader in identifying comments that may be of particular interest.

1. Wholly Unrelated to the Revised Proposed Final Judgment or the Microsoft Case in General

ELECTRONIC RESEARCH

World Wide Web

Full text of the daily Federal Register, CFR and other publications is located at: **http://www.access.gpo.gov/nara**

Federal Register information and research tools, including Public Inspection List, indexes, and links to GPO Access are located at: **http://www.nara.gov/fedreg**

E-mail

FEDREGTOC-L (Federal Register Table of Contents LISTSERV) is an open e-mail service that provides subscribers with a digital form of the Federal Register Table of Contents. The digital form of the Federal Register Table of Contents includes HTML and PDF links to the full text of each document.

To join or leave, go to **http://listserv.access.gpo.gov** and select *Online mailing list archives, FEDREGTOC-L, Join or leave the list (or change settings);* then follow the instructions.

PENS (Public Law Electronic Notification Service) is an e-mail service that notifies subscribers of recently enacted laws.

To subscribe, go to **http://hydra.gsa.gov/archives/publaws-l.html** and select *Join or leave the list* (or change settings); then follow the instructions.

FEDREGTOC-L and **PENS** are mailing lists only. We cannot respond to specific inquiries.

Reference questions. Send questions and comments about the Federal Register system to: **info@fedreg.nara.gov**

The Federal Register staff cannot interpret specific documents or regulations.

REMINDERS

The items in this list were editorially compiled as an aid to Federal Register users. Inclusion or exclusion from this list has no legal significance.

RULES GOING INTO EFFECT MARCH 18, 2002

AGRICULTURE DEPARTMENT
Agricultural Marketing Service
Raisins produced from grapes grown in—
California; published 3-15-02
COMMERCE DEPARTMENT
Export Administration Bureau
Export administration regulations:
Commerce Country Chart—
Czech Republic, Hungary, and Poland; regional stability items and crime control items; license requirements removed; published 3-18-02
Export adminstration regulations:
License Exception CTP revisions; high performance computers, U.S. export controls; January 2, 2002 Presidential Announcement implementation
Correction; published 3-18-02
Export licensing:
Commerce Control List—
Wassenaar Arrangement List of Dual-Use Items revisions; implementation; computers; License Exception CTP revisions; correction; published 3-18-02
COMMERCE DEPARTMENT
National Oceanic and Atmospheric Administration
Fishery conservation and management:
Alaska; fisheries of Exclusive Economic Zone—
Sablefish; published 3-5-02
ENVIRONMENTAL PROTECTION AGENCY
Air quality planning purposes; designation of areas:
Arizona and California; published 2-15-02
FEDERAL COMMUNICATIONS COMMISSION
Radio stations; table of assignments:
Mississippi and Michigan; published 2-19-02
South Carolina; published 2-19-02
Texas; published 2-19-02
FEDERAL TRADE COMMISSION
Hart-Scott-Rodino Antitrust Improvements Act:
Premerger notification; reporting and waiting period requirements; published 3-18-02
TRANSPORTATION DEPARTMENT
Coast Guard
Drawbridge operations:
Alabama; published 3-12-02
TRANSPORTATION DEPARTMENT
Federal Aviation Administration
Airworthiness directives:
Boeing; published 3-1-02
Eurocopter France; published 3-1-02
TRANSPORTATION DEPARTMENT
Federal Highway Administration
Engineering and traffic operations:
Uniform Traffic Control Devices Manual—
Accessible pedestrian signals; published 2-15-02
TRANSPORTATION DEPARTMENT
Federal Railroad Administration
Railroad workplace safety:
Body belt use as components of personal fall arrest systems prohibited; and railroad bridge workers
Correction; published 3-12-02
Body belts use as components of personal fall arrest systems prohibited; and railroad bridge workers; published 1-15-02

RULES GOING INTO EFFECT MARCH 18, 2002

TRANSPORTATION DEPARTMENT
Maritime Administration
Vessel documentation:
Fishery endorsement; U.S.-flag vessels of 100 feet or greater in registered length; published 3-18-02
TRANSPORTATION DEPARTMENT
Saint Lawrence Seaway Development Corporation
Seaway regulations and rules:
Tariff of tolls; published 2-14-02
VETERANS AFFAIRS DEPARTMENT
Adjudication; pensions, compensation, dependency, etc.:
Women veterans who lose breast due to service-connected disability; special monthly compensation; published 2-14-02

COMMENTS DUE NEXT WEEK

AGRICULTURE DEPARTMENT
Animal and Plant Health Inspection Service
Viruses, serums, toxins, etc.:
Virus-Serum-Toxin Act; records and reports amendment; comment request; comments due by 3-18-02; published 1-15-02 [FR 02-00938]
COMMERCE DEPARTMENT
National Oceanic and Atmospheric Administration
Fishery conservation and management:
Caribbean, Gulf of Mexico, and South Atlantic fisheries—
South Atlantic shrimp; comments due by 3-21-02; published 2-19-02 [FR 02-03979]
Importation, exportation, and transportation of wildlife:
Incidental take permits—
Chewuch River, WA; habitat conservation plan; comments due by 3-18-02; published 2-15-02 [FR 02-03815]
DEFENSE DEPARTMENT
Engineers Corps
Danger zones and restricted areas:
Kennebec River, ME; Bath Ironworks Shipyard; comments due by 3-18-02; published 2-14-02 [FR 02-03557]

Transportation Security Administration
Aviation security infrastructure fees
Correction; comments due by 3-18-02; published 2-25-02 [FR C2-04148]
Aviation security infrastructure fees; imposition; comments due by 3-18-02; published 2-20-02 [FR 02-04148]

LIST OF PUBLIC LAWS

This is a continuing list of public bills from the current session of Congress which have become Federal laws. It may be used in conjunction with "PLUS" (Public Laws Update Service) on 202–523–6641. This list is also available online at *http://www.nara.gov/fedreg/plawcurr.html.*

The text of laws is not published in the **Federal Register** but may be ordered in "slip law" (individual pamphlet) form from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 (phone, 202–512–1808). The text will also be made available on the Internet from GPO Access at *http://www.access.gpo.gov/nara/nara005.html.* Some laws may not yet be available.

S. 1206/P.L. 107–149

Appalachian Regional Development Act Amendments of 2002 (Mar. 12, 2002; 116 Stat. 66)

H.R. 1892/P.L. 107–150

Family Sponsor Immigration Act of 2002 (Mar. 13, 2002; 116 Stat. 74)

H.R. 3699/P.L. 107–151

To revise certain grants for continuum of care assistance for homeless individual and families. (Mar. 13, 2002; 116 Stat. 76)

Last List March 13, 2002

Public Laws Electronic Notification Service (PENS)

PENS is a free electronic mail notification service of newly enacted public laws. To subscribe, go to *http://hydra.gsa.gov/archives/publaws-l.html* or send E-mail to **listserv@listserv.gsa.gov** with the following text message:

SUBSCRIBE PUBLAWS-L Your Name.

Note: This service is strictly for E-mail notification of new laws. The text of laws is not available through this service. **PENS** cannot respond to specific inquiries sent to this address.

CFR CHECKLIST

This checklist, prepared by the Office of the Federal Register, is published weekly. It is arranged in the order of CFR titles, stock numbers, prices, and revision dates.

An asterisk (*) precedes each entry that has been issued since last week and which is now available for sale at the Government Printing Office.

A checklist of current CFR volumes comprising a complete CFR set, also appears in the latest issue of the LSA (List of CFR Sections Affected), which is revised monthly.

The CFR is available free on-line through the Government Printing Office's GPO Access Service at http://www.access.gpo.gov/nara/cfr/index.html. For information about GPO Access call the GPO User Support Team at 1-888-293-6498 (toll free) or 202-512-1530.

The annual rate for subscription to all revised paper volumes is $1195.00 domestic, $298.75 additional for foreign mailing.

Mail orders to the Superintendent of Documents, Attn: New Orders, P.O. Box 371954, Pittsburgh, PA 15250–7954. All orders must be accompanied by remittance (check, money order, GPO Deposit Account, VISA, Master Card, or Discover). Charge orders may be telephoned to the GPO Order Desk, Monday through Friday, at **(202) 512–1800** from 8:00 a.m. to 4:00 p.m. eastern time, or FAX your charge orders to **(202) 512-2250.**

[1]Because Title 3 is an annual compilation, this volume and all previous volumes should be retained as a permanent reference source.

[2]The July 1, 1985 edition of 32 CFR Parts 1–189 contains a note only for Parts 1–39 inclusive. For the full text of the Defense Acquisition Regulations in Parts 1–39, consult the three CFR volumes issued as of July 1, 1984, containing those parts.

[3]The July 1, 1985 edition of 41 CFR Chapters 1–100 contains a note only for Chapters 1 to 49 inclusive. For the full text of procurement regulations in Chapters 1 to 49, consult the eleven CFR volumes issued as of July 1, 1984 containing those chapters.

[4]No amendments to this volume were promulgated during the period January 1, 2000, through January 1, 2001. The CFR volume issued as of January 1, 2000 should be retained.

[5]No amendments to this volume were promulgated during the period April 1, 2000, through April 1, 2001. The CFR volume issued as of April 1, 2000 should be retained.

[6]No amendments to this volume were promulgated during the period July 1, 2000, through July 1, 2001. The CFR volume issued as of July 1, 2000 should be retained.

[7]No amendments to this volume were promulgated during the period January 1, 2001, through January 1, 2002. The CFR volume issued as of January 1, 2001 should be retained..

Reader Aids
Consult the Reader Aids section at the end of this issue for phone numbers, online resources, finding aids, reminders, and notice of recently enacted public laws.

To subscribe to the Federal Register Table of Contents LISTSERV electronic mailing list, go to http://listserv.access.gpo.gov and select Online mailing list archives, FEDREGTOC-L, Join or leave the list (or change settings); then follow the instructions.

Would you like to know...

if any changes have been made to the Code of Federal Regulations or what documents have been published in the Federal Register without reading the Federal Register every day? If so, you may wish to subscribe to the *LSA (List of CFR Sections Affected)*, the *Federal Register Index*, or both.

LSA • List of CFR Sections Affected
The LSA (List of CFR Sections Affected) is designed to lead users of the Code of Federal Regulations to amendatory actions published in the Federal Register. The LSA is issued monthly in cumulative form. Entries indicate the nature of the changes—such as revised, removed, or corrected. $35 per year.

Federal Register Index
The index, covering the contents of the daily Federal Register, is issued monthly in cumulative form. Entries are carried primarily under the names of the issuing agencies. Significant subjects are carried as cross-references. $30 per year.

A finding aid is included in each publication which lists Federal Register page numbers with the date of publication in the Federal Register.

Public Laws

107th Congress, 1st Session, 2001

Pamphlet prints of public laws, often referred to as slip laws, are the initial publication of Federal laws upon enactment and are printed as soon as possible after approval by the President. Legislative history references appear on each law. Subscription service includes all public laws, issued irregularly upon enactment, for the 107th Congress, 1st Session, 2001.

Individual laws also may be purchased from the Superintendent of Documents, U.S. Government Printing Office. Prices vary. See Reader Aids Section of the Federal Register for announcements of newly enacted laws or access the online database at http://www.access.gpo.gov/nara005.html

Federal Register

3–19–02 Tuesday
Vol. 67 No. 53 Mar. 19, 2002
Pages 12441–12828

The **FEDERAL REGISTER** is published daily, Monday through Friday, except official holidays, by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). The Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 is the exclusive distributor of the official edition.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders, Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress, and other Federal agency documents of public interest.

Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless the issuing agency requests earlier filing. For a list of documents currently on file for public inspection, see http://www.nara.gov/fedreg.

The seal of the National Archives and Records Administration authenticates the Federal Register as the official serial publication established under the Federal Register Act. Under 44 U.S.C. 1507, the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper and on 24x microfiche. It is also available online at no charge as one of the databases on GPO Access, a service of the U.S. Government Printing Office.

The online edition of the **Federal Register** is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions (44 U.S.C. 4101 and 1 CFR 5.10). It is updated by 6 a.m. each day the **Federal Register** is published and it includes both text and graphics from Volume 59, Number 1 (January 2, 1994) forward.

GPO Access users can choose to retrieve online **Federal Register** documents as TEXT (ASCII text, graphics omitted), PDF (Adobe Portable Document Format, including full text and all graphics), or SUMMARY (abbreviated text) files. Users should carefully check retrieved material to ensure that documents were properly downloaded.

On the World Wide Web, connect to the **Federal Register** at http://www.access.gpo.gov/nara. Those without World Wide Web access can also connect with a local WAIS client, by Telnet to swais.access.gpo.gov, or by dialing (202) 512–1661 with a computer and modem. When using Telnet or modem, type swais, then log in as guest with no password.

For more information about GPO Access, contact the GPO Access User Support Team by E-mail at gpoaccess@gpo.gov; by fax at (202) 512–1262; or call (202) 512–1530 or 1–888–293–6498 (toll free) between 7 a.m. and 5 p.m. Eastern time, Monday–Friday, except Federal holidays.

The annual subscription price for the **Federal Register** paper edition is $699, or $764 for a combined **Federal Register, Federal Register** Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the **Federal Register** Index and LSA is $264. Six month subscriptions are available for one-half the annual rate. The charge for individual copies in paper form is $10.00 for each issue, or $10.00 for each group of pages as actually bound; or $2.00 for each issue in microfiche form. All prices include regular domestic postage and handling. International customers please add 25% for foreign handling. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard or Discover. Mail to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250–7954.

Title 3—

The President

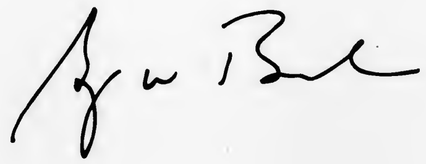
Proclamation 7532 of March 14, 2002

National Poison Prevention Week, 2002

By the President of the United States of America

A Proclamation

In 1961, the Congress established the annual observance of National Poison Prevention Week. Forty-one years later, this event continues to educate Americans about the dangers of childhood poisonings and to promote measures that help prevent such poisonings. These measures and other poison awareness efforts have helped reduce deaths from childhood poisonings by more than 90 percent since 1962.



According to the American Association of Poison Control Centers, more than 1 million children each year are exposed to potentially poisonous medicines and household chemicals. In an effort to put an end to tragic accidents, the United States Consumer Product Safety Commission requires child-resistant packaging for many medicines and household chemicals. But this special packaging is "child-resistant," not "child-proof." For this reason, it is essential to keep potential poisons locked up and away from children.

Members of the Poison Prevention Week Council, representing 36 national organizations, work every year to organize events during this special week to raise awareness of unintentional poisonings, as well as to illustrate the steps that can be taken to prevent them. Coalition members believe every poisoning is preventable. Group members encourage Americans to use and properly reclose child-resistant packaging, keep poisonous substances secured and out of the reach of children, and keep the poison center telephone number, 1–800–222–1222, nearby in case of an emergency. This new nationwide number connects callers to medical experts that provide immediate treatment advice for poison emergencies. These centers are open 24 hours a day, 7 days a week.

To encourage Americans to learn more about the dangers of unintentional poisonings and to take more preventive measures, the Congress, by joint resolution approved September 26, 1961, as amended (75 Stat. 681), has authorized and requested the President to issue a proclamation designating the third week of March each year as "National Poison Prevention Week."

NOW, THEREFORE, I, GEORGE W. BUSH, President of the United States of America, do hereby proclaim March 17 through 23, 2002, as National Poison Prevention Week. I call upon all Americans to observe this week by participating in appropriate ceremonies and activities and by learning how to prevent poisonings among children.

IN WITNESS WHEREOF, I have hereunto set my hand this fourteenth day of March, in the year of our Lord two thousand two, and of the Independence of the United States of America the two hundred and twenty-sixth.

Rules and Regulations

Federal Register
Vol. 67, No. 53
Tuesday, March 19, 2002

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

OFFICE OF GOVERNMENT ETHICS

5 CFR Part 2640

RIN 3209–AA09

Exemption Amendments Under 18 U.S.C. 208(b)(2)

AGENCY: Office of Government Ethics (OGE).

ACTION: Final rule amendments.

SUMMARY: The Office of Government Ethics is issuing a final rule to amend the regulation that describes financial interests that are exempt from the prohibition in 18 U.S.C. 208(a). These final rule amendments revise the existing exemption regulation by: creating a new exemption for sector mutual funds; raising the de minimis exemption for matters affecting interests in securities from $5,000 to $15,000; and creating an exemption that permits an employee to act in certain particular matters that affect an entity in which the employee owns securities, where the entity is not a party to the matter.

EFFECTIVE DATE: April 18, 2002.

FOR FURTHER INFORMATION CONTACT: Richard Thomas, Associate General Counsel, Office of Government Ethics; Telephone: 202–208–8000; TDD: 202–208–8025; FAX: 202–208–8037.

SUPPLEMENTARY INFORMATION:

I. Rulemaking History

Section 208(a) generally prohibits employees of the executive branch from participating in an official capacity in particular matters in which they or certain others specified in the statute have a financial interest. Section 208(b)(2) of title 18 permits OGE to promulgate regulations describing financial interests that are exempted as being too remote or inconsequential to warrant disqualification pursuant to section 208(a). The Office of Government Ethics' executive branchwide section 208 regulations, including such exemptions, are codified at 5 CFR part 2640.

On September 6, 2000, OGE published a set of proposed amendments to the regulation, proposing to revise some existing exemptions as well as to add some new exemptions. See 65 FR 53942–53946. The proposed rule provided a 90-day comment period. The Office of Government Ethics received 13 comment letters on the proposed rule. After carefully considering all comments and making appropriate modifications, OGE is publishing this final rule after obtaining the concurrence of the Department of Justice pursuant to section 201(c) of Executive Order 12674, as modified by E.O. 12731. Also, as provided in section 402 of the Ethics in Government Act of 1978, as amended, 5 U.S.C. appendix, section 402, OGE has consulted with both the Department of Justice (as additionally required under 18 U.S.C. 208(d)(2)) and the Office of Personnel Management on this final rule.

II. Analysis of Comments and Revisions

Of the thirteen comments submitted, ten were from executive branch Departments or agencies, one was from a professional association, and two were from individuals. Overall, the comments to the proposed rule were positive. Many commenters had specific suggestions pertaining to one or more components of the proposed rule. Two commenters expressed the view that the OGE Form 450 and SF 278 reporting requirements should be revised to no longer require a filer to disclose on his form assets which are exempt under 5 CFR part 2640. These reporting issues are separate and distinct from the issue of whether an exemption is warranted under section 208(b)(2). Although OGE will not address specific reporting issues in this rulemaking, comments relating to financial disclosure requirements have been considered as part of OGE's separate proposed revision of the Ethics in Government Act, as amended.

The analysis below focuses on changes from the proposed amendments, either as recommended by the commenters or which OGE believes are otherwise appropriate. Many of the amendments proposed are being adopted as final without change in this rulemaking document.

Subpart B—Exemptions Pursuant to 18 U.S.C. 208(b)(2)

Section 2640.201 Exemptions for Interests in Mutual Funds, Unit Investment Trusts, and Employee Benefit Plans

Sector Mutual Funds

Several commenters recommended that OGE revise the proposed exemption for sector mutual funds to provide a total, rather than a $50,000 de minimis exemption. Two commenters suggested raising the de minimis amount. The Office of Government Ethics believes that the $50,000 de minimis exemption amount proposed is appropriate and is adopting it as final in § 2640.201(b) as revised. Establishing a total exemption for all employees would be difficult in light of the legal standard that the exempted interest be "remote and inconsequential." The $50,000 exemption being adopted is reasonably considered remote and inconsequential for all employees and is consistent with the de minimis exemption for particular matters of general applicability in existing paragraph (b) of § 2640.202, which is being redesignated as paragraph (c) thereof (see below).

This final rule contains one technical correction of the wording in the proposed rule. In the proposed rule, OGE inadvertently proposed limiting the existing exemption for sector mutual funds at § 2640.201(b) by restricting the exemption to disqualifying financial interests arising from the ownership by the employee, his spouse or minor children of an interest in the fund. Consistent with the original exemption for sector mutual funds, OGE intended that the new exemption would include interests held by an employee and all the others whose financial interests are imputed to him under 18 U.S.C. 208. This is reflected in the final rule by tracking the reference in the existing paragraph (b) of § 2640.201 prior to this amendment. The wording and structure of the exemption also have been modified somewhat in this final rule to clarify its meaning.

Section 2640.202 Exemptions for Interests in Securities

De Minimis Exemption for Matters Involving Parties

Several commenters were pleased with the proposed increase (now being adopted as final) in the de minimis exemption amount for securities in particular matters involving specific parties from $5,000 to $15,000, under § 2640.202(a) as proposed for revision. However, one commenter stated that the increase in the de minimis amount would lead to greater intrusion into the privacy of filers, by reducing the number of reported assets, but probing further into the values of assets not previously required to be reported on the OGE Form 450. As an initial matter, raising the de minimis amount will not affect the OGE Form 450 filer's reporting requirements. In addition, as mentioned earlier, the reporting requirements for both the OGE Form 450 and the SF 278 are separate matters from the focus of this rulemaking, which addresses whether certain financial interests are too remote or inconsequential under section 208(b)(2) to warrant disqualification under 18 U.S.C. 208(a).

De Minimis Exemption for Matters Affecting Nonparties

The Office of Government Ethics received varied comments in response to proposed new § 2640.203(m). Under that section, as proposed, an employee would have been able to participate in certain matters in litigation involving specific parties in which the employee had a disqualifying financial interest of up to $25,000 in securities issued by a nonparty affected by the litigation. Two commenters were generally satisfied with the proposed rule. Of those who expressed some dissatisfaction with the proposed rule, two recommended broadening the rule to encompass any particular matter affecting nonparties, rather than limiting the rule to matters in litigation. Two commenters recommended including an example or definitions.

The Office of Government Ethics' original proposed part 2640 regulations, published for comment in the **Federal Register** on September 11, 1995, included a proposed exemption for disqualifying interests arising from ownership of securities issued by a nonparty. See 60 FR 27228. In the comments to that proposed rule, some agencies expressed a concern that this specific proposed exemption would be too complex. As a result, OGE decided not to include the exemption in its final version of 5 CFR part 2640. Over the years, however, some agencies have continued to express a need for such an exemption. The strongest advocate stressed the need for an exemption for matters in litigation affecting nonparties, so OGE included this exemption in the proposed regulation published on September 6, 2000. As noted, two commenters to the proposed amendments supported broadening this exemption, essentially recommending that OGE establish in this final rule the exemption as proposed in September 1995. After additional consideration, OGE has decided to adopt in revised § 2640.202(b) of this final rule a broader exemption than that proposed, so as to include any particular matter involving specific parties, not just matters in litigation. Because of its broadened scope, this new exemption is being moved to the primary section for interests in securities at § 2640.202. The broader rule will be more useful to a greater range of agencies and will simplify the exemption by eliminating the need for determining whether a matter constitutes "litigation."

Moreover, to address the commenters' recommendations and to clarify the rule, OGE is adding an example to the exemption. One commenter requested that OGE define "nonparty" and offer guidance on how to identify nonparties and determine if they are affected by a matter. Because each situation may vary to such a degree that the question is best addressed on a case-by-case basis, OGE will not define "nonparty" in this rulemaking. The Office of Government Ethics believes that the example now provided will promote a clearer understanding of the application of this exemption.

In the proposed rule, OGE proposed to revise Example 2 after § 2640.203(f), relating to interests in mutual insurance companies, to suggest that the proposed § 2640.203(m) for matters in litigation could apply in the situation described in the example. Upon reflection, that suggestion was incorrect because the interests of a policy holder with a mutual insurance company would not fall within the definition of "security" at § 2640.102(r). Accordingly, this final rule does not contain any amendment to that example.

The rule as proposed for particular matters affecting nonparties will be revised as described above and redesignated as new paragraph (b) of § 2640.202. Existing paragraphs (b) through (e) of current § 2640.202 are being redesignated as paragraphs (c) through (f), respectively, of that section.

In addition, several existing examples in part 2640 are being revised (as proposed) to reflect the new de minimis exemption amounts.

III. Matters of Regulatory Procedure

Executive Order 12866

In promulgating this final regulation, the Office of Government Ethics has adhered to the regulatory philosophy and the applicable principles of regulation set forth in section 1 of Executive Order 12866, Regulatory Review and Planning. This regulation has also been reviewed by the Office of Management and Budget under that Executive order.

Executive Order 12988

As Director of the Office of Government Ethics, I have reviewed this final amendatory regulation in light of section 3 of Executive Order 12988, Civil Justice Reform, and certify that it meets the applicable standards provided therein.

Regulatory Flexibility Act

As Director of the Office of Government Ethics, I certify under the Regulatory Flexibility Act (5 U.S.C. chapter 6) that this proposed amendatory rule will not have a significant economic impact on a substantial number of small entities because it primarily affects Federal executive branch employees.

Paperwork Reduction Act

The Paperwork Reduction Act (44 U.S.C. chapter 35) does not apply because this final regulation does not contain information collection requirements that require the approval of the Office of Management and Budget.

Unfunded Mandates Reform Act

For purposes of the Unfunded Mandates Reform Act of 1995 (2 U.S.C. chapter 25, subchapter II), this final rule will not significantly or uniquely affect small governments and will not result in increased expenditures by State, local, and tribal governments, in the aggregate, or by the private sector, of $100 million or more (as adjusted for inflation) in any one year.

Congressional Review Act

The Office of Government Ethics has determined that this proposed rulemaking involves a nonmajor rule under the Congressional Review Act (5 U.S.C. chapter 8) and has submitted a report thereon to the U.S. Senate, House of Representatives and General Accounting Office in accordance with that law.

List of Subjects in 5 CFR Part 2640

Conflicts of interests, Government employees.

Approved: November 16, 2001.

Amy L. Comstock,

Director, Office of Government Ethics.

Accordingly, for the reasons set forth in the preamble, the Office of Government Ethics is amending 5 CFR part 2640 as follows:

PART 2640—INTERPRETATION, EXEMPTIONS AND WAIVER GUIDANCE CONCERNING 18 U.S.C. 208 (ACTS AFFECTING A PERSONAL FINANCIAL INTEREST)

1. The authority citation for part 2640 continues to read as follows:

Authority: 5 U.S.C. App. (Ethics in Government Act of 1978); 18 U.S.C. 208; E.O. 12674, 54 FR 15159, 3 CFR, 1989 Comp., p. 215, as modified by E.O. 12731, 55 FR 42547, 3 CFR, 1990 Comp., p. 306.

Subpart A—General Provisions

2. Section 2640.102 is amended by revising paragraph (r) to read as follows:

§ 2640.102 Definitions.

* * * * *

* * * * *

(r) *Security* means common stock, preferred stock, corporate bond, municipal security, long-term Federal Government security, and limited partnership interest. The term also includes "mutual fund" for purposes of § 2640.202(e) and (f) and §2640.203(a).

* * * * *

3. Section 2640.103 is amended by revising Example 1 following paragraph (a)(2) to read as follows:

§ 2640.103 Prohibition.

(a) * * *

(2) * * *

Example 1 to paragraph (a)(2): An agency's Office of Enforcement is investigating the allegedly fraudulent marketing practices of a major corporation. One of the agency's personnel specialists is asked to provide information to the Office of Enforcement about the agency's personnel ceiling so that the Office can determine whether new employees can be hired to work on the investigation. The employee personnel specialist owns $20,000 worth of stock in the corporation that is the target of the investigation. She does not have a disqualifying financial interest in the matter (the investigation and possible subsequent enforcement proceedings) because her involvement is on a peripheral personnel issue and her participation cannot be considered "substantial" as defined in the statute.

* * * * *

Subpart B—Exemptions Pursuant to 18 U.S.C. 208(b)(2)

4. Section 2640.201 is amended by:

a. Revising the heading of Example 1 and revising Example 2 following paragraph (a);

b. Revising paragraph (b); and

c. Revising the heading of Example 1 and adding new Examples 2 and 3 following new paragraph (b)(2)(ii).

The revisions and additions read as follows:

§ 2640.201 Exemptions for interests in mutual funds, unit investment trusts, and employee benefit plans.

(a) * * *

Example 1 to paragraph (a): * * *

Example 2 to paragraph (a): A nonsupervisory employee of the Department of Energy owns shares valued at $75,000 in a mutual fund that expressly concentrates its holdings in the stock of utility companies. The employee may not rely on the exemption in paragraph (a) of this section to act in matters affecting a utility company whose stock is a part of the mutual fund's portfolio because the fund is not a diversified fund as defined in § 2640.102(a). The employee may, however, seek an individual waiver under 18 U.S.C. 208(b)(1) permitting him to act.

(b) *Sector mutual funds.* (1) An employee may participate in any particular matter affecting one or more holdings of a sector mutual fund where the affected holding is not invested in the sector in which the fund concentrates, and where the disqualifying financial interest in the matter arises because of ownership of an interest in the fund.

(2)(i) An employee may participate in a particular matter affecting one or more holdings of a sector mutual fund where the disqualifying financial interest in the matter arises because of ownership of an interest in the fund and the aggregate market value of interests in any sector fund or funds does not exceed $50,000.

(ii) For purposes of calculating the $50,000 de minimis amount in paragraph (b)(2)(i) of this section, an employee must aggregate the market value of all sector mutual funds in which he has a disqualifying financial interest and that concentrate in the same sector and have one or more holdings that may be affected by the particular matter.

Example 1 to paragraph (b): * * *

Example 2 to paragraph (b): A health scientist administrator employed in the Public Health Service at the Department of Health and Human Services is assigned to serve on a Departmentwide task force that will recommend changes in how Medicare reimbursements will be made to health care providers. The employee owns $35,000 worth of shares in the XYZ Health Sciences Fund, a sector mutual fund invested primarily in health-related companies such as pharmaceuticals, developers of medical instruments and devices, managed care health organizations, and acute care hospitals. The health scientist administrator may participate in the recommendations.

Example 3 to paragraph (b): The spouse of the employee in the previous Example owns $40,000 worth of shares in ABC Specialized Portfolios: Healthcare, a sector mutual fund that also concentrates its investments in health-related companies. The two funds focus on the same sector and both contain holdings that may be affected by the particular matter. Because the aggregated value of the two funds exceeds $50,000, the employee may not rely on the exemption.

* * * * *

5. Section 2640.202 is amended by:

a. Revising paragraph (a)(2);

b. Revising the heading of Example 1 and revising Examples 2 and 3 following paragraph (a)(2);

c. Redesignating paragraphs (b) through (e) as paragraphs (c) through (f), respectively;

d. Adding a new paragraph (b);

e. Adding new Example 1 following new paragraph (b)(2); and

f. Revising the heading of Example 1 and removing Example 2 following redesignated paragraph (c)(2).

The revisions and additions read as follows:

§ 2640.202 Exemptions for interests in securities.

(a) * * *

(2) The aggregate market value of the holdings of the employee, his spouse, and his minor children in the securities of all entities does not exceed $15,000.

Example 1 to paragraph (a): * * *

Example 2 to paragraph (a): In the preceding example, the employee and his spouse each own $8,000 worth of stock in XYZ Corporation, resulting in ownership of $16,000 worth of stock by the employee and his spouse. The exemption in paragraph (a) of this section would not permit the employee to participate in the evaluation of bids because the aggregate market value of the holdings of the employee, spouse and minor children in XYZ Corporation exceeds $15,000. The employee could, however, seek an individual waiver under 18 U.S.C. 208(b)(1) in order to participate in the evaluation of bids.

Example 3 to paragraph (a): An employee is assigned to monitor XYZ Corporation's performance of a contract to provide computer maintenance services at the employee's agency. At the time the employee is first assigned these duties, he owns publicly traded stock in XYZ Corporation valued at less than $15,000. During the time the contract is being performed, however, the value of the employee's stock increases to $17,500. When the employee knows that the value of his stock exceeds $15,000, he must disqualify himself from any further participation in matters affecting XYZ Corporation or seek an individual waiver under 18 U.S.C. 208(b)(1). Alternatively, the employee may divest the portion of his XYZ stock that exceeds $15,000. This can be

VOL
67
ISS
53
MR
19
2002
UMI

accomplished through a standing order with his broker to sell when the value of the stock exceeds $15,000.

(b) *De minimis exemption for matters affecting nonparties.* An employee may participate in any particular matter involving specific parties in which the disqualifying financial interest arises from the ownership by the employee, his spouse, or minor children of securities issued by one or more entities that are not parties to the matter but that are affected by the matter, if:

(1) The securities are publicly traded, or are long-term Federal Government or municipal securities; and

(2) The aggregate market value of the holdings of the employee, his spouse and minor children in the securities of all affected entities (including securities exempted under paragraph (a) of this section) does not exceed $25,000.

Example 1 to paragraph (b): A Food and Drug Administration advisory committee is asked to review a new drug application from Alpha Drug Co. for a new lung cancer drug. A member of the advisory committee owns $20,000 worth of stock in Mega Drug Co., which manufactures the only similar lung cancer drug on the market. If approved, the Alpha Drug Co.'s drug would directly compete with the drug sold by the Mega Drug Co., resulting in decreased sales of its lung cancer drug. The committee member may participate in the review of the new drug.

(c) * * *

Example 1 to paragraph (c): * * *

* * * * *

6. Section 2640.204 is amended by revising Example 1 which follows the section to read as follows:

§ 2640.204 Prohibited financial interests.

* * * * *

Example 1 to § 2640.204: The Office of the Comptroller of the Currency (OCC), in a regulation that supplements part 2635 of this chapter, prohibits certain employees from owning stock in commercial banks. If an OCC employee purchases stock valued at $2,000 in contravention of the regulation, the exemption at § 2640.202(a) for interests arising from the ownership of no more than $15,000 worth of publicly traded stock will not apply to the employee's participation in matters affecting the bank.

BILLING CODE 6345–01–U

DEPARTMENT OF AGRICULTURE

Commodity Credit Corporation

7 CFR Part 1437

RIN 0560–AG20

Noninsured Crop Disaster Assistance Program

AGENCY: Commodity Credit Corporation, USDA.

ACTION: Interim rule.

SUMMARY: The Commodity Credit Corporation (CCC) amends the regulations with respect to the Noninsured Crop Disaster Assistance Program (NAP). This interim rule amends the NAP regulations to remove area requirements, announce new requirements regarding the filing of applications, payment of service fees, and reporting of crop acreage, yield, and production. These regulatory amendments are designed to improve the overall operation of the program and to conform the regulations with changes to the program made in recent legislation.

DATES: The rule is effective March 19, 2002. Comments must be received by April 18, 2002, to be assured of consideration.

ADDRESSES: Comments should be addressed to Steve Peterson, Chief, Noninsured Assistance Programs Branch (NAPB); Production, Emergencies, and Compliance Division (PECD); Farm Service Agency (FSA); United States Department of Agriculture, STOP 0517, 1400 Independence Avenue, SW., Washington, DC 20250–0517; e-mail *Steve_Peterson@wdc.fsa.usda.gov.*

FOR FURTHER INFORMATION CONTACT: Steve Peterson, Chief, Noninsured Assistance Programs Branch (NAPB); Production, Emergencies, and Compliance Division (PECD); Farm Service Agency (FSA); United States Department of Agriculture, STOP 0517, 1400 Independence Avenue, SW, Washington, DC 20250–0517; telephone (202) 720–5172; facsimile (202) 690–3646; e-mail *StevePeterson@wdc.fsa.usda.gov.*

SUPPLEMENTARY INFORMATION:

Executive Order 12866

This rule is issued in conformance with Executive Order 12866 and has been determined to be economically significant and therefore has been reviewed by the Office of Management and Budget (OMB). A summary of the Cost-Benefit Assessment follows the Background section.

Regulatory Flexibility Act

It has been determined that the Regulatory Flexibility Act is not applicable to this rule because neither FSA nor the CCC is required by 5 U.S.C. 533 or any other provision of law to publish a notice of proposed rulemaking with respect to the subject matter of this rule.

Environmental Evaluation

It has been determined by an environmental evaluation that this action will have no significant impact on the quality of the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is needed.

Executive Order 12988

The rule has been reviewed in accordance with Executive Order 12988. The provisions of this rule preempt State laws to the extent such laws are inconsistent with the provisions of this rule. Before any judicial action may be brought concerning the provisions of this rule, the administrative remedies must be exhausted.

Executive Order 12372

This program is not subject to the provisions of Executive Order 12372, which require intergovernmental consultation with State and local officials. See the Notice related to 7 CFR Part 3015, subpart V, published at 49 FR 29115 (June 24, 1983). Unfunded Mandates Reform Act of 1995 (UMRA)

This rule contains no Federal mandates under the regulatory provisions of Title II of the UMRA for State, local, and tribal governments or the private sector. Thus, this rule is not subject to the requirements of sections 202 and 205 of the UMRA.

Paperwork Reduction Act

This rule amends current regulations to reference changes to NAP made by amendments to section 196 of the Federal Agriculture Improvement and Reform Act of 1996 (1996 Act). The Paperwork Reduction Act generally requires a 60-day public comment period and OMB review of the information collections before regulations may be promulgated. However, section 161 of the 1996 Act provided that the Secretary issue regulations without regard to the Paperwork Reduction Act. A separate notice announcing a 60-day comment period will be published and OMB approval sought under the provisions of 44 U.S.C. chapter 35.

Executive Order 12612

It has been determined that this rule does not have sufficient Federalism implications to warrant the preparations of a Federalism Assessment. The provisions contained in this rule will not have a substantial direct effect on States or their political subdivisions, or on the distribution of power and responsibilities among the various levels of Government.

Federal Assistance Programs

This program is listed in the Catalog of Federal Domestic Assistance under No. 10.450.

Background

This rule re-writes, in their entirety, the Noninsured Crop Disaster Assistance Program (NAP) regulations to improve the overall administration of the program and to conform with statutory amendments to section 196 of the Federal Agriculture Improvement and Reform Act of 1996 made in section 109 of the Agricultural Risk Protection Act of 2000 (Pub. L. 106–224; June 20, 2000) ("ARPA 2000"). Section 171(b)(2)(g) of ARPA 2000 specified that the amendments to NAP would not be effective until the 2001 crop year. Also, prior to enactment of ARPA 2000, section 101 of the Omnibus Consolidated Appropriations Act, 2000 (Pub. L. 106–113; November 29, 1999) provided that beginning with the 1999 crop year CCC should provide up to $20 million to eligible producers without regard to the regulatory requirement for area crop losses. CCC put into place procedures to identify and provide assistance to producers who would have been eligible for assistance if not for the area crop loss requirement.

The changes made to NAP by ARPA 2000 were significant and involved major changes in the way producers will qualify or retain eligibility for NAP. There, the NAP statute was amended to remove the area crop loss requirement entirely. In addition, the statute has been amended to require an application and collection of a service fee. Producers now must apply for NAP no later than the application closing date announced by the Secretary. Additionally, producers must now pay a service fee of $100 per crop per administrative county, or $300 per producer per administrative county, up to a maximum, for all counties for the producer, of $900. Service fees for limited resource producers may be waived. CCC will use the definition of limited resource farmer provided in FCIC regulations found at 7 CFR 457.8 for the purpose of defining limited resource producers. Typically, under current regulations, limited resource producers have an annual gross income of $20,000 or less from all sources for the last 2 years, or farm less than 25 acres with most of their income of $20,000 or less per year coming from farming. This criteria, for NAP purposes, is subject to change as 7 CFR 457.8 is amended. Because of the timing involved, for certain 2001 and 2002 crops, special time periods have been created for submission of the application for NAP coverage and service fees. To maintain eligibility for 2001 and 2002 crops, producers who otherwise would be late in filing the application must apply and pay the service fee within 30 days of publication of this rule. NAP continues to require crop reporting as a condition of eligibility. Every year producers must provide records of crop acreage, yields, and production.

As a condition of eligibility, NAP benefits are earned only when a loss or prevented planting occur as a result of an eligible loss condition (disaster) as opposed to some other reason. It is a producer's responsibility to show that the producer's claimed loss or prevented planting was the result of an eligible cause. Accordingly, for clarification purposes, this rule better describes (without any change to policy) those loss conditions and crops for which benefits under this part might be exacted. For example, a definition of "controlled environment" has been added; the definition of "natural disaster" has been removed and the term is discussed under § 1437.9 "Causes of Loss;" sections were added discussing several crops for which coverage is available; and generally, language in various sections have been amended for clarity. Effective for the 2002 and succeeding crop years the exclusion of unseeded forage on Federal- and State-owned land as an eligible crop is removed.

Cost-Benefit Assessment

NAP expenditures for crop years 1996 through 1998 averaged about $43 million per year. Outlays generally occur in the fiscal year following the crop year. The President's budget baseline (prior to enactment of Public Law 106–224) assumed the NAP program would cost $90 million each year. Outlays have never reached that expectation, in part due to generally favorable weather conditions throughout the U.S. and to the reluctance of producers to report acreage and production when the area loss threshold had not been triggered. But that very reluctance to report makes it difficult for the area loss threshold to trigger.

The 2000 Act, by removing the area trigger requirement, removed this impediment. That is, if a producer has the requisite crop loss (50 percent or more), the producer will be eligible to receive NAP benefits. The producer no longer has to farm in an area where the yield for the crop had to fall below 65 percent of the expected area yield to receive a payment.

Participation in the 1999 Crop Disaster Program (CDP) provides some insight into the cost of the NAP program. The CDP provided payments to producers who suffered a 35-percent crop loss. Eligible crops include insurable crops (crops eligible for crop insurance) and non-insurable crops (crops eligible for NAP). Total claims for the CDP program were about $2 billion (before application of the payment limit and before the national factor). Out of the $2 billion, about $375 million was paid out for crops that are eligible for NAP; the remaining funds went to crops that were eligible for crop insurance.

The CDP paid producers for quantity losses in excess of 35 percent at 65 percent of the market price. The NAP program pays producers for quantity losses in excess of 50 percent at 55 percent of the market price. When the CDP applications were screened for those producers meeting the more restrictive loss requirements and adjustments were made in the payment rates, the $375 million in benefits for non-insured crops under CDP dropped to about $150 million under the NAP.

The number of NAP participants ranged from a low of about 6,500 in 1997 to a high of over 25,000 in 1996. More than 50,000 producers received CDP benefits for crops eligible for NAP. Each producer received, on average, payments for about two crops. If 75,000 producers were to enroll in the new NAP, averaging two crops per producer, about $15 million would be collected annually in service fees.

The total cost of NAP would be $147 million annually ($162 million in benefits less the $15 million in service fees). Compared with projected NAP outlays in the President's Budget of $90 million, CCC outlays would increase by $57 million annually. Compared with average NAP outlays of $43 million in fiscal years 1997 to 1999, CCC outlays would increase by $104 million annually. The outlays would partially offset lower income due to the weather-related crop losses. Farm income would increase by a like amount.

The above cost projections assume that unseeded forage on Federal and State lands is eligible for NAP benefits.

VOL
67
ISS
53
MR
19
2002
UMI

It is estimated that 62 million acres of unseeded forage on Federal and State lands would become eligible under the new rule. If 10 percent of these acres could not be grazed due to a natural disaster, CCC outlays would increase by $12 million.

This rule is issued as an interim rule and will be effective while comments are being received. As this rule implements provisions of the Federal Agriculture Improvement and Reform Act of 1996, section 161 of that Act exempts this rule from prior comment. Likewise section 172 of ARPA 2000 suggests quick implementation. Delay in implementing the new statutory law would be contrary to the public interest and law. Likewise, as to 5 U.S.C. 808 it has been determined for the same reasons that a lay-over for Congressional review would be contrary to public interest. Similarly, for those amendments not compelled by recent statutory changes, the improvement of the program should benefit the overall administration of the program and corrections based on comments can be made as needed. Accordingly, it has been determined that it would be contrary to the public interest to withhold those changes and those changes likewise are made effective immediately. All of the corrections and amendments are set out in the full text of 7 CFR part 1437 in this interim rule. Comments, favorable and unfavorable, are solicited on all aspects of the rule.

List of Subjects in 7 CFR Part 1437

Agricultural commodities, Disaster Assistance, Reporting and record keeping requirements.

For the reasons set out above, 7 CFR part 1437 is revised to read as follows:

PART 1437—NONINSURED CROP DISASTER ASSISTANCE PROGRAM

Subpart A—General Provisions

Sec.

1437.1 Applicability.
1437.2 Administration.
1437.3 Definitions.
1437.4 Eligibility.
1437.5 Coverage period.
1437.6 Application for coverage and service fee.
1437.7 Records.
1437.8 Unit division.
1437.9 Causes of loss.
1437.10 Notice of loss and application for payment.
1437.11 Average market price and payment factors.
1437.12 Crop definition.
1437.13 Multiple benefits.
1437.14 Payment and income limitations.
1437.15 Miscellaneous provisions.

Subpart B—Determining Yield Coverage Using Actual Production History

1437.101 Actual production history.
1437.102 Yield determinations.
1437.103 Determining payments for low yield.
1437.104 Honey.
1437.105 Maple sap.
1437.106–1437.200 [Reserved]

Subpart C—Determining Coverage for Prevented Planted Acreage

1437.201 Prevented planting acreage.
1437.202 Determining payments for prevented planting.
1437.203–1437.300 [Reserved]

Subpart D—Determining Coverage Using Value

1437.301 Value loss.
1437.302 Determining payments.
1437.303 Aquaculture, including ornamental fish.
1437.304 Floriculture.
1437.305 Ornamental nursery.
1437.306 Christmas tree crops.
1437.307 Mushrooms.
1437.308 Ginseng.
1437.309 Turfgrass sod.
1437.310–1437.400 [Reserved]

Subpart E—Determining Coverage of Forage Intended for Animal Consumption

1437.401 Forage.
1437.402 Carrying capacity.
1437.403 Determining payments.
1437.404 Information collection requirements under the Paperwork Reduction Act; OMB control number.

Authority: 15 U.S.C. 714 *et seq.*; and 7 U.S.C. 7333.

Subpart A—General Provisions

§ 1437.1 Applicability.

(a) The Noninsured Crop Disaster Assistance Program (NAP) is intended to provide eligible producers of eligible crops coverage equivalent to the catastrophic risk protection level of crop insurance. NAP is designed to help reduce production risks faced by producers of commercial crops or other agricultural commodities. NAP will reduce financial losses that occur when natural disasters cause a catastrophic loss of production or where producers are prevented from planting an eligible crop.

(b) The provisions contained in this part are applicable to eligible producers and eligible crops for which catastrophic coverage under section 508(b) the Federal Crop Insurance Act (7 U.S.C. 1508(b)), as amended, or its successors, is not available.

(c) The regulations of this part are applicable to the 2001 and subsequent crop years.

§ 1437.2 Administration.

(a) NAP is administered under the general supervision of the Executive Vice-President, CCC (who also serves as Administrator, Farm Service Agency), and shall be carried out by State and county FSA committees (State and county committees).

(b) State and county committees, and representatives and their employees, do not have authority to modify or waive any of the provisions of the regulations of this part.

(c) The State committee shall take any action required by the regulations of this part that the county committee has not taken. The State committee shall also:

(1) Correct, or require a county committee to correct, any action taken by such county committee that is not in accordance with the regulations of this part; or

(2) Require a county committee to withhold taking any action that is not in accordance with this part.

(d) No provision or delegation to a State or county committee shall preclude the Executive Vice-President, CCC, or a designee, from determining any question arising under the program or from reversing or modifying any determination made by a State or county committee.

(e) The Deputy Administrator may authorize State and county committees to waive or modify deadlines (except statutory deadlines) in cases where lateness to file does not adversely affect operation of the program.

§ 1437.3 Definitions.

The definitions and program parameters set out in this section shall be applicable for all purposes of administering the Noninsured Crop Disaster Assistance Program provided for in this part. Although the terms defined in part 718 of this title and part 1400 of this chapter shall also be applicable, the definitions set forth in this section shall govern for all purposes of administering the Program.

Actual Production History (APH) means the farm's operative production history established in accordance with subpart B of this part.

Administrative county office means the county FSA office designated to make determinations, handle official records, and issue payments for the producer in accordance with 7 CFR part 718.

Animal Unit Days (AUD) means an expression of expected or actual stocking rate for pasture or forage.

Application Closing Date means the last date, as determined by CCC, producers can submit an application for coverage for noninsured crops for the specified crop year.

Catastrophic coverage means a catastrophic risk protection (CAT) level of crop insurance available in accordance with section 508(b) of the Federal Crop Insurance Act, as amended.

Catastrophic loss means—

(1) Loss, as the result of an eligible cause of loss, that entails as determined by CCC:

(i) Prevented planting of greater than 35 percent of the intended crop acreage; a yield loss of greater than 50 percent of the approved yield; or value loss of greater than 50 percent of the pre-disaster value; or

(ii) AUD loss of greater than 50 percent of the expected AUD.

(2)The quantity will not be reduced for any quality consideration unless a zero value is established.

Controlled environment means, with respect to those crops for which a controlled environment is expected to be provided, including but not limited to ornamental nursery, aquaculture (including ornamental fish), and floriculture, an environment in which everything that can practicably be controlled with structures, facilities, growing media (including but not limited to water, soil, or nutrients) by the producer, is in fact controlled by the producer.

Crop year means the calendar year in which the crop is normally harvested or in which the majority of the crop would have been harvested. For value loss and other specific commodities, see the applicable subpart and section of this part. For crops for which catastrophic coverage is available, the crop year will be as defined by such coverage.

Fiber means a slender and greatly elongated natural plant filament, e.g. cotton, flax, etc. used in manufacturing, as determined by CCC.

Final planting date means the date which marks the end of the planting period for the crop and in particular the last day, as determined by CCC, the crop can be planted to reasonably expect to achieve 100 percent of the expected yield in the intended harvest year or planting period.

Food means a material consisting essentially of protein, carbohydrates, and fat used in the body to sustain growth, repair, and vital processes including the crops used for the preparation of food, as determined by CCC.

Good farming practices means the cultural practices generally used for the crop to make normal progress toward maturity and produce at least the individual unit approved yield. These practices are normally those recognized by Cooperative State Research, Education, and Extension Service as compatible with agronomic and weather conditions.

Harvested means the producer has removed the crop from the field by hand, mechanically, or by grazing of livestock. The crop is considered harvested once it is removed from the field and placed in a truck or other conveyance or is consumed through the act of grazing. Crops normally placed in a truck or other conveyance and taken off the crop acreage, such as hay are considered harvested when in the bale, whether removed from the field or not.

Industrial crop means a commercial crop, or other agricultural commodity utilized in manufacturing. Industrial crops include caster beans, chia, crambe, crotalaria, cuphea, guar, guayule, hesperaloe, kenaf, lesquerella, meadowfoam, milkweed, plantago, ovato, sesame and other crops specifically designated by CCC.

Intended Use means for a crop or a commodity, the end use for which it is grown and produced.

Multiple planted means the same crop is planted and harvested during two or more distinct planting periods in the same crop year, as determined by CCC.

Normal harvest date means the date harvest of the crop is normally completed in the administrative county, as determined by CCC.

Seed crop means propagation stock commercially produced for sale as seed stock for eligible crops.

Seeded forage means forage on acreage mechanically seeded with forage vegetation at regular intervals, at least every 7 years, in accordance with good farming practices.

T-Yield means the yield which is based on the county expected yield of the crop for the crop year and is used on an adjusted or unadjusted basis to calculate the approved yield for crops covered under the NAP when less than four years of actual, assigned, or appraised yields are available in the APH data base.

Transitional yield means an estimated yield of that name provided in the Federal Crop Insurance Corporation (FCIC) actuarial table which is used to calculate an average/approved APH yield for crops insured under the Federal Crop Insurance Act when less than four years of actual, temporary, and/or assigned yields are available on a crop by county basis.

§ 1437.4 Eligibility.

(a) Noninsured crop disaster assistance for low yield or prevented planting is available to producers of eligible commercial crops or other agricultural commodities, as determined by CCC, for which:

(1) Catastrophic coverage is not available; or

(2) Catastrophic coverage is available in the administrative county, however, the eligible commercial crop or other agricultural commodity is affected by an eligible cause of loss, as determined by CCC, that is not covered by the catastrophic coverage.

(b) Noninsured crop disaster assistance for low yields or prevented planting is available only when loss of the crop occurs as a result of an eligible cause of loss, as determined by CCC.

(c) When other conditions are met, NAP may be available for an eligible loss of:

(1) Any commercial crop grown for food, excluding livestock and their by-products;

(2) Any commercial crop planted and grown for livestock consumption, including but not limited to grain and forage crops; except for the 2001 and preceding crop years assistance for forage produced on Federal- and State-owned lands is available only for seeded forage.

(3) Any commercial crop grown for fiber, excluding trees grown for wood, paper, or pulp products; and

(4) Any commercial production of:

(i) Aquacultural species (including ornamental fish);

(ii) Floricultural crops;

(iii) Ornamental nursery plants;

(iv) Christmas tree crops;

(v) Turfgrass sod;

(vi) Industrial crops; and

(vii) Seed crops.

§ 1437.5 Coverage period.

(a) The coverage period is the time during which coverage is available against loss of production of the eligible crop as a result of natural disaster.

(b) The coverage period for annual crops, including annual forage crops, begins the later of 30 calendar days after the date the application for coverage is filed; or the date the crop is planted, not to exceed the final planting date; and ends on the earlier of the date harvest is complete; the normal harvest date of the crop in the area; the date the crop is abandoned; or the date the crop is destroyed.

(c) Except as otherwise specified in this part, the coverage period for biennial and perennial crops begins 30 calendar days after the application closing date; and ends as determined by CCC.

(d) Except as otherwise specified in this part, the coverage period for value loss crops, including ornamental nursery, aquaculture, Christmas tree crops, ginseng, and turfgrass sod; and other eligible crops, including

VOL

floriculture and mushrooms begins 30 calendar days after the application closing date; and ends the last day of the crop year, as determined by CCC.

(e) The coverage period for honey begins 30 calendar days after the application closing date and ends the last day of the crop year, as determined by CCC.

(f) The coverage period for maple sap begins 30 calendar days after the application closing date and ends on the earlier of the date harvest is complete; or the normal harvest date.

(g) For biennial and perennial forage crops the coverage period begins the later of 30 calendar days after the application closing date; for first year seedings, the date the crop was planted; or the date following the normal harvest date. The coverage ends on the normal harvest date of the subsequent year.

§ 1437.6 Application for coverage and service fee.

(a) With respect to each crop, commodity or acreage, producers must file an application for coverage under this part no later than the application closing date.

(b) The service fee must be paid at the time of the application. The service fee is $100 per crop per administrative county, up to $300 per producer per administrative county, but not to exceed $900 per producer.

(c) The service fee will be applied per administrative county by crop definition and planting period, as determined by CCC.

(d) Limited resource farmers may request that the service fee be waived and must request such a waiver prior to, or at the same time the application for coverage is filed. For this purpose, a "limited resource farmer" shall be given the meaning assigned by 7 CFR 457.8.

(e) For 2001 and 2002 crops for which the application closing date would normally have been established prior to March 19, 2002, or established within 60 calendar days after March 19, 2002, producers must within 30 calendar days after March 19, 2002:

(1) Submit a 2001 or 2002 crop application for coverage, as applicable, and pay the applicable service fee; and

(2) Certify the 2000 and 2001 crop year production for the crop, if applicable.

(f) For 2001 and 2002 crops which have suffered damage or loss, producers must, in addition to paragraph (e)(1) of this section, have complied with all requirements of this part prior to its revision on March 19, 2002, (and contained in the 7 CFR, parts 1200 to 1599, edition revised as of January 1, 2002) including having filed a timely:

(1) Report of acreage;

(2) Notice of loss; and

(3) Application for payment.

§ 1437.7 Records.

(a) Producers must maintain records of crop acreage, acreage yields, and production for the crop for which an application for coverage is filed in accordance with § 1437.5. For those crops or commodities for which it is impractical, as determined by CCC, to maintain crop acreage, yields or production, producers must maintain records, in addition to the available records required by this section, as may be required in subparts C, D and E, of this part. Producers must retain records of the production and acreage yield for a minimum of 3 years for each crop for which an application for coverage is filed in accordance with § 1437.6. Producers may be selected on a random or targeted basis and be required to provide records acceptable to CCC to support the certification provided. For each crop for which producers file an application for payment in accordance with § 1437.10 that is harvested, producers must provide documentary evidence of production, acceptable to CCC, and the date harvest was completed. Such documentary evidence must be filed not later than the application closing date for the crop in the subsequent crop year. Records of a previous crop year's production for inclusion in the actual production history database used to calculate an approved yield for the current crop year must be certified by the producer no later than the application closing date for the crop in the current crop year. Production data provided after the application closing date in the current crop year for the crop may be included in the actual production history data base for the calculation of subsequent approved yield calculations if accompanied by acceptable records of production as determined by CCC. Records of production acceptable to CCC may include:

(1) Commercial receipts, settlement sheets, warehouse ledger sheets, or load summaries if the eligible crop was sold or otherwise disposed of through commercial channels provided the records are reliable or verifiable as determined by CCC; and

(2) Such documentary evidence such as contemporaneous measurements, truck scale tickets, and contemporaneous diaries, as is necessary in order to verify the information provided if the eligible crop has been fed to livestock, or otherwise disposed of other than through commercial channels, provided the records are reliable or verifiable as determined by CCC. If the crop will be disposed of through retail sales, such as: roadside stands, u-pick, etc. and the producer will not be able to certify acceptable records of production, the producer must request an appraisal of the unit acreage prior to harvest of the crop acreage.

(b) Producers must provide verifiable evidence, as determined by CCC, of:

(1) An interest in the commodity produced or control of the crop acreage on which the commodity was grown at the time of disaster; and

(2) The authority of the applicable individual to execute program documents.

(c) Reports of acreage planted or intended but prevented from being planted must be provided to CCC at the administrative FSA office for the acreage no later than the date specified by CCC for each crop and location. Reports of acreage filed beyond the date specified by CCC for the crop and location may, however, be considered timely filed if all the provisions of 7 CFR 718.103 are met. In the case of a crop-share arrangement, all producers will be bound by the acreage report filed by the landowner or operator unless the producer files a separate acreage report prior to the date specified by CCC for the crop and location. Reports of acreage planted or intended and prevented from being planted must include all of the following information:

(1) Number of acres of the eligible crop in the administrative county (for each planting in the event of multiple planting) in which the producer has a share;

(2) Zero acres planted when the producer's crop for which an application for coverage was filed, is not planted;

(3) The producer's share of the eligible crop at the time an application for coverage was filed;

(4) The FSA farm serial number;

(5) The identity of the crop, practices, intended uses, and for forage crops, the predominant species or type and variety of the vegetation;

(6) The identity of all producers sharing in the crop;

(7) The date the crop was planted or planting was completed, including the age of the perennial crops; and

(8) The acreage intended but prevented from being planted.

(d) Producers receiving a guaranteed payment for planted acreage, as opposed to receiving a payment only upon delivery of the production must provide documentation of any written or verbal contract or arrangement with the buyer to CCC. Net production, as determined by CCC, may be adjusted upward by the amount of production corresponding to the amount of the contract payment received.

(e) Producers must provide documentation of any salvage value received by or made available for the quantity of the crop or commodity that cannot be marketed or sold in any market, as determined by CCC and any value received by or made available for a secondary use of the crop or commodity.

(f) Producers requesting payment under this part must maintain records which substantiate gross revenue for the tax year preceding the crop year for which coverage is requested.

(g) Producers requesting a waiver of service fees as a limited resource producer must maintain records which substantiate annual gross income for the two tax years preceding the crop year for which coverage is requested.

§ 1437.8 Unit division.

Except as determined by CCC, a unit shall be all acreage of the eligible crop in the administrative county operated by the same producer(s). In cases where the owners of land are also producers, units shall be further divided based on ownership interest of the land.

§ 1437.9 Causes of loss.

(a) To be eligible for benefits under this part, crops must be damaged or prevented from being planted by drought, flood or other natural disasters and conditions related thereto. Not all named perils are eligible causes of loss for all crops. Eligible causes of loss include:

(1) Damaging weather occurring prior to or during harvest, including but not limited to drought, hail, excessive moisture, freeze, tornado, hurricane, excessive wind, or any combination thereof;

(2) Adverse natural occurrence occurring prior to or during harvest, such as earthquake, flood, or volcanic eruption; and

(3) A related condition, including but not limited to heat, insect infestation, or disease, which occurs as a result of an adverse natural occurrence or damaging weather occurring prior to or during harvest, that directly causes, accelerates, or exacerbates the destruction or deterioration of an eligible crop, as determined by the Secretary.

(b) Ineligible causes of loss include but are not limited to:

(1) Factors or circumstances that are not the result of an eligible cause of loss affecting specific crop or commodity;

(2) The negligence or malfeasance of the producer;

(3) The failure of the producer to reseed to the same crop in those areas and under such circumstances where it is customary to reseed;

(4) Failure of the producer to follow good farming practices, as determined by CCC;

(5) Water contained or released by any governmental, public, or private dam or reservoir project, if an easement exists on the acreage affected for the containment or release of the water;

(6) Failure or breakdown of irrigation equipment or facilities; or

(7) Except for tree crops and perennials, inadequate irrigation resources at the beginning of the crop year;

(8) A loss of inventory (or yield as applicable) of aquiculture (including ornamental fish), floriculture or ornamental nursery stemming from drought or any failure to provide water, soil, or growing media to such crop for any reason;

(9) Any failure to provide a controlled environment or exercise good nursery practices where such controlled environment or practices are a condition of eligibility under this part.

§ 1437.10 Notice of loss and application for payment.

(a) At least one producer having a share in the unit must provide a notice of loss to CCC in the administrative FSA office for the unit, within:

(1) For prevented planting claims, 15 calendar days after the final planting date,

(2) For low yield claims and allowable value loss, the earlier of:

(i) 15 calendar days after the damaging weather or adverse natural occurrence, or date loss of the crop or commodity becomes apparent for low yield claims; and

(ii) 15 calendar days after the normal harvest date.

(b) For each crop for which a notice of loss is filed, producers must provide the following information:

(1) Crop by type or variety, as applicable;

(2) The cause of the crop damage;

(3) Date the loss occurred, as applicable;

(4) Date the damage or loss became apparent;

(5) The existence of a guaranteed payment through a contract or agreement for planted acreage as opposed to delivery of production, if one exists;

(6) Type of crop loss occurred, e.g. prevented planting or low yield;

(7) Practices employed to grow the crop, e.g. irrigated or non-irrigated;

(8) For prevented planting:

(i) Total acreage intended to be planted to the crop in the administrative county;

(ii) Total acreage planted by the producer to the crop in the administrative county;

(iii) Whether a purchase, delivery, or arrangement for purchase or delivery was made for seed, chemicals, fertilizer, etc; and

(iv) What and when land preparation measures, e.g. cultivation, etc. were completed and indicate what has been done or will be done with the acreage, e.g. abandoned, replanted, etc.

(9) For low yield:

(i) Total acreage planted by the producer to the crop in the administrative county;

(ii) Total acreage of the crop in the administrative county affected;

(iii) What and when land preparation measures and practices, e.g. cultivation, planting, irrigated, etc. were completed before and after the loss; and

(iv) What will be done with the affected crop acreage, e.g. harvested, destroyed and replanted to a different crop, abandoned, etc.

(10) Any such other information requested by CCC to establish the loss.

(c) A notice of loss provided beyond the time specified in paragraph (a) of this section may be considered timely filed if, at the discretion of CCC, provided at such time to permit an authorized CCC representative the opportunity to:

(1) Verify the information on the notice of loss by inspection of the specific acreage or crop involved; and

(2) Determine, based on information obtained by inspection of the specific acreage or crop involved, that an eligible cause of loss, as opposed to other circumstance, caused the claimed damage or loss.

(d) Crop acreage that will not be harvested, i.e. acreage that is to be abandoned or destroyed or in the case of forage acreage intended to be mechanically harvested but grazed, must be left intact and producers must request, in the administrative FSA office for the acreage, a crop appraisal and release of crop acreage by a FCIC- or CCC-approved loss adjustor:

(1) Prior to destruction or abandonment of the crop acreage; or

(2) No later than the normal harvest date, as determined by CCC.

(e) Producers must apply for payments prior to the earlier of the:

(1) Date an application for coverage is filed for the crop for the subsequent crop year; or

(2) Application closing date for the crop for the subsequent crop year.

§ 1437.11 Average market price and payment factors.

(a) An average market price will be used to calculate assistance under this part and will be:

(1) A dollar value per the applicable unit of measure of the eligible crop;

(2) Determined on a harvested basis without the inclusion of transportation, storage, processing, marketing, or other post-harvest expenses, as determined by CCC;

(3) Comparable with established FCIC prices; and

(4) Determined, as practicable, for each intended use of a crop within a State for a crop year.

(b) For these purposes, where needed, an Animal-unit-days (AUD) value will be based on the national average price of corn and the daily requirement of 13.6 megacalories of net energy for maintenance of 1 animal unit.

(c) Payment factors will be used to calculate assistance for crops produced with significant and variable harvesting expenses that are not incurred because the crop acreage was prevented planted or planted but not harvested, as determined by CCC.

(d) An adjusted market price will be calculated based on the provisions in this section and others as may apply. A final payment price will be determined by multiplying, as appropriate, the average market price by the applicable payment factor (i.e. harvested, unharvested, or prevented planting) by 55 percent or, by multiplying the applicable AUD (as adjusted, if adjusted) by 55 percent.

§ 1437.12 Crop definition.

(a) For the purpose of providing benefits under this part, CCC will, at its discretion, define crops as specified in this section.

(b) CCC may separate or combine types and varieties as a crop when specific credible information as determined by CCC is provided showing the crop of a specific type or variety has a significantly different or similar value when compared to other types or varieties, as determined by CCC.

(c) CCC may recognize two or more different crops planted on the same acreage intended for harvest during the same crop year as two or more separate crops. The crop acreage may include a crop intended for harvest before planting of a succeeding crop or a succeeding crop interseeded with the preceding crop prior to intended harvest of the preceding crop. The acreage must be in an area where the practice is recognized as a good farming practice, as determined by CCC, and all crops are recognized by CCC as able to achieve the expected yield, as determined by CCC.

(d) CCC may consider crop acreage that is harvested more than once during the same crop year from the same plant as a single crop. The acreage must be in an area where the practice is recognized as a good farming practice, as determined by CCC.

(e) CCC may consider each planting period of multiple planted acreage as a separate crop. The acreage must be in an area where the practice is recognized as a good farming practice, as determined by CCC.

(f) CCC may define forage as separate crops according to the intended method of harvest, either mechanical harvest or grazed.

(g) Forage acreage intended to be grazed may be further defined as warm and cool season forage crops.

(h) Forage acreage intended to be mechanically harvested may be defined as a separate crop from grazed forage and may be separated based upon the commodity used as forage, to the extent such separation is allowed under paragraph (b) of this section.

(i) Crop acreage intended for the production of seed may be considered a separate crop from other intended uses, as determined by CCC, if all the following criteria apply:

(1) The specific crop acreage is seeded, or intended to be seeded, with an intent of producing commercial seed as its primary intended use;

(2) There is no possibility of other commercial uses of production from the same crop without regard to market conditions; and

(3) The growing period of the specific crop acreage is uniquely conducive to the production of commercial seed and not conducive to the production of any other intended use of the crop, (e.g. vernalization in a biennial crop such as carrots and onions) and that accommodation renders the possibility of production for any other intended use of the crop improbable.

§ 1437.13 Multiple benefits.

(a) If a producer is eligible to receive payments under this part and benefits under any other program administered by the Secretary for the same crop loss, the producer must choose whether to receive the other program benefits or payments under this part, but shall not be eligible for both. The limitation on multiple benefits prohibits a producer from being compensated more than once for the same loss.

(b) The limitation on multiple benefits in paragraph (a) of this section shall not apply in any respect to Emergency Loans under subtitle C of the Consolidated Farm and Rural Development Act (7 U.S.C. 1961 *et seq*).

(c) The restriction on multiple benefits does not relieve the producer from the requirements of making a production and acreage report.

(d) If the other USDA program benefits are not available until after an application for benefits has been filed under this part, the producer may, to avoid this restriction on such other benefits, refund the total amount of the payment to the administrative FSA office from which the payment was received.

§ 1437.14 Payment and income limitations.

(a) NAP payments shall not be made in excess of $100,000 per person per crop year under this part.

(b) NAP payments shall not be made to a person who has qualifying gross revenues in excess of $2 million for the most recent tax year preceding the year for which assistance is requested. Qualifying gross revenue means:

(1) With respect to a person who receives more than 50 percent of such person's gross income from farming, ranching, and forestry operations, the annual gross income for the taxable year from such operations; and

(2) With respect to a person who receives 50 percent or less of such person's gross income from farming, ranching, and forestry operations, the person's total gross income for the taxable year from all sources.

(c) CCC will pay, for up to one year, simple interest on payments to producers which are delayed. Interest will be paid on the net amount ultimately found to be due, and will begin accruing on the 31st day after the date the producer signs, dates, and submits a properly completed application for payment on the designated form, or the 31st day after a disputed application is adjudicated. Interest will be paid unless the reason for failure to timely pay is due to the producer's failure to provide information or other material necessary for the computation of payment, or there was a genuine dispute concerning eligibility for payment.

(d) Rules set out in 7 CFR part 1400 shall apply in implementing the restrictions of this section.

§ 1437.15 Miscellaneous provisions.

(a) To be eligible for benefits under this part, producers must be in compliance with the highly erodible land and wetlands provisions of part 12 of this title.

(b) The provisions of § 718.11 of this title, providing for ineligibility for benefits for offenses involving controlled substances, shall apply.

(c) A person shall be ineligible to receive assistance under this part for the crop year plus two subsequent crop years if it is determined by the State or county committee or an official of FSA that such person has:

(1) Adopted any scheme or other device that tends to defeat the purpose of a program operated under this part;

(2) Made any fraudulent representation with respect to such program; or

(3) Misrepresented any fact affecting a program determination.

(d) All amounts paid by CCC to any such producer, applicable to the crop year in which a violation of this part occurs, must be refunded to CCC together with interest and other amounts as determined appropriate to the circumstances by CCC.

(e) All persons with a financial interest in the operation receiving benefits under this part shall be jointly and severally liable for any refund, including related charges, which is determined to be due CCC for any reason under this part.

(f) In the event that any request for assistance or payments under this part was established as result of erroneous information or a miscalculation, the assistance or payment shall be recalculated and any excess refunded with applicable interest.

(g) The liability of any person for any penalty under this part or for any refund to CCC or related charge arising in connection therewith shall be in addition to any other liability of such person under any civil or criminal fraud statute or any other provision of law including, but not limited to: 18 U.S.C. 286, 287, 371, 641, 651, 1001 and 1014; 15 U.S.C. 714m; and 31 U. S. C. 3729.

(h) The appeal regulations at parts 11 and 780 of this title apply to decisions made according to this part.

(i) Any payment or portion thereof to any person shall be made without regard to questions of title under State law and without regard to any claim or lien against the crop, or proceeds thereof.

(j) For the purposes of 28 U.S.C. 3201(e), the Secretary hereby waives the restriction on receipt of funds or benefits under this program but only as to beneficiaries who as a condition of such waiver agree to apply the benefits to reduce the amount of the judgement lien.

(k) The provisions of parts 1400, 1403 and 1404 of this chapter apply to NAP.

(l) In the case of death, incompetence or disappearance of any person who is eligible to receive payments under this part, such payments will be disbursed in accordance with part 707 of this title.

Subpart B—Determining Yield Coverage Using Actual Production History

§ 1437.101 Actual production history.

Actual production history will be used, except as otherwise indicated in this part, as the basis for providing noninsured crop disaster assistance.

§ 1437.102 Yield determinations.

(a) Payments based on yields shall be made on "approved yields", which shall be calculated based on the producer's APH for that period up to ten years for which, of the first time such a yield is calculated, there are consecutive years, beginning with the most recent completed year, of actual production history for the producer. If there are not four such consecutive years of history (excluding years when the crop was out of rotation), then such first "approved yield" shall be constructed by creating a four year history as provided for in this part. After the first such approved yield is constructed, years will be added to that history in the manner provided for in this section, dropping, as needed, previous years from the history to the extent that the current history would be a history or base of ten years. For the first approved yield, as needed to construct a four-year history, history will be supplied using T-yields, as set out in paragraph (b) of this section.

(b) The county expected yield:

(1) Is the "T-yield" for the crop, and is the Olympic average (disregarding the high and low yields) of yields in the county the 5 consecutive crop years immediately preceding the previous crop year. (Example: For the 2001 crop year, the base period would be 1995 through 1999).

(2) Will be the same as the FCIC transitional yield if crop insurance is available for the crop, (but not necessarily for the cause of loss if excluded by policy provisions), in the administrative county.

(3) Will be calculated so as to be comparable to the FCIC transitional yield most reasonable to the area if crop insurance was available for the crop (but not necessarily for the cause of loss) in contiguous counties, but not in the immediate county.

(c) Available historical information will be used to establish the county expected yields. Historical information is available from sources including, but is not limited to, National Agricultural Statistics Service data, Cooperative State Research, Education, and Extension Service records, Federal Crop Insurance Data, credible non-government studies, yields in similar areas, and reported actual yield data. Such yields will be based on the acreage intended for harvest.

(d) County expected yields may be adjusted for:

(1) Yield variations due to different farming practices in the administrative county such as: irrigated, nonirrigated, and organic practices; and

(2) Cultural practices, including the age of the planting when such practices are different from those used on acreage to establish the yield.

(e) A T-yield will be used in the actual production history database when less than four consecutive crop years of actual, assigned, or zero yields, as applicable, are available. For those producers who have land physically located in multiple counties and administered out of one county office, the T-yield for all land for the producer will be based on the administrative county's expected yield for that crop. Where a four-year base must be constructed for the producer's first approved yield because the producer does not have at least four consecutive years of actual history starting with the most recent year, then:

(1) If an approved yield had not previously been calculated for the crop and there are no production records available for the most recent crop year, or if there is no formula provided for the producer under paragraphs (e)(2) through (4) of this section, then the approved yield for the current crop year will be calculated on the simple average of 65 percent of the applicable T-yield for each of the four years of the constructed base;

(2) If certified acceptable production records are available for only the most recent crop year and there are no zero (credited) or assigned yields in the producer's history, the approved yield for the current crop year will be calculated on the simple average of the one actual yield plus 80 percent of the applicable T-Yield for the missing crop years.

(3) If certified acceptable production records are available for only the two most recent crop years and there are no zero (credited) or assigned yields in the APH database, the approved yield for the current crop year will be calculated on the simple average of the two actual yields plus 90 percent of the applicable T-yield for the missing years.

(4) If certified acceptable production records are available for only the three most recent crop years and there are no zero (credited) or assigned yields in the APH database, the approved yield will be calculated on the simple average of

VOL
67
ISS
53
MR
19
2002
UMI

the three actual yields plus 100 percent of the applicable T-Yield for the missing year.

(f) CCC will reduce unadjusted T-yields placed in the actual production history database when, as determined by CCC, an unadjusted T-yield does not accurately reflect the productive capability of specific crop acreage.

(g) An actual yield includes the total amount of harvested and appraised production on a per acre, or other basis, as applicable.

(h) Once an approved yield has been calculated for any year, then thereafter an assigned yield will be used to update or extend the producer's actual production history (or base) database when producers fail to certify a report of production after the approved yield was calculated and the following standards shall apply:

(1) The assigned one-year yield will be equal to 75 percent of the approved yield calculated for the most recent crop year for which producers do not certify a report of production.

(2) Producers may have only one assigned yield in the actual production history database.

(3) Producers may replace an assigned yield with an actual yield by providing a certification of production and production records for the applicable crop year in accordance with § 1437.7.

(4) If the acreage of a crop in the administrative county in which the unit is located for the crop year increases by more than 100 percent over any year in the preceding seven crop years, or significantly from the previous crop years, as determined by CCC, producers may not receive an assigned yield and will receive a zero credited yield, unless producers provide:

(i) Detailed documentation of production costs, acres planted, and yield for the crop year for which the producer is requesting assistance, or

(ii) If CCC determines those records are inadequate, proof that the eligible crop, had it been harvested, could have been marketed at a reasonable price.

(5) Notwithstanding paragraph (h)(4) of this section an assigned yield may be used if:

(i) The planted acreage for the crop has been inspected by a third party acceptable to CCC, or

(ii) The FSA county executive director, with the concurrence of the FSA state executive director, makes a recommendation for an exemption from the requirements and such recommendation is approved by CCC.

(6) A zero credited yield will be used to the extent provided for in paragraph (i) of this section.

(i) A zero credited yield will be placed in the actual production history database for each crop year, following the crop year containing an assigned yield, for which producers do not certify a report of production. A zero credited yield may be replaced with an actual yield by providing a certification of production and production records for the applicable crop year in accordance with § 1437.7.

(j) An approved yield is calculated as the simple average of a minimum of four, not to exceed a maximum of 10 consecutive crop year yields for the crops, or as determined by CCC and as provided in this section.

(1) If, for one or more actual production history crop years used to establish the approved yield, the actual or appraised yield is less than 65 percent of the current crop year T-yield due to losses incurred in a disaster year, as determined by CCC, producers may request CCC replace the applicable yield with a yield equal to 65 percent of the current crop year T-yield.

(2) If approved yields were calculated for any of the 1995 through 2000 crop years, and subsequently in that period production was not certified, producers may request CCC replace the missing yields for such years with yields equal to the higher of 65 percent of the current crop year T-yield or the missing crop years actual yield.

(3) If producers add land in the farming operation and do not have available production records for the added land CCC will calculate an approved yield for the new unit by utilizing the actual production history yields for the existing unit. In the event the crop suffers a loss greater than 50 percent of the initial approved yield for the crop year and unit acreage has increased by more than 75 percent of the historical average acreage, CCC may adjust the approved yield, as determined by CCC.

(k) If a producer is a new producer, the approved yield may be based on unadjusted T-Yields or a combination of actual yields and unadjusted T-Yields. A new producer is a person who has not been actively engaged in farming for a share of the production of the eligible crop in the administrative county for more than two APH crop years. Formation or dissolution of an entity which includes individuals with more than two APH crop years of production history during the base period does not qualify the new entity as a new producer for APH determination purposes.

(l) If producers qualify as a new producer and have produced the crop for 1 or 2 crop years, producers must provide to CCC at the administrative FSA office serving the area in which the crop is located, a certification and records of production for those crop years.

(m) Further adjustments may be made as necessary to accomplish the purposes of this program.

§ 1437.103 Determining payments for low yield.

(a) Except to the extent that the loss calculation provisions of other subparts apply, and subject to limitations set out elsewhere in this part and in this title and to the availability of funds, payments under this part shall be made on eligible crops with eligible losses by:

(1) Multiplying the total eligible acreage planted to the eligible crop by the producers share, and subject to provisions for specific crops provided elsewhere in this part;

(2) Multiplying the product of paragraph (a)(1) of this section by 50 percent of the approved yield per acre for the commodity for the producer.

(3) Subtracting net production of the total eligible acreage from the product of paragraph (a)(2) of this section;

(4) Multiplying the difference calculated under paragraph (a)(3) of this section by the final payment price calculated under § 1437.11, and then

(5) Subtracting the value of salvage and secondary use.

(b) Further adjustments may be made as needed to accomplish the purposes and goals of the program.

§ 1437.104 Honey.

(a) Honey production eligible for benefits under this part includes table and non-table honey produced commercially.

(b) All of a producer's honey will be considered a single crop, regardless of type or variety of floral source or intended use.

(c) The crop year for honey production is the calendar year, January 1 through December 31.

(d) In addition to filing a report of acreage in accordance with § 1437.7, honey producers must provide a record of colonies to CCC. The report of colonies must be filed before the crop year for which producers seek to maintain coverage. The report of colonies shall include:

(1) The address of the producer's headquarters and FSA farm serial number, if available;

(2) Names and shares of each person sharing in the honey produced from the unit;

(3) The number of all colonies of bees belonging to the unit;

(4) The names of counties in which colonies of bees are located as of the date of the report; and

(5) A certification of the number of colonies reported including all colonies from which production is expected.

(e) The honey unit shall consist of all the producer's bee colonies, regardless of location.

(f) Producers must designate a FSA office as the control office for the honey operation. Producers must complete the following actions only in the control office:

(1) File an application for coverage;

(2) File a report of colonies;

(3) Report total unit production; and

(4) Request to change a unit's control office.

(g) Actions that may be taken in any Administrative FSA office includes:

(1) Designating or selecting another control office; or

(2) Filing a notice of loss in accordance with § 1437.10.

(h) Producers must notify the control office designated in accordance with paragraph (f) of this section within 30 calendar days of the date of:

(1) Any changes in the total number of colonies; and

(2) The movement of any colonies into any additional counties.

(i) Payments will be based on the amount of losses for this community in excess of a 50 percent loss level at a rate determined in accord with this part and the authorizing legislation.

§ 1437.105 Maple sap.

(a) NAP assistance for maple sap is limited to maple sap produced on private property for sale as sap or syrup. Eligible maple sap must be produced from trees that:

(1) Are located on land the producer controls by ownership or lease;

(2) Are managed for production of maple sap;

(3) Are at least 30 years old and 12 inches in diameter; and

(4) Have a maximum of 4 taps per tree according to the tree's diameter.

(b) The crop year for maple sap production is the calendar year, January 1 through December 31.

(c) If producers file an application for coverage in accordance with § 1437.6, tree acreage containing trees from which maple sap is produced or is to be produced must be reported to CCC no later than the beginning of the crop year.

(d) In addition to the applicable records required under § 1437.7, producers must report the:

(1) Total number of eligible trees on the unit;

(2) Average size and age of producing trees; and

(3) Total number of taps placed or anticipated for the tapping season.

(e) A maximum county-expected-yield for maple sap shall be 10 gallons of sap per tap per crop year unless acceptable documentary evidence, as determined by CCC, is available to CCC to support a higher county-expected-yield.

(f) The average market price for maple sap must be established for the value of the sap before processing into syrup. If price data is available only for maple syrup, this data must be converted to a maple sap basis. The wholesale price for a gallon of maple syrup shall be multiplied by 0.00936 to arrive at the average market price of a gallon of maple sap.

(g) The actual production history for maple sap shall be recorded on the basis of gallons of sap per tap.

(h) The unit's expected production is determined by:

(1) Multiplying the number of taps placed in eligible trees; by

(2) The approved per tap yield as determined in accordance with § 1437.102.

(i) Payments will be based on the amount of losses for this community in excess of a 50 percent loss level at a rate determined in accord with this part and the authorizing legislation.

§§ 1437.106–1437.200 [Reserved]

Subpart C—Determining Coverage for Prevented Planted Acreage

§ 1437.201 Prevented planting acreage.

(a) Prevented planting is the inability to plant an eligible crop with proper equipment during the planting period as a result of an eligible cause of loss, as determined by CCC.

(b) The eligible cause of loss that prevented planting must have:

(1) Occurred after a previous planting period for the crop and

(2) Before the final planting date for the crop in the applicable crop year or in the case of multiple plantings, the harvest date of the first planting in the applicable planting period, and

(3) Generally affected other producers in the area, as determined by CCC.

(c) Producers must be prevented from planting more than 35 percent of the total eligible acreage intended for planting to the eligible crop and in the case of multiple planting, more than 35 percent of the total eligible acres intended to be planted within the applicable planting period.

(d) Eligible prevented planting acreage will be determined on the basis of the producer's intent to plant the crop acreage, and possession of, or access to, resources to plant, grow, and harvest the crop, as applicable.

(e) Acreage ineligible for prevented planting coverage includes, but is not limited to:

(1) Acreage which planting history or conservation plans indicate would remain fallow for crop rotation purposes; and

(2) Acreage used for conservation purposes or intended to be or considered to have been left unplanted under any program administered by USDA, including the Conservation Reserve and Wetland Reserve Programs.

§ 1437.202 Determining payments for prevented planting.

(a) Subject to limitations, availability of funds, and specific provisions dealing with specific crops, a payment for prevented planting will be determined by:

(1) Multiplying the producer's total eligible acreage intended for planting to the eligible crop by the producer's share;

(2) Multiplying the product of paragraph (a)(1) of this section by 65 percent;

(3) Subtracting the total acres planted from the product of paragraph (a)(2) of this section;

(4) Multiplying the product of paragraph (a)(3) of this section by 50 percent of the producer's approved yield;

(5) Multiplying the product of paragraph (a)(4) of this section by the final payment price for the producer's crop as calculated by the agency under § 1437.11.

(b) Yields for purposes of paragraph (a) of this section shall be calculated in the same manner as for low-yield claims.

§§ 1437.203–1437.300 [Reserved]

Subpart D—Determining Coverage Using Value

§ 1437.301 Value loss.

(a) Special provisions are required to assess losses and calculate assistance for a few crops and commodities which do not lend themselves to yield loss situations. Assistance for these commodities is calculated based on the loss of value at the time of disaster. The agency shall determine which crops shall be treated as value-loss crops, but unless otherwise announced, such crops shall be limited to those identified in §§ 1437.303 through 1437.309 as value loss crops. Lost productions of value loss crops shall be compensable only under this subpart.

VOL
67
ISS
53
MR
19
2002
UMI

(b) The crop year for all value loss crops is October 1 through September 30.

(c) Producers must file an application for coverage in accordance with § 1437.6, and must:

(1) Provide a report of the crop, commodity, and facility to CCC for the acreage or facility, in a form prescribed by CCC, no later than the beginning of the crop year.

(2) Maintain a verifiable inventory of the eligible crop throughout the crop year; and

(3) Provide an accurate accounting of the inventory, as required by CCC.

§ 1437.302 Determining payments.

Subject to all restrictions and the availability of funds, value loss payments for qualifying losses will be determined by:

(a) Multiplying the field market value of the crop before the disaster by 50 percent;

(b) Subtracting the sum of the field market value after the disaster and value of ineligible causes of loss from the result from paragraph (a)(1) of this section;

(c) Multiplying the result from paragraph (a)(2) of this section by the producer's share;

(d) Multiplying the result from paragraph (a)(3) of this section by 55 percent plus whatever factor deemed appropriate to reflect savings from non-harvesting of the damaged crop or other factors as appropriate;

(e) Multiplying the salvage value by the producer's share;

(f) Subtracting the result from paragraph (a)(5) of this section from the result from paragraph (a)(4) of this section.

§ 1437.303 Aquaculture, including ornamental fish.

(a) Aquaculture is a value loss crop and is compensable only in accord with restrictions set in this section. Eligible aquacultural species shall only include:

(1) Any species of aquatic organisms grown as food for human consumption as determined by CCC.

(2) Fish raised as feed for other fish that are consumed by humans; and

(3) Ornamental fish propagated and reared in an aquatic medium.

(b) The aquacultural facility must be:

(1) A commercial enterprise on private property;

(2) Owned or leased by the producer, with readily identifiable boundaries; and

(3) Managed and maintained using good aquacultural growing practices.

(c) Producers must:

(1) Ensure adequate and proper flood prevention, growing medium, fertilization or feeding, irrigation and water quality, predator control, and disease control; and

(2) Have control of the waterbed.

(d) Eligible aquacultural species must be:

(1) Placed in the facility and not be indigenous to the facility; and

(2) Kept in a controlled environment; and

(3) Planted or seeded in containers, wire baskets, net pens, or similar device designed for the protection and containment of the seeded aquacultural species.

(e) In the crop year in which a notice of loss is filed, producers may be required, at the discretion of CCC, to provide evidence that the aquacultural species are produced in a facility in accordance with paragraphs (b), (c) and (d) of this section.

§ 1437.304 Floriculture.

(a) Floriculture, except for seed crops as specified in paragraph (d) of this section, is a value loss crop and is compensable only in accord with restrictions set in this section. Eligible floriculture shall be limited to commercial production of:

(1) Field-grown flowers, including flowers grown in containers or other growing medium maintained in a field setting according to industry standards, as determined by CCC; and

(2) Tubers and bulbs, for use as propagation stock of eligible floriculture plants; and

(3) Seed for propagation of eligible floriculture plants.

(b) Floriculture does not include flowering plants indigenous to the location of the floriculture facility or acreage.

(c) Eligible floriculture must be grown in a region or controlled environment conducive to the successful production of flowers, tubers, and bulbs, as determined by CCC.

(d) Claims on losses on the production of flower seed for propagation of eligible floriculture plants will not be treated under "value loss" rules, but under the rules for normal production low yield crops under subpart B of this part.

(e) The facility or acreage for eligible floriculture must be managed and maintained using good floriculture growing practices. At a minimum, producers are responsible for providing a controlled environment and must ensure adequate and proper fertilization, irrigation, weed control, insect and disease control, and rodent and wildlife control.

(f) In the crop year in which a notice of loss is filed, producers may be required, at the discretion of CCC, to provide evidence the floriculture is produced in accordance with paragraph (e) of this section.

(g) Flowers having any dollar value shall be counted as having full value for loss calculations. Damaged plants that are determined able to rejuvenate or determined to be merely stunted shall be counted as worth full value.

§ 1437.305 Ornamental nursery.

(a) Eligible ornamental nursery stock is a value loss crop and is compensable only in accord with restrictions set out in this section. Eligible ornamental nursery stock is limited to field-grown and containerized decorative plants grown in a controlled environment for commercial sale.

(b) The property upon which the nursery stock is located must be owned or leased by the producer.

(c) The eligible nursery stock must be placed in the ornamental nursery facility and not be indigenous to the facility.

(d) The facility must be managed and cared for using good nursery growing practices for the geographical region. At a minimum producers must provide a controlled environment and ensure adequate and proper flood prevention, growing medium, fertilization, irrigation, insect and disease control, weed control, rodent and wildlife control, and over-winterization storage facilities.

(e) An ornamental plant having any value as an ornamental plant, or a damaged ornamental plant that may rejuvenate and re-establish value as a ornamental plant, shall be considered as worth full value based on the age or size of the plant at the time of disaster.

(f) In the crop year in which a notice of loss is filed, producers may be required, at the discretion of CCC, to provide evidence the ornamental nursery is maintained in accordance with this section.

§ 1437.306 Christmas tree crops.

(a) A Christmas tree is a value loss crop and may generate a claim for benefits under this part only if the tree was grown exclusively for commercial use as a Christmas tree, and only if other requirements of this section are met.

(b) The unit of measure for all Christmas tree crops is a plant.

(c) A Christmas tree having any value as a Christmas tree, or a damaged Christmas tree that may rejuvenate and re-establish value as a Christmas tree, shall be considered as worth full value based on the age of the tree at the time of disaster.

§ 1437.307 Mushrooms.

(a) Eligible mushrooms is a value loss crop and is only compensable in accord with the restrictions of this section. To be eligible, the mushrooms must be grown as a commercial crop in a facility with a controlled environment utilizing good mushroom growing practices. The facility must be located on private property either owned or leased by the producer.

(b) The controlled environment for eligible mushrooms must include primary and backup systems for:

(1) Temperature and humidity controls;

(2) Proper and adequate lighting; and

(3) Positive air pressurization and filtration.

(c) The growing medium must consist of a substrate (a habitat and nutrient base) sterilized by heat treatment.

(d) Good mushroom growing practices must be used, and they consist of proper and adequate insect and disease control and the maintenance of a sterile environment. Maintaining a sterile environment includes at a minimum:

(1) Adequate hygiene;

(2) Overall cleanliness;

(3) Isolation or minimum contact procedures;

(4) Use of footpaths; and

(5) Availability and frequent utilization of wash-down facilities.

(e) In the crop year in which a notice of loss is filed, producers may be required, at the discretion of CCC, to provide evidence the mushrooms are maintained in accordance with this section.

§ 1437.308 Ginseng.

(a) Ginseng is a value loss crop and is compensable only as allowed in this section. Ginseng is eligible only if:

(1) The ginseng includes stratified seeds for use as propagation stock in a commercial ginseng operation or rootlet for commercial sale that are grown in a controlled, cultivatable environment on private property either owned or leased by the producer; and

(2) The ginseng is grown using good ginseng growing practices with all plant needs supplied and under control of the producer;

(b) Ginseng will not be eligible to generate benefits under this part if it:

(1) Is indigenous to the facility;

(2) Is grown solely for medicinal purposes; and

(3) Includes wild ginseng rootlet that is harvested and transplanted from woodland grown ginseng.

(c) Good ginseng growing practices must be followed, and include, but are not limited to:

(1) Adequate drainage;

(2) Proper and adequate shade;

(3) Accurate pH level;

(4) Adequate and timely fertilization, including an adequate supply to ensure nutrient reserves to the ginseng plants and customary application equipment;

(5) Adequate pest control, including but not limited to, weed, rodent, and wildlife control; and

(6) Disease control.

(d) Ginseng producers must:

(1) Provide a report of inventory of all ginseng, as determined by CCC;

(2) Provide production and sales records necessary to determine the value of eligible ginseng;

(3) Allow a CCC-certified loss adjustor to verify loss, including physically removing representative samples;

(4) Maintain and provide, as determined by CCC, adequate records of fertilization, and pest and disease controls used or put into place during the crop year; and

(5) Possess a valid food processing licence issued by the applicable State Department of Agriculture or equivalent and subject to food regulations administered by the Food and Drug Administration.

(e) In the crop year in which a notice of loss is filed, producers may be required, at the discretion of CCC, to provide evidence the ginseng was produced in accordance with this section.

§ 1437.309 Turfgrass sod.

(a) Turfgrass sod is a value loss crop and is the upper stratum of soil bound by mature grass and plant roots into a thick mat produced in commercial quantities for sale.

(b) Specific species, types or varieties of grass intended for turfgrass sod will be considered a separate crop without regard to other intended uses.

(c) The unit of measure for all turfgrass sod shall be a square yard.

(d) Turfgrass sod having any value shall be considered as worth full value.

(e) In addition to the records required in § 1437.7, producers seeking payment must provide information to CCC regarding the average number of square yards per acre and all unharvested areas.

§§ 1437.310–1437.400 [Reserved]

Subpart E—Determining Coverage of Forage Intended for Animal Consumption

§ 1437.401 Forage.

(a) Forage eligible to generate benefits under this part is limited to vegetation produced for animal consumption in a commercial operation using acceptable farming, pasture and range management practices for the location necessary to sustain sufficient quality and quantity of the vegetation so as to be suitable for grazing livestock or mechanical harvest. Forage to be mechanically harvested shall be treated under the rules for low-yield crops as calculated under § 1437.103. Claims on forage for grazing benefits will, contrariwise, be determined under this subpart. However, the provisions in this subpart shall govern for all claims including forage for mechanical harvest.

(b) Producers of forage must, in addition to the records required in § 1437.7, specify the intended method of harvest of all acreage intended as forage for livestock consumption as either mechanically or grazed.

(c) Producers must, in the administrative FSA office for the unit, request an appraisal prior to the onset of grazing of any intended mechanically harvested forage acreage that will be both mechanically harvested and grazed.

(d) Forage acreage reported to FSA as intended to be mechanically harvested which is subsequently completely grazed will be considered for crop definition purposes as mechanically harvested. Expected production of the specific acreage will be calculated on the basis of carrying capacity.

(e) Small grain forage is the specific acreage of wheat, barley, oats, triticale, or rye intended for use as forage. Small grain forage shall be considered separate crops and distinct from any other forage commodities and other intended uses of the small grain commodity. In addition to the records required in § 1437.7 producers must specify whether the intended forage crop is intended for fall/winter, spring, or total season forage. In addition to other eligibility requirements, CCC will consider other factors, such as, water sources and available fencing, and adequate fertilization to determine small grain forage eligibility, yields, and production.

(f) CCC will establish forage losses of acreage intended to be grazed on the basis of:

(1) For improved pasture, as determined by CCC, a similar percentage of loss of mechanically harvested forage acreage on the farm, or similar farms in the area; or

(2) For native pasture, as determined by CCC, the percentage of loss as determined by two independent assessments of pasture conditions.

§ 1437.402 Carrying capacity.

(a) CCC will establish a carrying capacity for all grazed forage present in the county for purposes of

VOL
67
ISS
53
MR
19
2002
UMI

administering this program and to that end:

(1) Multiple carrying capacities may be determined for a specific vegetation if factors, such as soil type, elevation, and topography, result in a significant difference of carrying capacity within the county.

(2) CCC may establish separate carrying capacities for irrigated and non-irrigated forage acreage when acreage of traditionally irrigated forage (forage actually irrigated 3 of the last 5 crop years) is present in the county.

(b) Producers may provide evidence that unit forage management and maintenance practices are improvements over those practices generally associated with the established carrying capacity. Based on this evidence, CCC may adjust the expected AUD for the specific forage acreage upward for the crop year NAP assistance is requested by:

(1) Three percent when at least 1 practice was completed at least 1 time in the previous 5 crop years and such practice can be expected to have a positive impact on the forage's carrying capacity in the crop year NAP assistance is requested;

(2) Five percent when 2 or more practices were completed at least 1 time in the previous 5 crop years and such practices can be expected to have a positive impact on the forage's carrying capacity in the crop year NAP assistance is requested; and

(3) Greater than 5 percent when producers provide acceptable records, as determined by CCC, of higher forage production or an increase in animal units supported on the specific forage acreage in 3 of the 5 crop years immediately before the crop year NAP assistance is requested.

§ 1437.403 Determining payments.

Subject to payment limits, availability of funds, and other limits as may apply, payments for losses of forage reported to FSA as intended to be grazed will be determined by:

(a) Multiplying the eligible acreage by the producer's share;

(b) Dividing the result from paragraph (a) of this section by the carrying capacity or adjusted per day carrying capacity established for the specific acreage, as determined by CCC;

(c) Multiplying the result from paragraph (b) of this section by the number of days established as the grazing period;

(d) Adding adjustments of AUD for practices and production to the product of paragraph (c) of this section;

(e) Multiplying the result from paragraph (d) of this section by the applicable percentage of loss established by CCC;

(f) Multiplying the amount of AUD lost to other causes, as determined by CCC, by the producer's share;

(g) Subtracting the result from paragraph (f) of this section from the result from paragraph (e) of this section;

(h) Multiplying the result from paragraph (d) of this section by 0.50;

(i) Subtracting the result from paragraph (h) of this section from the result from paragraph (g) of this section; and

(j) Multiplying the result from paragraph (i) of this section by the AUD value established in accordance with § 1437.11, and then by 55 percent.

§ 1437.404 Information collection requirements under the Paperwork Reduction Act; OMB control number.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control number for the regulation in this part is 0560–0175.

Signed at Washington, DC, on March 8, 2002.

James R. Little,

Executive Vice President, Commodity Credit Corporation.

Farm Loan Programs Account Servicing Policies—Servicing Shared Appreciation Agreements

AGENCY: Farm Service Agency, USDA.

ACTION: Correcting amendment.

SUMMARY: On August 18, 2000, the Farm Service Agency (FSA) published a final rule at 65 FR 50401–50405, which reduced the term of future Shared Appreciation Agreements (SAA), lowered the interest rate on amortized SAA recapture, and deducted the value of certain capital improvements from the shared appreciation recapture calculation. This document contains a correction to the final rule.

DATES: Effective March 19, 2002.

FOR FURTHER INFORMATION CONTACT: Michael Cumpton, telephone (202) 690–4014; electronic mail: *mike_cumpton@wdc.usda.gov.*

SUPPLEMENTARY INFORMATION: FSA published a final rule in the **Federal Register** on August 18, 2000, (65 FR 50401–50405) amending 7 CFR part 1951. The final rule revised 7 CFR 1951.914 to reduce the term of all future SAAs from 10 years to 5 years. However, a conforming revision to Exhibit A, Attachment 1 was omitted inadvertently. This document corrects the inconsistency between 7 CFR 1951.914 and Exhibit A, Attachment 1. In addition, the authority citation is being revised to add a reference previously omitted.

List of Subjects in 7 CFR Part 1951

Account servicing, Credit, Debt restructuring, Loan programs-Agriculture, Loan programs-Housing and community development

Accordingly, 7 CFR part 1951 is corrected by making the following correcting amendments:

PART 1951—SERVICING AND COLLECTIONS

1. The authority citation for part 1951 is revised to read as follows:

Authority: 5 U.S.C. 301; 7 U.S.C. 1932 Note; 7 U.S.C. 1989; 31 U.S.C. 3716; 42 U.S.C. 1480

Subpart S—Farm Loan Programs Account Servicing Policies

2. Revise Exhibit A, Attachment 1, Section II, paragraph entitled "Conditions of the New Agreement if You Qualify" to read as follows:

Exhibit A—Notice of the Availability of Loan Servicing and Debt Settlement Programs for Delinquent Farm Borrowers

* * * * *

Conditions of the New Agreement if You Qualify

You must sign a shared appreciation agreement for 5 years. Under the terms of the agreement:

(1) You must repay a part of the sum written down.

(2) The amount you must repay depends on how much your real estate collateral increases in value.

During the 5 years, FSA will ask you to repay part of the debt written down if you do one of the following:

(1) Sell or convey the real estate;

(2) Stop farming; or

(3) Pay off the entire debt

If you do not do one of these things during the 5 years, FSA will ask you to repay part of the debt written down at the end of the 5 year period.

FSA can only ask you to repay if the value of your real estate collateral goes up.

If either 1, 2, or 3 above occurs in the first four years of the agreement, FSA will ask you to pay 75 percent of the increase in value of the real estate. In the last year, you will be asked to pay only 50 percent of the increase in value. FSA will not ask you to pay more than the amount of the debt written down.

Signed in Washington, DC, on March 1, 2002.

J.B. Penn,

Under Secretary for Farm and Foreign Agricultural Services.

[FR Doc. 02–6210 Filed 3–18–02; 8:45 am]

BILLING CODE 3410–05–P

NATIONAL CREDIT UNION ADMINISTRATION

12 CFR Parts 702 and 741

Prompt Corrective Action; Requirements For Insurance

AGENCY: National Credit Union Administration (NCUA)

ACTION: Final rule.

SUMMARY: NCUA is revising its rule concerning financial and statistical reports to require all federally-insured credit unions to file quarterly Financial and Statistical Reports with NCUA. Currently, only federally-insured credit unions with assets over $50 million must file these reports quarterly. All other federally-insured credit unions are required to file these reports semi-annually. The final amendment is a necessary component of NCUA's examination program that will use a risk-focused approach to examinations and extend the examination cycle for credit unions that meet certain criteria. In conjunction with this change, we are making two conforming changes to NCUA's prompt corrective action rule.

DATES: This rule is effective July 1, 2002.

FOR FURTHER INFORMATION CONTACT: Peter Majka, Data Analysis Officer, Office of Examination and Insurance, 1775 Duke Street, Alexandria, VA 22314, or telephone (703) 518–6540.

SUPPLEMENTARY INFORMATION:

Background

On July 26, 2001, the NCUA Board requested comment on a proposed change to § 741.6(a), the provision governing the filing of quarterly Financial and Statistical Reports, also known as call reports or 5300 Reports. 66 FR 40642 (August 3, 2001). In conjunction with this change, the NCUA Board proposed revising its prompt corrective action rule to eliminate the requirement of written notice to NCUA of net worth changes and the option of filing a call report for the first and third quarter for credit unions that file call reports semi-annually. 12 CFR part 702.

NCUA received 65 comments regarding the proposed changes from 34 federal credit unions, 14 federally-insured state chartered credit unions, one non-federally-insured state chartered credit union, one unidentified credit union, one individual, nine credit union leagues, three credit union trade associations, one bank trade association, and one state supervisory authority (SSA).

Summary of Comments

Quarterly Call Reports

Forty-four of the commenters generally supported the revision to § 741.6(a), of which 11 agreed with one or more conditions stipulated. Twenty-one commenters objected to the proposed change. Overall, many of the commenters expressed concern regarding the additional burden quarterly reporting would place on credit unions, especially smaller credit unions. Several commenters provided suggestions for reducing the additional burden.

The 33 commenters that supported the changes without qualification believed the proposal would: (1) Result in an offsetting time savings for credit unions through the Risk Based Examination Scheduling Program; (2) help NCUA and the SSAs to identify emerging problems in a timely manner; and, (3) permit NCUA and the SSAs to concentrate their supervisory resources on those credit unions that represent a risk.

Negative and qualified commenters expressed concern with the additional time and resource burden on credit unions. Thirty of the commenters are particularly concerned with the effect on small credit unions. Seven commenters noted that smaller credit unions have to work harder to compete. They noted that smaller credit unions usually have a limited number of staff members and believe the limited resources of smaller credit unions could be better used to increase assets and services.

Ten commenters generally did not believe it was necessary for credit unions rated a CAMEL Code 1 and 2 to file quarterly call reports. Several of the commenters did not believe a credit union's financial condition would deteriorate in a 3 to 6 months time frame. Two commenters noted that the burden of completing two more call reports was more detrimental than having a yearly examination; one of which believed examiners and auditors were effective in correcting problems and providing guidance. Four of the commenters suggested that CAMEL Code 1 and 2 credit unions and those credit unions with a long-term trend of stability that have been in existence for more than a few years should be required to file call reports on a semi-annual basis. Three commenters who opposed the proposal noted that the proposed rule will result in the additional collection of information for a small percentage of the industry's credit union assets and therefore is not necessary.

The NCUA Board believes the requirement for filing quarterly call reports is a key element in implementing the Risk Based Examination Scheduling and Risk Focused Examination programs. CAMEL Code 1 and 2 credit unions, no matter the asset size, could be eligible for deferral under the Risk Based Examination Program for one examination cycle. Quarterly filing enhances NCUA's ability to allocate its resources effectively and focus its supervisory efforts on risk regardless of a credit union's asset size. NCUA's 2002 operating budget included a reduction of approximately 33 full-time equivalent staff positions. The deferral of examinations for approximately 1,500 federal credit union with assets under $50 million and the implementation of the Risk Based Examination Scheduling Program were contributing factors to the budgeted staff reductions. In addition, quarterly call reports also provide credit unions, the SSAs, and NCUA with the ability to monitor trends and expeditiously address emerging concerns in an ever-changing economic environment. Overall, the NCUA Board believes the benefits and efficiencies derived from the Risk Based Examination Scheduling and Risk Focused Examination programs outweigh the burden of two additional call reports.

Several commenters believe the proposal places a burden on state-chartered credit unions without providing a corresponding benefit. They noted that the state regulator sets their exam cycle and that this rule may have no effect on their examination cycle or their supervisory fees. Two additional commenters stated that the additional call reports would put a strain on the SSAs' supervisory resources. They urge NCUA to be sensitive to the SSAs' budgetary restraints and work with the

UMI

SSAs to implement quarterly reporting in a manner compatible with their budgetary processes.

Many SSAs are reviewing the possibility of including NCUA's Risk Based Examination Scheduling and Risk Focused Examination programs in their supervisory programs. The NCUA Board believes a key benefit of the Risk Based Examination Scheduling Program is the ability to delay examinations for one examination cycle for the well-run, financially strong credit unions. The program, if adopted by the SSAs, should assist the SSAs in focusing their supervisory resources on areas of risk regardless of the credit unions' asset size.

In addition, as manager of the NCUSIF, NCUA needs quarterly financial information from all federally-insured credit unions in order to assess risk to the NCUSIF on a timely and ongoing basis.

Currently, seven state regulators require quarterly call reports and some state regulators have NCUA process their credit unions' call reports. Each SSA could contact their respective Regional Director for assistance, if needed, in gathering and uploading the call reports. NCUA will continue to remain sensitive to the SSA's budgetary restraints. As noted previously, the NCUA Board, primarily through its adoption of the Risk Based Examination Scheduling Program, has been able to reduce its staffing needs by approximately 33 full-time equivalent positions.

One commenter did not believe that the benefit the Central Liquidity Facility (CLF) would receive from more frequent reporting justifies the implementation of quarterly call reports due to the CLF's loan volume. The NCUA Board noted in the proposal that the CLF would have the most recent financial information to help evaluate a credit union's CLF loan request. The NCUA Board did not consider this a primary reason for proposing quarterly call reports. The Board recognizes that the CLF's loan volume is low. However, the CLF's main purpose is to provide emergency liquidity to the credit union system as quickly as possible when other traditional liquidity sources are unavailable. The Board believes quarterly call reports will expedite the loan evaluation process. The ability to quickly provide liquidity under emergency circumstances benefits all credit unions.

Twenty-five commenters suggested NCUA develop a shorter version of the call report for credit unions. Most of the commenters recommended that credit unions with various asset thresholds ranging from under $500,000 to $50 million be permitted to file a short version of the call report. Two commenters in support of an abbreviated form for smaller credit unions suggested that, if a more complex version is needed during the 5300 process, NCUA could e-mail or FAX a copy to the credit unions. Seven commenters suggested requiring an abbreviated version of the 5300 for the first and third quarters.

Four commenters opposed the development of a short version of the call report. One or more of these commenters stated: (1) A short version would not provide timely and complete information for identifying emerging trends; (2) a short version is unnecessary; and (3) only one format should exist in order to avoid confusion and the need for NCUA to provide follow-up for additional information.

Several years ago, NCUA redesigned the call report with small credit unions in mind. NCUA developed a core call report, with supporting schedules that provided more detail if required. The NCUA Board remains sensitive to this issue. Upon further review and the comments received, the NCUA Board has decided to develop a short form 5300 that does not compromise NCUA's and the SSAs' ability to provide adequate supervision. Credit unions with assets of less than $10 million will be required to file the complete version of the Form 5300 for the second and the fourth quarters of the year and may file either the short version or the long version of the 5300 for the first and third quarters of the year.

Five commenters emphasized the need to minimize the frequency of changes to the call report format. One commenter suggested that the call report be color coded to provide guidance to credit unions in preparing those sections of the call report that apply to their operations.

The NCUA Board remains committed to requiring the minimum information needed to provide adequate supervision. The Board believes NCUA has a process that works to assure unnecessary information is not requested on the call report. NCUA's 5300 Working Group, which includes an SSA representative, generally reviews changes to the call report once a year. However, changes may need to be made more frequently due to regulatory changes. Before implementation, any recommended changes go through a review process that considers the burden a change would place on credit unions versus the benefit to be gained.

Several commenters made suggestions regarding the use of technology. One commenter stated that quarterly call reporting would not be a burden to credit unions if their data systems were automated and suggested that NCUA and the credit union industry provide support to unautomated filers such as discounts to purchase personal computers. With this support, NCUA should establish a timetable to discontinue manual remittance of the call report. The NCUA Board does not believe it is necessary to impose upon credit unions a requirement to file electronic versions of the call report. During the June 30, 2001, call report cycle, 9,686 federally-insured credit unions, out of 10,415, filed their call reports using the PC 5300 automated system. Credit unions need to evolve towards understanding the benefits and responsibilities associated with using automated data systems within the scope of their operations. Furthermore, the Board believes it would be more appropriate for another party, such as a credit union trade association, to seek discounts on the purchase of computers for credit unions.

Two commenters suggested that NCUA alleviate the burden of submitting call reports by initiating uploads of call reports to its database. Currently, NCUA offers credit unions the ability to e-mail an electronic version of their completed call report to their examiner or SSA for uploading. NCUA staff plans to develop improved methods for filing call reports as NCUA's technological capabilities improve.

One state-chartered credit union commenter suggested the burden for credit unions could be reduced by automating the Reserve Sheet into a schedule versus a separate remittance sheet. The Reserve Sheet is a supplemental schedule required by the credit union's SSA. This suggestion should be provided to the credit union's state examiner for consideration.

One commenter questioned to what extent NCUA's AIRES (Automated Integrated Regulatory Examination System) Program duplicates the call report program. The commenter suggested that an AIRES download be created each quarter and the call report be used simply to fill in information not available through AIRES. The NCUA Board does not believe this is a viable alternative. AIRES only has the capacity to download certain financial information from a credit union's data system. Any download performed would require an examiner to go on-site or receive a diskette that requires an additional download into the call report system. Effective September 1, 2002, an examiner will be able to download the most recent call report information into AIRES for an examination. This will help reduce the amount of time needed for an examiner to be on-site.

One commenter made two suggestions to mitigate the potential financial impact on small credit unions. The first recommendation is that NCUA should work with data processors to develop a standard report format consistent with available software. The NCUA Board believes the credit union industry needs to address this matter with its vendors. NCUA can provide the specifications to the vendors upon their request and has done so in the past.

The second recommendation is that NCUA delay the March 2002 quarterly reporting implementation date until the data processing standard report format previously discussed is complete. NCUA is in the process of developing a shortened version of the 5300 for use during the first and third quarters of the year for credit unions with assets of less than $10 million. This short form will not be available until the September 2002 reporting cycle, so the NCUA Board is delaying the effective date of the final rule to July 1, 2002.

One commenter suggested that NCUA develop an electronic worksheet to reduce the preparation time. The Board does not believe a worksheet would assist credit unions in preparing the call report. The call report is in an electronic format. The current call report format includes detailed summary schedules regarding various general operational matters for all credit unions. The Board believes credit unions would be best served by requesting their data processing vendors to develop any detailed summary reports of the information they need to complete the call report.

Five commenters made suggestions regarding a phase-in process for NCUA's implementation of the proposal to help alleviate the burden on credit unions not currently required to file quarterly call reports. Two suggested that quarterly reporting should be phased in over two or three years; one of which suggested that NCUA initially consider only those credit unions for the Risk Based Examination Scheduling Program that are currently required to file quarterly call reports. One suggested that credit unions under $50 million in assets have the option of filing on a quarterly basis. In both cases, those credit unions filing on a quarterly basis would be considered for an extended examination cycle. One commenter suggested that the implementation of quarterly reporting should be delayed to allow sufficient time to adjust staff and operations.

Although the Board is delaying effective date of the regulation, the Board does not believe the extensive delays suggested by the commenters are viable options. The suggestions would delay a smooth transition towards the risk-focused approach to supervising credit unions. In addition, the savings currently reflected in NCUA's 2002 operating budget may not be fully realized if the suggestions were adopted.

Three commenters suggested excluding credit unions with assets of $10 million or less from quarterly reporting for five years. After five years, smaller credit unions should have access to electronic record keeping and should be better able to handle the additional record keeping requirements.

The NCUA Board does not agree with these suggestions. The Board notes that a credit union must file a quarterly call report to qualify for a deferred examination under the Risk Based Examination Scheduling Program. Any qualifying credit union would be excluded from receiving the benefit of a delayed examination. Reducing the number of credit unions qualifying for the program would impact the staff reductions projected in NCUA's approved 2002 budget. In addition, quarterly call reports are intended to reveal emerging problems through quarterly trend analysis so any noted concerns can be addressed in an expeditious manner. This applies to all credit unions no matter what their asset size, capital position, or CAMEL Code. As previously explained, in an effort to ease the burden, the NCUA Board will have staff develop a short form 5300 for credit unions with assets of less than $10 million that does not compromise NCUA's and the SSAs ability to provide adequate supervision for use during the first and third quarters of the year.

Two commenters believed that, instead of quarterly reporting, the burden of collecting any needed additional information should be shifted to the regulator. One suggested that more on-site contacts be scheduled; the other suggested that the regulators receive monthly financial statements.

The NCUA Board does not believe these are viable alternatives. These suggestions diminish the economies that will result from implementing the Risk Based Examination Scheduling Program. In all likelihood, NCUA's current projected reduction in staffing levels may not be fully realized if these suggestions were adopted.

Four commenters conditioned their support of the proposal on the implementation of the Risk Based Examination Scheduling Program. Another commenter, who agreed with the proposal, voiced the concern that, once quarterly call reporting was implemented, the Risk Based Examination Scheduling Program may stop and the credit unions would still have to file quarterly call reports. The NCUA Board has adopted the program through the approval of the 2002 NCUA budget. However, quarterly call reporting has benefits other than the potential deferral of examinations over one examination cycle. Quarterly reporting provides both the credit unions and the regulators the ability to timely detect emerging concerns in an ever-changing economic environment. NCUA, in cooperation with the SSAs, reviews call report requirements at least annually and makes adjustments to the reporting requirements after weighing the benefit gained versus the burden that additional reporting places on the credit unions.

Notice of Requirement To Report Under Prompt Corrective Action

Six commenters provided comments regarding the proposed change eliminating the requirement of § 702.101(c) for written notice from a credit union when its net worth decreases. Four of the commenters agreed with the change; two did not agree. The two objecting commenters did so because they objected to the proposed rule as a whole.

The NCUA Board recognizes that the filing of quarterly call reports obviates the need for written notice and it is deleting this requirement from the rule.

Final Change

Based on the comments received, the NCUA Board is modifying the proposed changes to § 741.6(a). The NCUA Board will have staff develop a short form 5300 that may be used by credit unions with assets under $10 million for the first and third quarters of each year. In addition, the NCUA Board will make the final rule's effective date July 1, 2002. This effective date will provide NCUA staff with sufficient time to develop the short version of the 5300 for use during the year 2002's third quarter call report cycle and the first and third quarters' reporting cycles for each year thereafter.

Currently, this section requires all federally-insured credit unions with assets in excess of $50 million to file a quarterly call report with NCUA. All other federally-insured credit unions file semiannually. The final amendment will require all federally-insured credit unions to file quarterly call reports. Credit unions with assets of less than $10 million will be required to file the complete version of the Form 5300 for

VOL
67
ISS
53
MR
19
2002
UMI

the second and the fourth quarters of the year and may file either the short or the complete version of the 5300 for the first and third quarters of the year.

This amendment is a necessary component of NCUA's revised examination program. The revised examination program has two new features. The first is risk-based examination scheduling that will result in an extended examination cycle program for credit unions meeting certain risk criteria. Approximately 1,500 federal credit unions under $50 million will participate in the extended examination cycle program during the 2002 NCUA budget year. Requiring those credit unions to file quarterly call reports is an essential part of their participation. The credit unions' financial condition must be monitored over the examination cycle to identify emerging trends that may impact the safety and soundness of the credit unions' operations.

The second is a risk-focused approach for all examinations. The risk-focused approach will focus the examination process on those operational areas that represent the greatest risk to the credit union. The process includes evaluating the credit union's financial trend information and management's ability to identify and adapt to changing economic, competitive, technological, and other factors.

These two features will permit NCUA to adjust the examination process for a select number of credit unions based on workload demands in relation to available resources and the risk the credit unions represent to the National Credit Union Share Insurance Fund. Both features will result in better use of available resources and reduce the amount of NCUA on-site contact time needed to assess the overall financial health of federally-insured credit unions. Quarterly financial information will provide NCUA the ability to administer these approaches successfully through off-site review of a credit union's financial trends to detect emerging problems.

In conjunction with the change to § 741.6(a), the Board is making a technical correction to § 741.6(b) by deleting the reference to semi-annual reporting and revising the prompt corrective action rule to eliminate the requirement of written notice to NCUA and the option of filing a call report for the first and third quarter for credit unions that file call reports semi-annually. 12 CFR 702.101(c), 702.103(b).

Regulatory Procedures

Paperwork Reduction Act

The NCUA Board has determined that the final rule to require all federally-insured credit unions to file call reports on a quarterly basis is covered under the Paperwork Reduction Act. NCUA submitted a copy of the proposed rule to the Office of Management and Budget (OMB) for its review. The OMB Control Number for the call report is 3133–0004.

The Paperwork Reduction Act of 1995 and OMB regulations require that the public be provided an opportunity to comment on the paperwork requirements, including an agency's estimate of the burden of the paperwork requirements. Although no commenters specifically commented on the paperwork requirements, their comments on the proposed rule indirectly addressed some of the issues.

The NCUA Board estimated in the proposal that it takes a federally-insured credit union six hours on average to complete a call report. The proposal, using the six-hour call report average, estimated the rule would result in an additional 100,272 hours of call report preparation. Sixteen commenters' reported an average of 10 hours to complete a call report. Three of the commenters were credit union trade associations that surveyed their membership. NCUA has determined, based on the comments and its own research that a more accurate average for call report preparation is eight hours. This eight hour average does not take into account the fact that the proposed amendments only apply to credit unions under $50 million. NCUA's research and the comments indicate that the time to prepare a call report decreases with the size of the credit union. In addition, the proposal did not include a short form option for credit unions under $10 million. This will affect 5,864 federally-insured credit unions. Since the final amendments only apply to credit unions under $50 million and a short form is being created for credit unions under $10 million, NCUA concludes that its original net burden estimate may have overestimated the additional hours resulting from the rule change.

Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601–612)(RFA) requires, subject to certain exceptions, that NCUA publish an initial regulatory flexibility analysis (IRFA) with a proposed rule and a final regulatory flexibility analysis (FRFA) with a final rule, unless NCUA certifies that the rule will not have a significant economic impact on a substantial number of small credit unions. For purposes of the Regulatory Flexibility Act, and in accordance with NCUA's authority under 5 U.S.C. 601(4), NCUA has determined that small credit unions are those with less than one million dollars in assets. See 12 CFR § 791.8(a) and NCUA's Interpretive Ruling and Policy Statement, No. 87–2. NCUA's final rule will apply to approximately 1,489 small credit unions, out of 10,316 federally-insured credit unions. Of these 1,489 small credit unions, approximately 55 of the federally-insured state chartered credit unions are already required to file quarterly call reports by their respective SSAs.

At the time of issuance of the proposed rule, NCUA could not make such a determination for certification. Therefore, NCUA issued an IRFA pursuant to section 603 of the Regulatory Flexibility Act. After reviewing the comments submitted in response to the proposed rule, NCUA believes it does not have sufficient information to determine whether the final rule would have a significant economic impact on a substantial number of small credit unions. Therefore, pursuant to section 604 of the Regulatory Flexibility Act, NCUA provides the following FRFA.

The FRFA incorporates NCUA's initial findings, as set forth in its IRFA, addresses the comments submitted in response to the IRFA, and describes the steps NCUA plans to take to minimize the impact on small entities. Currently, all federally-insured credit unions, no matter their asset size, are required to file call reports semi-annually. The current call report contains explicit instructions for completing the report. NCUA will continue this practice for the two additional call reports required from credit unions with assets under $50 million. We believe the instructions meet the requirement to provide guidance to small credit unions in complying with this rule, under Section 212 of the Small Business Regulatory Enforcement Fairness Act of 1996 (P.L. 104–121).

1. Statement of Need

The final amendment will provide NCUA and the SSAs with timely and complete financial data to be used in supervising their credit unions as discussed in the Final Change section above. The adoption of the final amendment to § 741.6(a) of the NCUA's regulations will account for all of the economic impact on small credit unions.

2. Statement of Objectives and Legal Basis

The Final Change section above contains this information. The legal basis for the final rule is in the Federal Credit Union Act. 12 U.S.C. 1756 and 1782.

3. Burdens and Cost Upon Small Credit Unions with the Adoption of this Rule

In general, the commenters were concerned with the additional time and resource burden that would be placed on credit unions if the amendment to the rule were adopted. Thirty of the commenters were specifically concerned with the burden that would be placed on small credit unions. Seven of the commenters noted that smaller credit unions have a limited number of staff members. Several commenters provided various opinions as to what credit union asset size they considered as "small". The asset sizes noted varied within the range of less than $500,000 to less than $50 million in assets.

As noted previously, the combined credit union surveys calculated eight hours as the average for all credit unions to complete a call report. For credit unions with assets of $10 million or less, the average time was five hours. One credit union league commenter surveyed mostly small credit unions. The league reported six hours as the average time to complete a call report. We could not determine from the comments provided the average hours calculation for credit unions with assets less than one million dollars. However, NCUA calculated three hours as the average for credit unions with assets less than two million dollars based on its own research. The commenters did not provide any specific dollar cost estimates associated with quarterly call reporting.

4. Discussion of Significant Alternatives To Alleviate Burden

In the proposal, NCUA considered the following alternative approaches in reducing the burden on smaller credit unions:

a. Federally-Insured Credit Unions With Assets Less Than $10 Million

NCUA considered revising the regulation to require only federally-insured credit unions with assets greater than $10 million to file quarterly call reports. This alternative was not pursued due to the changes in NCUA's examination program. Although the NCUA Board has not been persuaded to change its original determination, as discussed below, the Board has made some adjustments to the requirements to reduce the burden on these credit unions. The NCUA Board has adopted the new examination program through its approval of NCUA's 2002 Budget. Approximately 950 federal credit unions with assets less than $10 million have been considered in NCUA's 2002 Budget for examination deferral under the Risk Based Examination Scheduling Program. Of these 950 federal credit unions, approximately 120 have assets less than one million dollars. The program permits deferral of an examination for every other examination cycle. The NCUA Board believes quarterly reporting is necessary to monitor the credit union's financial trends during the deferral period. The NCUA Board believes the burden of the additional hours it takes a credit union to prepare two additional call reports is outweighed by the advantages outlined in the Final Change section.

b. 5300 Short Form

NCUA originally considered the alternative of requiring a credit union with assets of less than $10 million to file a short version of the call report during the March and September cycles. The short form would reduce the burden for those credit unions. The NCUA Board was initially concerned that this alternative may result in insufficient trend information when compared to the full semi-annual call report. However, upon further review and the comments received, the NCUA Board will have staff develop a short form 5300 that does not compromise NCUA's and the SSAs' ability to provide adequate supervision for use during the first and third quarters of the year.

5. Proposed Reporting, Record Keeping, and Other Compliance Requirements

The information collection requirements imposed by the final rule are discussed above in the section on the Paperwork Reduction Act.

6. General Requirements

The proposed rule will require all federally-insured credit unions to file quarterly call reports. The call reports are based on financial and other information relevant to a federally-insured credit union's operations. Federally-insured credit unions with assets of $50 million or more are already required to file quarterly reports. A final short version of the call report will be developed for credit unions with assets of $10 million or less. Staff anticipates the short form will be available for September 2002 call report cycle. Credit unions meeting the asset size requirements will be permitted to use the short form during the first and third quarters of each year.

Requiring quarterly call reports is a sound business practice that would provide: (1) A more cost effective supervisory effort when coupled with NCUA's proposed examination approaches; and (2) a quarterly operational monitoring tool for the credit unions.

7. Identification of Duplicative, Overlapping, or Conflicting Federal Rules.

NCUA is unable to identify any federal statutes or rules that duplicate, overlap or conflict with the proposed rule; however, NCUA has identified seven states that already require their state-chartered federally-insured credit unions to file quarterly call reports. Although the final rule duplicates those state's requirements, it does not impose any significant, additional burden on those federally-insured credit unions.

Executive Order 13132

Executive Order 13132 encourages independent regulatory agencies to consider the impact of their regulatory actions on state and local interests. In adherence to fundamental federalism principles, NCUA, an independent regulatory agency as defined in 44 U.S.C. 3502(5), voluntary complies with the executive order. The final rule will not have substantial direct effect on the states, on the relationship between the national government and states, or on the distribution of power and responsibilities among the various levels of government. NCUA has determined the proposed rule does not constitute a policy that has federalism implications for purposes of the executive order.

Small Business Regulatory Enforcement Fairness Act

The Small Business Regulatory Enforcement Fairness Act (SBREFA) of 1996 (Pub. L. 104–121) provides generally for congressional review of agency rules. A reporting requirement is triggered in instances where NCUA issues a final rule as defined by Section 551 of the Administrative Procedures Act. 5 U.S.C. 551. The Office of Management and Budget has determined that, for purposes of SBREFA, this is not a major rule.

Treasury and General Government Appropriations Act, 1999

NCUA has determined that the final rule will not affect family well-being within the meaning of section 654 of the Treasury and General Appropriations Act, 1999, Pub. L. 105–277, 112 Stat. 2681 (1998).

Agency Regulatory Goal

NCUA's goal is clear, understandable regulations that impose minimal regulatory burdens. The regulatory change is understandable and imposes minimal regulatory burden. NCUA requested comments on whether the proposed rule change was understandable and minimally intrusive if implemented as proposed. No comments were received.

List of Subjects

12 CFR Part 702

Credit unions, Reporting and record keeping requirements.

12 CFR Part 741

Bank deposit insurance, Credit unions.

By the National Credit Union Administration Board on March 13, 2002.

Becky Baker,

Secretary of the Board.

Accordingly, NCUA is amending 12 CFR parts 702 and 741 as follows:

PART 702—PROMPT CORRECTIVE ACTION

1. The authority citation for part 702 continues to read as follows:

Authority: 12 U.S.C. 1766(a), 1790(d).

2. Amend § 702.101 by revising paragraph (c) to read as follows:

§ 702.101 Measures and effective date of net worth classification.

* * * * *

(c) *Notice by credit union of change in net worth category.* (1) When filing a Call Report, a federally-insured credit union need not otherwise notify the NCUA Board of a change in its net worth ratio that places the credit union in a lower net worth category; and

(2) Failure to timely file a Call Report as required under this section in no way alters the effective date of a change in net worth classification under this paragraph (b) of this section, or the affected credit union's corresponding legal obligations under this part.

3. Amend § 702.103 by removing and reserving paragraph (b).

PART 741—REQUIREMENTS FOR INSURANCE

4. The authority citation for part 741 continues to read as follows:

Authority: 12 U.S.C. 1757, 1766(a), and 1781–1790; Pub. L. 101–73.

5. Amend § 741.6 by revising paragraph (a) and removing the words "or semiannually" from paragraph (b) to read as follows:

§ 741.6 Financial and statistical and other reports.

(a) Each operating insured credit union must file with the NCUA a quarterly Financial and Statistical Report on or before January 22 (as of the previous December 31), April 22 (as of the previous March 31), July 22 (as of the previous June 30), and October 22 (as of the previous September 30) of each year. Insured credit unions with assets of $10 million or greater must file all quarterly reports on Form NCUA 5300. Insured credit unions with assets of less than $10 million must file their first (due April 22) and third (due October 22) quarter reports on Form NCUA 5300SF or Form NCUA 5300 and their second (due July 22) and fourth (due January 22) quarter reports on Form NCUA 5300.

(b) *Consistency with GAAP.* The accounts of financial statements and reports required to be filed quarterly under paragraph (a) of this section must reflect GAAP if the credit union has assets of $10 million or greater, but may reflect regulatory accounting principles other than GAAP if the credit union has total assets of less than $10 million (except that a federally-insured state-chartered credit union may be required by its state credit union supervisor to follow GAAP regardless of asset size).

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 2002–NM–32–AD; Amendment 39–12678; AD 2002–06–02]

RIN 2120–AA64

Airworthiness Directives; Boeing Model 747 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule; request for comments.

SUMMARY: This amendment adopts a new airworthiness directive (AD) that is applicable to all Boeing Model 747 series airplanes. This action requires repetitive inspections for cracking of the upper skin of the horizontal stabilizer center section and the rear spar upper chord, and repair, if necessary. This action is necessary to find and fix such cracking, which could lead to reduced structural capability of the horizontal stabilizer center section, and result in loss of controllability of the airplane. This action is intended to address the identified unsafe condition.

DATES: Effective April 3, 2002.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of April 3, 2002.

Comments for inclusion in the Rules Docket must be received on or before May 20, 2002.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Transport Airplane Directorate, ANM–114, Attention: Rules Docket No. 2002–NM–32–AD, 1601 Lind Avenue, SW., Renton, Washington 98055–4056. Comments may be inspected at this location between 9 a.m. and 3 p.m., Monday through Friday, except Federal holidays. Comments may be submitted via fax to (425) 227–1232. Comments may also be sent via the Internet using the following address: *9-anm-iarcomment@faa.gov*. Comments sent via fax or the Internet must contain "Docket No. 2002–NM–32–AD" in the subject line and need not be submitted in triplicate. Comments sent via the Internet as attached electronic files must be formatted in Microsoft Word 97 for Windows or ASCII text.

The service information referenced in this AD may be obtained from Boeing Commercial Airplane Group, P.O. Box 3707, Seattle, Washington 98124–2207. This information may be examined at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Tamara Anderson, Aerospace Engineer, Airframe Branch, ANM–120S, FAA, Seattle Aircraft Certification Office, 1601 Lind Avenue, SW., Renton, Washington 98055–4056; telephone (425) 227–2771; fax (425) 227–1181.

SUPPLEMENTARY INFORMATION: The FAA has received a report that a 3.5-inch crack was found in the upper skin of the horizontal stabilizer center section on a Boeing Model 747SR series airplane. The crack ran forward from the rear spar at left buttock line (LBL) 37.8. While the area where the crack was found is subject to inspections per a certain Supplemental Structural Inspection Document (SSID), the airplane on which the crack was found was not an SSID candidate. Such cracking, if not fixed, could lead to reduced structural capability of the horizontal stabilizer center section, which could result in loss of controllability of the airplane.

The subject area on all Model 747 series airplanes is similar to that on the affected Model 747SR series airplane. Therefore, all of these airplanes may be subject to the same unsafe condition.

Explanation of Relevant Service Information

The FAA has reviewed and approved Boeing Alert Service Bulletin 747–55A2050, dated February 28, 2002, which describes procedures for repetitive detailed and high frequency eddy current (HFEC) inspections for cracking of the upper skin of the horizontal stabilizer center section and the rear spar upper chord. The procedures include a detailed visual inspection for cracking of the upper horizontal skin and of the vertical and horizontal flanges of the rear spar upper chord, and an HFEC inspection for cracking of the vertical flange of the upper chord where a detailed visual inspection is impeded by stiffeners, brackets, or sealant. The service bulletin specifies to contact Boeing for repair of any crack that is found. Accomplishment of the actions specified in the service bulletin is intended to adequately address the identified unsafe condition.

Explanation of the Requirements of the Rule

Since an unsafe condition has been identified that is likely to exist or develop on other airplanes of the same type design, this AD is being issued to find and fix cracking of the upper skin of the horizontal stabilizer center section and the rear spar upper chord, which could lead to reduced structural capability of the horizontal stabilizer center section, and result in loss of controllability of the airplane. This AD requires accomplishment of the actions specified in the service bulletin described previously, except as discussed below.

Differences Between This AD and the Service Bulletin

Operators should note that, although the service bulletin specifies that the manufacturer may be contacted for disposition of repair conditions, this AD requires the repair of those conditions to be accomplished per a method approved by the FAA, or per data meeting the type certification basis of the airplane approved by a Boeing Company Designated Engineering Representative who has been authorized by the Manager, Seattle Aircraft Certification Office, to make such findings.

Determination of Rule's Effective Date

Since a situation exists that requires the immediate adoption of this regulation, it is found that notice and opportunity for prior public comment hereon are impracticable, and that good cause exists for making this amendment effective in less than 30 days.

Comments Invited

Although this action is in the form of a final rule that involves requirements affecting flight safety and, thus, was not preceded by notice and an opportunity for public comment, comments are invited on this rule. Interested persons are invited to comment on this rule by submitting such written data, views, or arguments as they may desire. Communications shall identify the Rules Docket number and be submitted in triplicate to the address specified under the caption **ADDRESSES.** All communications received on or before the closing date for comments will be considered, and this rule may be amended in light of the comments received. Factual information that supports the commenter's ideas and suggestions is extremely helpful in evaluating the effectiveness of the AD action and determining whether additional rulemaking action would be needed.

Submit comments using the following format:

- Organize comments issue-by-issue. For example, discuss a request to change the compliance time and a request to change the service bulletin reference as two separate issues.
- For each issue, state what specific change to the AD is being requested.
- Include justification (*e.g.*, reasons or data) for each request.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the rule that might suggest a need to modify the rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report that summarizes each FAA-public contact concerned with the substance of this AD will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this rule must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 2002–NM–32–AD." The postcard will be date stamped and returned to the commenter.

Regulatory Impact

The regulations adopted herein will not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, it is determined that this final rule does not have federalism implications under Executive Order 13132.

The FAA has determined that this regulation is an emergency regulation that must be issued immediately to correct an unsafe condition in aircraft, and that it is not a "significant regulatory action" under Executive Order 12866. It has been determined further that this action involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979). If it is determined that this emergency regulation otherwise would be significant under DOT Regulatory Policies and Procedures, a final regulatory evaluation will be prepared and placed in the Rules Docket. A copy of it, if filed, may be obtained from the Rules Docket at the location provided under the caption **ADDRESSES.**

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

2002–06–02 Boeing: Amendment 39–12678. Docket 2002–NM–32–AD.

Applicability: All Model 747 series airplanes; certificated in any category.

Note 1: This AD applies to each airplane identified in the preceding applicability provision, regardless of whether it has been modified, altered, or repaired in the area subject to the requirements of this AD. For airplanes that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must request approval for an

VOL
67
ISS
53
MR
19
2002
UMI

alternative method of compliance in accordance with paragraph (c) of this AD. The request should include an assessment of the effect of the modification, alteration, or repair on the unsafe condition addressed by this AD; and, if the unsafe condition has not been eliminated, the request should include specific proposed actions to address it.

Compliance: Required as indicated, unless accomplished previously.

To find and fix cracking of the upper skin of the horizontal stabilizer center section and the rear spar upper chord, which could lead to reduced structural capability of the horizontal stabilizer center section, and result in loss of controllability of the airplane, accomplish the following:

Repetitive Inspections

(a) Before the accumulation of 24,000 total flight cycles, or within 90 days after the effective date of this AD, whichever occurs later: Do detailed and high frequency eddy current (HFEC) inspections, as applicable, for cracking of the upper skin of the horizontal stabilizer center section and the rear spar upper chord, according to the Work Instructions and Figure 1 of Boeing Alert Service Bulletin 747–55A2050, dated February 28, 2002. (The inspection procedures include a detailed inspection for cracking of the upper horizontal skin and of the vertical and horizontal flanges of the rear spar upper chord, and an HFEC inspection for cracking of the vertical flange of the upper chord where a detailed inspection is impeded by the presence of stiffeners, brackets, or sealant.) After doing the initial inspections, repeat the inspections every 1,000 flight cycles.

Note 2: For the purposes of this AD, a detailed inspection is defined as: "An intensive visual examination of a specific structural area, system, installation, or assembly to detect damage, failure, or irregularity. Available lighting is normally supplemented with a direct source of good lighting at intensity deemed appropriate by the inspector. Inspection aids such as mirror, magnifying lenses, etc., may be used. Surface cleaning and elaborate access procedures may be required."

Repair

(b) If any cracking is found during any inspection per paragraph (a) of this AD: Before further flight, repair per a method approved by the Manager, Seattle Aircraft Certification Office (ACO), FAA; or per data meeting the type certification basis of the airplane approved by a Boeing Company Designated Engineering Representative who has been authorized by the Manager, Seattle ACO, to make such findings. For a repair method to be approved by the Manager, Seattle ACO, as required by this paragraph, the Manager's approval letter must specifically reference this AD.

Alternative Methods of Compliance

(c) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Seattle ACO. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Seattle ACO.

Note 3: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Seattle ACO.

Special Flight Permits

(d) Special flight permits may be issued in accordance with sections 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the airplane to a location where the requirements of this AD can be accomplished.

Incorporation by Reference

(e) The actions shall be done in accordance with Boeing Alert Service Bulletin 747–55A2050, dated February 28, 2002. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from Boeing Commercial Airplane Group, P.O. Box 3707, Seattle, Washington 98124–2207. Copies may be inspected at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

Effective Date

(f) This amendment becomes effective on April 3, 2002.

Issued in Renton, Washington, on March 11, 2002.

Kalene C. Yanamura,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

RIN 2120–AA64

Airworthiness Directives; Boeing Model 737–600, –700, –700C, and –800 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule; request for comments.

SUMMARY: This amendment adopts a new airworthiness directive (AD) that is applicable to certain Boeing Model 737–600, –700, –700C, and –800 series airplanes. This action requires measurement of clearance between a certain retention bracket for the elevator power control unit (PCU) and a quadrant on the inboard side of the right elevator PCU, inspection for loose fasteners in certain retention bracket assemblies for the left and right elevator PCUs, and corrective action, if necessary. This action is necessary to prevent jamming of the elevator flight controls, which could result in reduced controllability of the airplane. This action is intended to address the identified unsafe condition.

DATES: Effective April 3, 2002.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of April 3, 2002.

Comments for inclusion in the Rules Docket must be received on or before May 20, 2002.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Transport Airplane Directorate, ANM–114, Attention: Rules Docket No. 2001–NM–356–AD, 1601 Lind Avenue, SW., Renton, Washington 98055–4056. Comments may be inspected at this location between 9:00 a.m. and 3:00 p.m., Monday through Friday, except Federal holidays. Comments may be submitted via fax to (425) 227–1232. Comments may also be sent via the Internet using the following address: *9-anm-iarcomment@faa.gov*. Comments sent via fax or the Internet must contain "Docket No. 2001–NM–356–AD" in the subject line and need not be submitted in triplicate. Comments sent via the Internet as attached electronic files must be formatted in Microsoft Word 97 for Windows or ASCII text.

The service information referenced in this AD may be obtained from Boeing Commercial Airplane Group, P.O. Box 3707, Seattle, Washington 98124–2207. This information may be examined at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Kenneth J. Fairhurst, Aerospace Engineer, Systems and Equipment Branch, ANM–130S, FAA, Seattle Aircraft Certification Office, 1601 Lind Avenue, SW., Renton, Washington 98055–4056; telephone (425) 227–1118; fax (425) 227–1181.

SUPPLEMENTARY INFORMATION: The FAA has received reports of loose fasteners in certain retention bracket assemblies for the left and right elevator power control units (PCUs) on certain Boeing Model 737–600, –700, –700C, and –800 series airplanes. Such loose fasteners could separate from the bracket and interfere with adjacent systems, including the elevator flight controls. A loose bracket could also cause such interference. Also, operators have found inadequate clearance between a particular retention bracket for the elevator PCU and a quadrant on the inboard side of the right elevator PCU. These conditions, if not corrected, could result in jamming of the elevator flight controls, which could result in reduced controllability of the airplane.

Explanation of Relevant Service Information

The FAA has reviewed and approved Boeing Alert Service Bulletin 737–27A1234, dated March 27, 2000, and Revision 1, dated August 10, 2000. Both service bulletins describe procedures for measurement of clearance between a certain retention bracket for the elevator PCU and a quadrant on the inboard side of the right elevator PCU, and rework of the bracket, if necessary. The service bulletins also describe procedures for a visual inspection for loose fasteners in certain retention bracket assemblies for the left and right elevator PCUs, and torquing of the fasteners, if necessary. The visual inspection for loose fasteners consists of inspecting for inadequate thread protrusion, gaps between the fastener heads and brackets, or loose brackets. Revision 1 differs from the original issue of the service bulletin in that the effectivity listing of Revision 1 includes airplanes not listed in the original issue of the service bulletin. Accomplishment of the actions specified in the service bulletin is intended to adequately address the identified unsafe condition.

Explanation of the Requirements of the Rule

Since an unsafe condition has been identified that is likely to exist or develop on other airplanes of the same type design, this AD is being issued to prevent jamming of the elevator flight controls, which could result in reduced controllability of the airplane. This AD requires accomplishment of the actions specified in the service bulletin described previously.

The FAA acknowledges that many operators have already accomplished the actions required by this AD on their fleets in accordance with the original issue or Revision 1 of Boeing Alert Service Bulletin 737–27A1234, which had a recommended compliance time of 10 days after receipt of the service bulletin. No further action is necessary for those airplanes on which the actions in the referenced service bulletins have been accomplished. However, the FAA finds that issuance of an AD is warranted at this time to ensure that the actions in the service bulletin are accomplished and the identified unsafe condition is addressed on all affected airplanes.

Difference Between This AD and the Service Bulletin

The service bulletin described previously identifies only Boeing Model 737–600, –700, and –800 series airplanes as being affected by the actions therein. However, we find that the effectivity listing of the service bulletin also includes Model 737–700C series airplanes. Therefore, this AD applies to certain Model 737–700C series airplanes in addition to certain Boeing Model 737–600, –700, and –800 series airplanes.

Determination of Rule's Effective Date

Since a situation exists that requires the immediate adoption of this regulation, it is found that notice and opportunity for prior public comment hereon are impracticable, and that good cause exists for making this amendment effective in less than 30 days.

Comments Invited

Although this action is in the form of a final rule that involves requirements affecting flight safety and, thus, was not preceded by notice and an opportunity for public comment, comments are invited on this rule. Interested persons are invited to comment on this rule by submitting such written data, views, or arguments as they may desire. Communications shall identify the Rules Docket number and be submitted in triplicate to the address specified under the caption **ADDRESSES.** All communications received on or before the closing date for comments will be considered, and this rule may be amended in light of the comments received. Factual information that supports the commenter's ideas and suggestions is extremely helpful in evaluating the effectiveness of the AD action and determining whether additional rulemaking action would be needed.

Submit comments using the following format:

- Organize comments issue-by-issue. For example, discuss a request to change the compliance time and a request to change the service bulletin reference as two separate issues.
- For each issue, state what specific change to the AD is being requested.
- Include justification (*e.g.*, reasons or data) for each request.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the rule that might suggest a need to modify the rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report that summarizes each FAA-public contact concerned with the substance of this AD will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this rule must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 2001–NM–356–AD." The postcard will be date-stamped and returned to the commenter.

Regulatory Impact

The regulations adopted herein will not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, it is determined that this final rule does not have federalism implications under Executive Order 13132.

The FAA has determined that this regulation is an emergency regulation that must be issued immediately to correct an unsafe condition in aircraft, and that it is not a "significant regulatory action" under Executive Order 12866. It has been determined further that this action involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979). If it is determined that this emergency regulation otherwise would be significant under DOT Regulatory Policies and Procedures, a final regulatory evaluation will be prepared and placed in the Rules Docket. A copy of it, if filed, may be obtained from the Rules Docket at the location provided under the caption **ADDRESSES.**

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

VOL
67
ISS
53
MR
19
2002
UMI

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

2002–06–03 **Boeing:** Amendment 39–12679. Docket 2001–NM–356–AD.

Applicability: Model 737–600, –700, –700C, and –800 series airplanes; as listed in Boeing Alert Service Bulletin 737–27A1234, Revision 1, dated August 10, 2000; certificated in any category.

Note 1: This AD applies to each airplane identified in the preceding applicability provision, regardless of whether it has been modified, altered, or repaired in the area subject to the requirements of this AD. For airplanes that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must request approval for an alternative method of compliance in accordance with paragraph (b) of this AD. The request should include an assessment of the effect of the modification, alteration, or repair on the unsafe condition addressed by this AD; and, if the unsafe condition has not been eliminated, the request should include specific proposed actions to address it.

Compliance: Required as indicated, unless accomplished previously.

To prevent jamming of the elevator flight controls, which could result in reduced controllability of the airplane, accomplish the following:

Measurement of Clearance and General Visual Inspection

(a) Within 10 days after the effective date of this AD, do paragraphs (a)(1) and (a)(2) of this AD, according to Boeing Alert Service Bulletin 737–27A1234, dated March 27, 2000, or Revision 1, dated August 10, 2000.

(1) Measure the clearance between a certain retention bracket for the elevator power control unit (PCU) and a quadrant on the inboard side of the right elevator PCU. If clearance is less than 0.10 inch, before further flight, accomplish rework according to the service bulletin.

(2) Perform a one-time general visual inspection for loose fasteners or brackets in certain retention bracket assemblies for the left and right elevator PCUs. If any loose fastener or bracket is found, before further flight, torque affected fasteners, according to the service bulletin.

Note 2: For the purposes of this AD, a general visual inspection is defined as: "A visual examination of an interior or exterior area, installation, or assembly to detect obvious damage, failure, or irregularity. This level of inspection is made under normally available lighting conditions such as daylight, hangar lighting, flashlight, or droplight, and may require removal or opening of access panels or doors. Stands, ladders, or platforms may be required to gain proximity to the area being checked."

Alternative Methods of Compliance

(b) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Seattle Aircraft Certification Office (ACO), FAA. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Seattle ACO.

Note 3: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Seattle ACO.

Special Flight Permits

(c) Special flight permits may be issued in accordance with sections 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the airplane to a location where the requirements of this AD can be accomplished.

Incorporation by Reference

(d) The actions shall be done in accordance with Boeing Alert Service Bulletin 737–27A1234, dated March 27, 2000, or Boeing Alert Service Bulletin 737–27A1234, Revision 1, dated August 10, 2000. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from Boeing Commercial Airplane Group, P.O. Box 3707, Seattle, Washington 98124–2207. Copies may be inspected at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

Effective Date

(e) This amendment becomes effective on April 3, 2002.

Issued in Renton, Washington, on March 11, 2002.

Ali Bahrami,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Final rule.

SUMMARY: The Federal Energy Regulatory Commission (Commission) is removing from its regulations the general statement of policy with respect to the issuance of certificates of public convenience and necessity for the construction and operation of pipeline transmission facilities in the Louisiana off-shore area. The Commission announced a new policy with respect to pipeline construction in the off-shore Louisiana area in *ANR Pipeline Company (ANR)*.[1] Since the old policy has changed, we are removing it from the regulations.

DATES: This final rule is effective upon the date of issuance.

FOR FURTHER INFORMATION CONTACT: Cecilia Desmond, Office of the General Counsel, Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426, (202) 208–2280.

SUPPLEMENTARY INFORMATION:

Federal Energy Regulatory Commission

Before Commissioners: Pat Wood, III, Chairman; William L. Massey, Linda Breathitt, and Nora Mead Brownell.

[Docket No. RM01–7–000; Order No. 624]

Policy on Certificates of Public Convenience and Necessity for Gas Transmission Facilities in the Off-shore Southern Louisiana Area; Final Rule

Issued March 13, 2002.

I. Introduction

The Federal Energy Regulatory Commission (Commission) is removing 18 CFR § 2.65 from its regulations. Section 2.65 sets out a general policy with respect to the issuance of certificates of public convenience and necessity for the construction and operation of pipeline transmission facilities in the Louisiana off-shore area. The Commission's predecessor agency, the Federal Power Commission (FPC), announced the policy on June 4, 1968, in Order No. 363, to maximize the use of off-shore Louisiana facilities and to ensure that off-shore facilities were properly sized.[1] In *ANR Pipeline Company (ANR)*, the Commission confirmed that § 2.65 no longer reflects its policy with respect to pipeline construction in the off-shore Louisiana area.[2] Since the Commission's policy with respect to construction of off-shore facilities has changed, we are removing § 2.65 from the regulations.

II. Discussion

In promulgating § 2.65 in Order No. 363, the FPC noted the increasing importance of off-shore Louisiana as a source of natural gas for the nation and the much higher cost of installing off-shore pipeline facilities compared to on-shore facilities. Taking this into account, the FPC announced a policy under which it would review applications for construction of pipelines in the Louisiana off-shore area in the Gulf of Mexico on both a joint and individual company basis. The FPC intended to promote joint use arrangements and wanted pipeline companies to develop gas exchange procedures to minimize cross-hauls. The FPC believed that this would assure both timely and cost-effective full utilization of large capacity facilities in the Gulf of Mexico and development of the off-shore gas reserves.

Thus, the policy outlined in § 2.65 states that a pipeline applying for a certificate of public convenience and necessity for the construction and operation of off-shore pipeline facilities should include certain information in its application: (1) A detailed description of the applicant's efforts to transport its gas using another pipeline's existing or proposed off-shore facilities (§ 2.65 (a)(1)); (2) a demonstration that it consulted with other pipelines about using the applicant's proposed facilities to transport their gas to onshore facilities (§ 2.65 (a)(2)); (3) that the applicant will install 30-inch or larger diameter pipe or demonstrate the feasibility of a smaller proposed line (§ 2.65 (a)(3)); and (4) a demonstration that its proposed facilities will be used at a minimum annual load factor of 60 percent of the annual capacity available by the end of a 12-month period following construction, or seek a waiver of this requirement (§ 2.65(a)(4)). Section 2.65 also states that the Commission intends to enforce the 60 percent load factor requirement by permitting off-shore pipeline facilities to be included in the applicant's cost-of-service in future rate proceeedings at an average unit cost predicated on load factors of not less that 60 percent (§ 2.65(b)).

Section 2.65 also states that pipelines should file applications for off-shore facilities by September 1 of the year immediately preceding the proposed installation of the facilities. This would allow staff to review all applications, on a joint and individual company basis, at the same time. In 1976, for example, in *High Island Offshore System (HIOS)*, the Commission convened public conferences to discuss a possible alternative joint approach to three competitive applications requesting authorization to construct off-shore pipeline facilities.[3] The three competing applicants ultimately amended and unified their applications to propose one system rather than the three originally proposed, as anticipated by § 2.65.

In 1996, a number of interstate pipeline companies, including ANR and Nautilus Pipeline Company (Nautilus), filed applications requesting authorization to construct pipeline facilities in the Gulf of Mexico in response to significant new deepwater gas reserves being developed in several off-shore Louisiana producing regions. ANR argued that § 2.65 of the Commission's regulations required the Commission to consolidate ANR's application for authority to construct pipeline facilities in the Gulf of Mexico with Nautilus' similar application for off-shore facilities and to hold a joint hearing to consider the two applications.[4] Citing changed circumstances since the FPC adopted the policy announced in Order No. 363, the Commission confirmed that its policy with respect to off-shore facilities has changed and denied ANR's request for consolidation.[5]

ANR appealed the Commission's order, arguing that the Commission had violated its own regulation since § 2.65 required the Commission to hold a comparative hearing on its and Nautilus' applications.[6] In denying ANR's appeal, the court stated that, since § 2.65 is a policy statement, not a regulation, it is not binding on the Commission. Noting that an agency may not depart from prior policy without explanation, the court stated that the Commission's explanation in *ANR* adequately explained how changed circumstances justified a new policy. In response to the court's suggestion that the Commission should amend § 2.65 to reflect its new policy,[7] we are issuing this rule.

As explained in *ANR*, since the 1968 issuance of Order No. 363, both off-shore natural gas production and the Commission's regulatory approach to the construction of pipeline infrastructure have undergone significant changes that have affected the Commission's policy with respect to interstate pipeline construction in the Gulf of Mexico. The Gulf of Mexico, considered a few years ago to be a mature producing area, contains significant newly discovered deep water reserves of natural gas. In recent years, the Commission's regulatory approach has been to encourage the operation of market forces and competition wherever possible to determine what pipeline facilities are constructed.

Thus, rather than allocating limited production in the Gulf of Mexico among a limited number of pipelines as set out in Order No. 363 and § 2.65, the Commission now seeks to encourage an interstate pipeline infrastructure capable of transporting natural gas from newly developed production areas in the Gulf of Mexico. This market-oriented approach allows for the most efficient, cost effective, and timely development of new off-shore reserves and transportation facilities.

In *ANR*, the Commission determined that application of the evaluation standards reflected in § 2.65 to decide which project would meet off-shore capacity requirements could needlessly delay construction of the necessary pipeline infrastructure, delay production plans, and retard further exploration and development in the area. Instead, the Commission stated that the market should determine which projects are best suited to serve the area's infrastructure needs.

Since § 2.65 no longer accurately describes the Commission's policy and the Commission no longer wishes to codify in the regulations its policy on constructing infrastructure in the Gulf of Mexico, the Commission is removing § 2.65.

III. Administrative Findings

The Administrative Procedure Act (APA) requires rulemakings to be published in the **Federal Register** and also mandates that an opportunity for comments be provided when an agency promulgates regulations. However, the APA exempts general statements of policy from its notice and comment requirements.[8] Therefore, since § 2.65 is a policy statement rather than a substantive rule, we are removing it from our regulations without a period for public comment.

IV. Effective Date and Congressional Notification

The APA exempts general statements of policy from the requirement that rules become effective only after thirty days' notice.[9] Therefore, this final rule will be effective upon the date of its issuance. The Commission has determined, with the concurrence of the

UMI

Administrator of the Office of Information and Regulatory Affairs of the Office of Management and Budget, that the removal of this policy statement is not a major rule within the meaning of section 351 of the Small Business Regulatory Enforcement Fairness Act of 1996.[10] The Commission is submitting this final rule to both houses of Congress and to the Comptroller General.

V. Environmental Analysis

Commission regulations describe the circumstances where preparation of an environmental assessment or an environmental impact statement will be required.[11] The Commission has categorically excluded certain actions from this requirement as not having a significant effect on the human environment.[12] Since removing an outdated policy statement from the regulations falls within categorical exclusions in the Commission's regulations for rules that are clarifying, corrective, or procedural, no environmental assessment or environmental impact statement is necessary.[13]

VI. Regulatory Flexibility Impact Statement

The Regulatory Flexibility Act of 1980 (RFA)[14] generally requires a description and analysis of proposed rules that will, if promulgated, have a significant economic impact on a substantial number of small entities. The Commission is not required to make such analysis if a rule would not have such an effect.[15]

The Commission does not believe that the removal of § 2.65 from its regulations would have such an impact on small entities. The removal would have an impact only on interstate pipelines, which generally do not fall within the RFA's definition of small entity.[16] Accordingly, pursuant to section 605(b) of the RFA, the Commission certifies that the removal of § 2.65 will not have a significant economic impact on a substantial number of small entities.

[16] 5 U.S.C. 601(3), citing to section 3 of the Small Business Act, 15 U.S.C. 632. Section 3 of the Small Business Act defines a "small business concern" as a business which is independently owned and operated and which is not dominant in its field of operations.

VII. Information Collection Statement

The Office of Management and Budget's (OMB) regulations require that OMB approve certain information collection requirements imposed by agency rules.[17] However, this Final Rule contains no information reporting requirements, and therefore is not subject to OMB approval.

VIII. Document Availability

In addition to publishing the full text of this document in the **Federal Register**, the Commission provides all interested persons an opportunity to view and/or print the contents of this document via the Internet through FERC's Home Page *(http://www.ferc.fed.us)* and in FERC's Public Reference Room during normal business hours (8:30 a.m. to 5:00 p.m. Eastern time) at 888 First Street, N.E., Room 2A, Washington, DC 20426.

From FERC's Home Page on the Internet, this information is available in both the Commission Issuance Posting System (CIPS) and the Records and Information Management System (RIMS).

—CIPS provides access to the texts of formal documents issued by the Commission since November 14, 1994.

—CIPS can be accessed using the CIPS link or the Energy Information Online icon. The full text of this document is available on CIPS in ASCII and WordPerfect 8.0 format for viewing, printing, and/or downloading.

—RIMS contains images of documents submitted to and issued by the Commission after November 16, 1981. Documents from November 1995 to the present can be viewed and printed from FERC's Home Page using the RIMS link or the Energy Information Online icon. Descriptions of documents back to November 16, 1981, are also available from RIMS-on-the-Web; requests for copies of these and other older documents should be submitted to the Public Reference Room.

User assistance is available for RIMS, CIPS, and the Website during normal business hours from our Help line at (202) 208–2222 (E-Mail to WebMaster@ferc.fed.us) or the Public Reference at (202) 208–1371 (E-Mail to *public.referenceroom@ferc.fed.us*).

During normal business hours, documents can also be viewed and/or printed in FERC's Public Reference Room, where RIMS, CIPS, and the FERC Website are available. User assistance is also available.

List of Subjects in 18 CFR Part 2

Administrative practice and procedure, Electric Power, Natural gas, Pipelines, Reporting and recordkeeping requirements.

By the Commission.

Magalie R. Salas,

Secretary.

For the reasons set forth in the foregoing, the Commission is removing § 2.65 of Part 2, Chapter 1, Title 18, Code of Federal Regulations, as follows.

PART 2—GENERAL POLICY AND INTERPRETATIONS

1. The authority citation for Part 2 continues to read as follows:

Authority: 5 U.S.C. 601; 15 U.S.C. 717–717w, 3301–3432; 16 U.S.C. 792–825y, 2601–2645; 42 U.S.C. 4321–4361, 7101–7352.

2. Remove § 2.65.

§ 2.65 [Removed]

BILLING CODE 6717–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 522

Implantation or Injectable Dosage Form New Animal Drugs; Oxytetracycline Injection

AGENCY: Food and Drug Administration, HHS.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the animal drug regulations to reflect approval of a supplemental abbreviated new animal drug application (ANADA) filed by Phoenix Scientific, Inc. The supplemental ANADA provides for the subcutaneous administration of oxytetracycline (OTC) injectable solution in cattle.

DATES: This rule is effective March 19, 2002.

FOR FURTHER INFORMATION CONTACT: Steven D. Vaughn, Center for Veterinary Medicine (HFV–130), Food and Drug Administration, 7500 Standish Pl., Rockville, MD 20855, 301–827–7580.

SUPPLEMENTARY INFORMATION: Phoenix Scientific, Inc., 3915 South 48th St. Terrace, P.O. Box 6457, St. Joseph, MO 64506–0457, filed a supplement to approved ANADA 200–123 that provides for the use of MAXIM 200 (oxytetracycline) Injection as treatment for various bacterial diseases in cattle and swine. The supplemental ANADA provides for the subcutaneous administration of OTC injectable solution in beef cattle, nonlactating dairy cattle, and calves, including preruminating (veal) calves. The supplemental application is approved as of December 28, 2001, and the regulations are amended in 21 CFR 522.1660 to reflect the approval. The basis of approval is discussed in the freedom of information summary.

In accordance with the freedom of information provisions of 21 CFR part 20 and 514.11(e)(2)(ii), a summary of safety and effectiveness data and information submitted to support approval of this supplemental application may be seen in the Dockets Management Branch (HFA–305), Food and Drug Administration, 5630 Fishers Lane, rm. 1061, Rockville, MD 20852, between 9 a.m. and 4 p.m., Monday through Friday.

The agency has determined under 21 CFR 25.33(a)(1) that this action is of a type that does not individually or cumulatively have a significant effect on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

This rule does not meet the definition of "rule" in 5 U.S.C. 804(3)(A) because it is a rule of "particular applicability." Therefore, it is not subject to the congressional review requirements in 5 U.S.C. 801–808.

List of Subjects in 21 CFR Part 522

Animal drugs.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs and redelegated to the Center for Veterinary Medicine, 21 CFR part 522 is amended as follows:

PART 522—IMPLANTATION OR INJECTABLE DOSAGE FORM NEW ANIMAL DRUGS

1. The authority citation for 21 CFR part 522 continues to read as follows:

Authority: 21 U.S.C. 360b.

§ 522.1660 [Amended]

2. Section 522.1660 *Oxytetracycline injection* is amended in the second sentence in paragraph (d)(1)(iii) by removing "Sponsors 000010 and 053389," and adding in its place "Sponsors 000010, 053389, and 059130".

Dated: February 28, 2002.

Claire M. Lathers,

Director, Office of New Animal Drug Evaluation, Center for Veterinary Medicine.

Disallowance of Deductions and Credits for Failure To File Timely Return; Correction

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Correction to temporary regulations.

SUMMARY: This document contains a correction to temporary regulations that were published in the **Federal Register** on Thursday, January 29, 2002 (67 FR 4173) relating to the disallowance of deductions and credits for nonresident alien individuals and foreign corporations that fail to file a timely U.S. income tax return.

DATES: This correction is effective January 29, 2002.

FOR FURTHER INFORMATION CONTACT: Nina E. Chowdhry, (202) 622–3880 (not a toll-free number).

SUPPLEMENTARY INFORMATION:

Background

The final and temporary regulations that are the subject of this correction is under sections 874 and 882 of the Internal Revenue Code.

Need for Correction

As published, the TD 8981 contains an error that may prove to be misleading and is in need of clarification.

Correction of Publication

Accordingly, the publication of TD 8981, that was the subject of FR Doc. 02–2044, is corrected as follows:

§ 1.874–1T [Corrected]

On page 4175, column 1, § 1.874–1T(b)(3), *Example 1.*, line 28, the language "paragraph § 1.874–1(a) from claiming any" is corrected to read "§ 1.874–1(a) from claiming any".

Excise Taxes on Excess Benefit Transactions; Correction

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Correction to final regulations.

SUMMARY: This document contains corrections to final regulations that were published in the **Federal Register** on Wednesday, January 23, 2002 (67 FR 3076) relating to the excise taxes on excess benefit transactions.

DATES: This correction is effective January 23, 2002.

FOR FURTHER INFORMATION CONTACT: Phyllis D. Haney, (202) 622–4290 (not a toll-free number).

SUPPLEMENTARY INFORMATION:

Background

The final regulations that are the subject of these corrections are under section 4958 of the Internal Revenue Code.

Need for Correction

As published, the final regulations contain errors that may prove to be misleading and are in need of clarification.

Correction of Publication

Accordingly, the publication of the final regulations (TD 8978), that were the subject of FR Doc. 02–985, is corrected as follows:

1. On page 3078, column 1, in the preamble under the paragraph heading "*Definition of Applicable Tax-Exempt Organization*", line 6 from the top of the column, the language "to the efficient administration of the" is corrected to read "for the efficient administration of the".

2. On page 3082, column 3, in the preamble under the paragraph heading "*Final Regulatory Flexibility Analysis*", first paragraph, line 13, the language "REP. 104–506 at 56–7, March 28, 1996)" is corrected to read "REP. 506, 104th Congress, 2d SESS. (1996), 53, 56–7)".

3. On page 3083, column 1, in the preamble under the paragraph heading "*Final Regulatory Flexibility Analysis*", first full paragraph, line 1, the language "The objective for the rebuttable" is corrected to read "The objective of the rebuttable".

§ 53.4958–4 [Corrected]

4. On page 3091, column 3, § 53.4958–4(a)(3)(vii), *Example 1*, line 12, the language "T (see § 53.4958–3(a)). Under the initial" is corrected to read "T (see § 53.4958–3(c)(3)). Under the initial".

5. On page 3095, column 2, § 53.4958–4(c)(4), *Example 2*, line 10, the language "D fails to report the bonus on his individual" is corrected to read "D fails to report the bonus on D's individual".

§ 301.7611–1 [Corrected]

6. On page 3099, column 2, in A–19, line 1, the language "A–19: See § 53.4958–7(b) of this" is corrected to read "A–19: See § 53.4958–8(b) of this".

Cynthia E. Grigsby,
Chief, Regulations Unit, Associate Chief Counsel, (Income Tax and Accounting).

BILLING CODE 4830–01–P

DEPARTMENT OF DEFENSE

Office of the Secretary

32 CFR Part 199

RIN 0720–AA62

Civilian Health and Medical Program of the Uniformed Services (CHAMPUS); Partial Implementation of Pharmacy Benefits Program; Implementation of National Defense Authorization Act for Fiscal Year 2001

AGENCY: Office of the Secretary, Department of Defense.

ACTION: Interim final rule; administrative corrections.

SUMMARY: On October 23, 2000 (65 FR 63202), the Department of Defense published a final rule concerning the Civilian Health and Medical Program of the Uniformed Services (CHAMPUS) TRICARE Dental Program. This document is published to correct an administrative error in those rules for clarity.

EFFECTIVE DATE: This rule is effective April 1, 2001.

FOR FURTHER INFORMATION CONTACT: Tariq Shahid, Medical Benefits and Reimbursement Systems, TRICARE Management Activity, Office of the Assistant Secretary of Defense (Health Affairs), telephone (303) 676–3801.

SUPPLEMENTARY INFORMATION: The final rule had an effective date that began during the Presidential Moratorium on Rules, therefore, the rule was republished on March 1, 2001 (66 FR 12855), exactly as previously published, to change the effective date to April 1, 2001. In the interval between publication and republication of the final rule on TRICARE Dental Program, on February 9, 2001 (66 FR 9651), the Department of Defense also published an interim final rule concerning, among other issues, partial implementation of the Pharmacy Benefits Program and amended 32 CFR part 199 by adding a new section 199.21, Pharmacy Benefits Program to replace the previously reserved section 199.21. On February 15, 2001 (66 FR 10367) and March 26, 2001 (66 FR 16400), DoD published corrections to the interim final rule changing the effective date to April 1, 2001, and making other administrative changes. Unfortunately, republication of the TRICARE Dental Program final rule on March 1, 2001, amending 32 CFR part 199 to remove section 199.21 (thereby intending to remove section 199.21, TRICARE Selected Reserve Dental Program, as stated in the Supplemental Information section of the final rule) resulted in a technical error removing section 199.21, Pharmacy Benefits Program which was added by the Pharmacy Benefits Program interim final rule to become effective April 1, 2001.

List of Subjects in 32 CFR Part 199

Claims, Dental health, Health care, Health insurance, Individuals with disabilities, Military personnel.

Accordingly, 32 CFR part 199 is amended as follows:

1. The authority citation continues to read as follows:

Authority: 5 U.S.C. 301; 10 U.S.C. chapter 55

2. Section 199.21 is added to read as follows:

§ 199.21 Pharmacy Benefits Program.

(a) *In general.*—(1) *Statutory authority.* 10 U.S.C. 1074g requires that the Department of Defense establish an effective, efficient, integrated Pharmacy Benefits Program for the Military Health System. This law is independent of a number of section of title 10 and other laws that affect the benefits, rules, and procedures of CHAMPUS/TRICARE, resulting in changes to the rules otherwise applicable to TRICARE Prime, Standard, and Extra. Among these changes is an independent set of beneficiary co-payments for prescription drugs.

(2) *Partial implementation during interim period.* Beginning April 1, 2001, 10 U.S.C. 1074g is partially implemented to coincide with the start of the TRICARE Senior Pharmacy Program and substantial cost sharing changes for active duty dependents enrolled in Prime. Some authorities and requirements of Section 1074g, such as the classification of drugs as formulary or non-formulary under a "uniform formulary of pharmaceutical agents," are not yet implemented. In this section, references to "interim implementation period" mean the period beginning April 1, 2001.

(b) *Program benefits.* During the interim implementation period, prescription drugs and medicines are available under the otherwise applicable rules and procedures for military treatment facility pharmacies, TRICARE Prime, Standard, and Extra, and the Mail Order Pharmacy Program. There is not during this interim implementation period a "uniform formulary" of drugs and medicines available in all of these parts of the system. All cost sharing requirements for prescription drugs and medicines are established in this section for pharmacy services provided throughout the Military Health System.

(c) *Providers of pharmacy services.* There are four categories of providers of pharmacy services: military treatment facilities (MTFs), network retail providers, non-network retail providers, and the mail service pharmacy program. Network retail providers are those non-MTF pharmacies that are a part of the network established for TRICARE Prime under § 199.17. Non-network pharmacies are those non-MTF pharmacies that are not part of such a network.

(d) *Classifications of drugs and medicines.* During the interim implementation period, a distinction is made for purposes of cost sharing between generic drugs and non-generic (or brand name) drugs.

(e) TRICARE Senior Pharmacy Program. Section 711 of the Floyd D. Spence National Defense Authorization Act for Fiscal Year 2001 (Public Law 106–398, 114 Stat. 1654) established the TRICARE Senior Pharmacy Program for Medicare eligible beneficiaries effective April 1, 2001. These beneficiaries are required to meet the eligibility criteria as prescribed in § 199.3. The benefit under the TRICARE Senior Pharmacy Program includes the Basic Program pharmacy benefits as found under § 199.4(d) and the pharmacy benefit and cost sharing as found under this part. The TRICARE Senior Pharmacy Program applies to prescription drugs and medicines provided on or after April 1, 2001.

(f) *Cost sharing.* Beneficiary cost sharing requirements for prescription drugs and medicines are based upon the generic/non-generic status and the point of sale (i.e., MTF, network pharmacy, non-network pharmacy, mail service pharmacy) from which they are acquired. For this purpose, a generic drug is a non-brand name drug. A non-generic drug is a brand name drug. In the case of a brand name drug for which there is no generic equivalent, the non-generic cost share applies.

(1) *Military treatment facilities.* There are no cost sharing requirements for drugs and medicines provided by MTF pharmacies.

(2) *Retail pharmacy network program.* There is a $9.00 co-pay per prescription required under the retail pharmacy network program for up to a 30-day supply of a non-generic drug or medicine, and a $3.00 co-pay for up to a 30-day supply of a generic drug or medicine. There is no annual deductible for drugs and medicines provided under the retail pharmacy network program.

(3) *Mail service pharmacy program.* There is a $9.00 co-pay per prescription required under the mail service pharmacy program for up to a 90-day supply of a non-generic drug or medicine, and a $3.00 co-pay for up to a 90-day supply of a generic drug or medicine. There is no annual deductible for drugs and medicines provided under the mail service pharmacy program.

(4) *Non-network retail pharmacies.* There is a 20 percent or $9.00 (whichever is greater) co-pay per prescription required for up to a 30-day supply of a drug obtained from a non-network pharmacy. A point of service cost-share of 50 percent applies in lieu of the 20 percent copay for TRICARE Prime enrollees who obtain their prescriptions from a non-network retail pharmacy without proper authorization. In addition, these TRICARE Prime enrollees are subject to higher deductibles as provided in § 199.17(m)(1)(i) and (m)(2)(i). For prescription drugs acquired from non-network retail pharmacies, beneficiaries other than Prime enrollees (including TRICARE Senior Pharmacy Program beneficiaries) are subject to the $150.00 per individual or $300.00 maximum per family (or for dependents of sponsors in pay grades below E–5, $50 per individual or $100 per family) annual fiscal year deductible.

(g) *Effect of other health insurance.* The double coverage rules of § 199.8 are applicable to services provided under the Pharmacy Benefits Program. For this purpose, to the extent they provide a prescription drug benefit, Medicare supplemental insurance plans or Medicare HMO plans are double coverage plans and will be the primary payor.

(h) *Procedures.* The Director, TRICARE Management Activity shall establish procedures for the effective operation of the Pharmacy Benefit Program. Such procedures may include restrictions of the quantity of pharmaceuticals to be included under the benefit, encouragement or requirement of the use of generic drugs, implementation of quality assurance and utilization management activities, and other appropriate matters.

Dated: March 13, 2002.

BILLING CODE 5001–08–M

DEPARTMENT OF VETERANS AFFAIRS

38 CFR Part 21

RIN 2900–AJ23

Information Collection Needed in VA's Flight-Training Programs

AGENCY: Department of Veterans Affairs.

ACTION: Final rule.

SUMMARY: We are amending our educational assistance and educational benefit regulations concerning flight-training courses for which the Department of Veterans Affairs (VA) pays eligible students. In this regard, we are requiring that flight schools offering such flight-training courses maintain records regarding students to whom VA makes payments. This rule is intended to provide information to VA for determining compliance with requirements for VA payments to students for pursuing flight-training courses. Also, when VA, rather than a separate State entity, is the approving agency, this rule is intended to provide information to VA for determining whether to approve a flight-training course.

EFFECTIVE DATE: *Effective date:* This final rule is effective March 19, 2002.

FOR FURTHER INFORMATION CONTACT: William G. Susling, Jr., Assistant Director for Policy and Program Development, Education Service, Veterans Benefits Administration, 202–273–7187.

SUPPLEMENTARY INFORMATION: In a document published in the **Federal Register** on April 3, 2000 (65 FR 17477), we proposed to amend VA's educational assistance and educational benefit regulations concerning flight-training courses for which VA makes payments. In this regard, we proposed to add 38 CFR 21.4263(h)(3) to provide that flight schools offering approved flight-training courses must maintain records as set out in the text portion of the document. We also proposed to amend VA's educational assistance and educational benefit regulations by making technical changes for purposes of clarification.

Comments were sought during a 60-day period. Only one comment was received and it was highly supportive of the proposed rule. Based on the rationale set forth in the proposed rule and in this document, we are adopting the provisions of the proposed rule as a final rule except that we are making non-substantive changes for purposes of clarity and are adding a statement following § 21.4263 to reflect the approval by the Office of Management and Budget (MB) of the collection of information requirements contained in this rule.

Paperwork Reduction Act

OMB has approved under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520) the information collection requirements contained in this rule (in 38 CFR 21.4263(h)(3)) and has assigned them OMB control number 2900–0613.

OMB assigns control numbers to collections of information it approves. VA may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The valid OMB control number assigned to the collection of information requirements in this rule is displayed at the end of the affected section of the regulations.

Regulatory Flexibility Act

The Secretary of Veterans Affairs hereby certifies that this rule will not have a significant economic impact on a substantial number of small entities as they are defined in the Regulatory Flexibility Act, 5 U.S.C. 601–612. This rule will have a minuscule monetary effect if any, on affected entities. Pursuant to 5 U.S.C. 605(b), this rule, therefore, is exempt from the initial and final regulatory flexibility analyses requirements of sections 603 and 604.

Unfunded Mandates

The Unfunded Mandates Reform Act requires, at 2 U.S.C. 1532, that agencies prepare an assessment of anticipated costs and benefits before developing any rule that may result in an expenditure by State, local, or tribal governments, in the aggregate,or by the private sector, of $100 million or more in any given year.

This rule will have no consequential effect on State, local or tribal governments.

Catalog of Federal Domestic Assistance

the Catalog of Federal Domestic Assistance numbers for programs affected by this rule are 64.120 and 64.124. This rule also affects the Montgomery GI Bill—Selected Reserve program, which has no Catalog of Federal Domestic Assistance number.

List of Subjects in 38 CFR Part 21

Administrative practice and procedure, Armed forces, Civil rights, Claims Colleges and universities, Conflict of Interests, Defense Department, Education, Employment, Grant programs—education, Grant programs—veterans, health care, Loan programs—education, Loan programs—veterans, Manpower training programs, Reporting and recordkeeping requirements, Schools, Travel and transportation expenses, Veterans, Vocational education, Vocational rehabilitation.

Approved: December 26, 2001.

Anthony J. Principi,

Secretary of Veterans Affairs.

For the reasons set forth in the preamble, VA amends 38 CFR part 21 (subparts D and L) as follows:

PART 21—VOCATIONAL REHABILITATION AND EDUCATION

Subpart D—Administration of Educational Assistance Programs

1. The authority citation for subpart D continues to read as follows:

Authority: 10 U.S.C. 2141 note, ch. 1606; 38 U.S.C. 501(a), chs. 30, 32, 34,35, 36, unless otherwise noted.

§ 21.4152 [Amended]

2. In § 21.4152, the introductory text of paragraph (b) is amended by removing "on VA." and adding, in its place, "on VA" and pargraph (b)(4) is amended by removing "§ 21.4209." and adding, in its place "§ § 21.4209 and 21.4263."

3. Section 21.4263 is amended by:

A. Removing the authority citation at the end of paragraph (h).

B. Adding paragraph (h)(30.

C. Adding the information collection requirements parenthetical at the end of the section.

The additions read as follows:

§ 21.4263. Approval of flight training courses.

* * * * *

(h) *Nonaccredited courses.* * * *

(3) A flight school must keep at a minimum the following records for each eligible veteran, servicemember, or reservist pursuing flight training:

(i) A copy of his or her private pilot certificate;

(ii) Evidence of completion of any prior training that may be a prerequisite for the course;

(iii) A copy of the medical certificate required by paragraph (a)(2) of this section for the courses being pursued and copies of all medical certificates (expired or otherwise) needed to support all periods of prior instruction received at the current school;

(iv) A daily flight log or copy thereof;

(v) A permanent ground school record;

(vi) A progress log;

(vii) An invoice of flight changes for individual flights or flight lessons for training conducted on a flight simulator or advanced flight training device;

(viii) Daily flight sheets identifying records upon which the 85–15 percent ratio may be computed;

(ix) A continuous meter record for each aircraft;

(x) An invoice or flight tickets signed by the student and instructor showing hour meter reading, type of aircraft, and aircraft identification number;

(xi) An accounts receivable ledger;

(xii) Individual instructor records;

(xiii) Engine log books;

(xiv) A record for each student above the private pilot level stating the name of the course in which the student is currently enrolled and indicating whether the student is enrolled under 14 CFR part 61, part 63, part 141, or part 142;

(xv) Records of tuition and accounts which are evidence of tuition charged and received from all students; and

(xvi) If training is provided under 14 CFR part 141, the records required by that part, or if training is provided under 14 CFR part 142, the records required by that part.

(Authority: 38 U.S.C. 3671, 3672, 3676, 3690(c))

* * * * *

(The Office of Management and Budget has approved the information collection requirements in this section under control number 2900–0613)

Subpart L—Educational Assistance for Members of the Selected Reserve

4. The authority citation for subpart L continues to read as follows:

Authority: 10 U.S.C. ch. 1606; 38 U.S.C. 501(a), 512, ch. 36, unless otherwise noted.

§ 21.7807 [Amended]

5. Section 21.7807 is amended by removing "§ 21.4209" and adding, in its place, "§ § 21.4209 and 21.4263".

BILLING CODE 8320–01–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 81

[NV 074–CORR; FRL–7159–6]

Designations of Areas for Air Quality Planning Purposes; State of Nevada; Technical Correction

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: EPA is clarifying and correcting the tables in the Code of Federal Regulations that identify the Agency's designations and classifications of nonattainment, attainment, and unclassifiable areas for criteria pollutants within the State of Nevada. Specifically, EPA is clarifying the tables for Nevada to indicate the specific geographic areas that comprise the attainment and unclassifiable areas in the State and to reflect changes in the Agency's regulations implementing the prevention of significant deterioration program. EPA is also correcting the table that shows the classification of the Las Vegas Valley nonattainment area for the National Ambient Air Quality Standard for carbon monoxide.

EFFECTIVE DATE: This action is effective on March 19, 2002.

ADDRESSES: Copies of documents relevant to this action are available for public inspection during normal business hours at the Permits Office of the Air Division, Environmental Protection Agency, Region 9, 75 Hawthorne Street, San Francisco, California 94105–3901.

FOR FURTHER INFORMATION CONTACT: David Albright, Permits Office (AIR–3), U.S. Environmental Protection Agency, Region 9, (415) 972–3971 or albright.david@epa.gov.

SUPPLEMENTARY INFORMATION: Throughout this document, wherever "we", "us", or "our" are used, we mean the Environmental Protection Agency (EPA).

This section contains additional information about our final rulemaking, organized as follows:

I. Clarification of the TSP, SO_2, and NO_2 tables.

II. Clarification of the PM_{10} table.

III. Correction of the CO table.

IV. EPA's final action.

V. Effective date of EPA's final action.

I. Clarification of the TSP, SO_2, and NO_2 Tables

EPA's designations of nonattainment, attainment, and unclassifiable areas pursuant to section 107(d) of the Clean Air Act are contained in part 81 of title 40 of the code of federal regulations (40 CFR part 81). Our designations for such areas in the State of Nevada are located in 40 CFR 81.329 and are presented separately for each of the criteria pollutants.[1] All of the applicable tables in 40 CFR 81.329 contain the term "rest of state" or "entire state" to describe the attainment or unclassifiable areas within Nevada. We are aware that the term "rest of state" or "entire state" in these tables at 40 CFR 81.329 could be misinterpreted as designating a single attainment or unclassifiable area. However, based on the regulatory history summarized below, dating back to our initial area designations in 1978, the terms "rest of state" and "entire state" in the applicable section 81.329 tables actually refer to more than 250 individual section 107(d) attainment or unclassifiable areas.

In 1977, pursuant to section 107(d) of the Clean Air Act Amendments of 1977, the State of Nevada submitted their recommendations to EPA for nonattainment, attainment and unclassifiable areas for TSP (total suspended particulate), SO_2 (sulfur dioxide), and NO_2 (nitrogen dioxide) within the State.[2] Dated November 25, 1977, the State's letter containing the recommendations cites hydrographic areas (delineated by the Nevada Division of Water Resources) as the geographic unit for such areas in Nevada, specifically noting that, "the name and definition of Nevada's water basins are now being utilized as the reference unit for air basins." The letter with the State's 1977 submission indicated that there were 253 such air basins in the State. A careful review of the air basins listed in the documentation provided with the 1977 letter indicates that the State had identified 254 such areas. These areas are referred to herein as "section 107(d) areas."

In 1978, we designated section 107(d) areas based on the State's recommendations (contained in the November 1977 letter described above) with certain modifications (that are not relevant for the purposes of this action) and codified these areas in 40 CFR part 81.329. See 43 FR 8962, 9012 (March 3, 1978). In our 1978 rule, we noted: "In some instances, the descriptions of the designated areas submitted by the States were so lengthy as to prohibit their publication in the limited space available in the tables presented below. Exact descriptions of all areas designated are available at the appropriate Regional Offices or the State in question." See 43 FR 8962, 8964 (March 3, 1978). Nevada was one of those States which submitted a lengthy description of section 107(d) areas. In the tables published in the **Federal Register** and codified in 40 CFR 81.329, the short-hand notation "rest of state" and "entire state" were used to refer to attainment and unclassifiable areas in the State of Nevada, in lieu of the lengthy description of 254 hydrographic areas submitted by the State. Thus, our 1978 rule, despite the use of the short-hand notation in the CFR, approved the hydrographic areas as the attainment or unclassifiable areas (for TSP, SO_2, and NO_2) in the State of Nevada.

Since our 1978 rule, we have twice taken action under section 107(d) of the Clean Air Act to increase the number of designated section 107(d) areas in the State of Nevada. In 1980, we approved a division of hydrographic area 101 (Carson Desert) into two section 107(d) areas for TSP: 101 (a smaller area referred to as Carson Desert); and 101A (referred to as Packard Valley). See 45 FR 46807 (July 11, 1980). In 1982, we approved a division of hydrographic area 179 (Steptoe Valley) into three areas for SO_2: central; northern; and southern. See 47 FR 20772 (May 14, 1982). Upon the effective date of our 1982 rule (June 14, 1982), there have been a total of 256 section 107(d) areas in the State of Nevada for SO_2, 255 section 107(d) areas for TSP, and 254 section 107(d) areas for NO_2.

Therefore, in this action, we are clarifying 40 CFR 81.329 to indicate clearly that the term "rest of state" or "entire state" in the Nevada tables for TSP, SO_2, and NO_2 refers to the hydrographic areas designated by EPA in 1978, revised for TSP in 1980, and then revised for SO_2 in 1982.

II. Clarification of the PM_{10} Table

In 40 CFR 81.329, there are two tables that list the nonattainment, attainment, and unclassifiable areas in the State of Nevada for particulate matter: one relates to TSP and the other relates to PM_{10}. Today's action clarifies the PM_{10} table to reflect the relationship between that table and the TSP area designations table for the purposes of implementing the PSD program.[3]

In 1991, pursuant to the Clean Air Act Amendments of 1990, the State of Nevada submitted their recommendations concerning nonattainment areas for particulate matter with an aerodynamic diameter less than or equal to a nominal 10 micrometers (PM_{10}) (PM_{10} replaced TSP as the criteria pollutant for particulate matter.) Dated March 15, 1991, the State's letter containing their recommendations did not refer to PM_{10} attainment or unclassifiable areas, instead focussing solely on the identification of nonattainment areas. Later in 1991, based on the State's recommendations, we revised the nonattainment areas under section 107(d) for PM_{10}. See 56 FR 56694 (November 6, 1991). Our 1991 rule did not identify attainment or unclassifiable areas for PM_{10}.

In 1992, we recognized that we had neglected to identify attainment or unclassifiable areas for PM_{10} in our 1991 rule and thus added the designation "unclassifiable" for the areas not otherwise designated nonattainment for PM_{10}, using the term "rest of state." See 57 FR 56762 (November 30, 1992). In this context, the use of the term "rest of state" in the PM_{10} table in section 81.329 was only identifying the portion of the State that EPA had not designated nonattainment for PM_{10}.

Unfortunately, the use of the term "rest of state" in the PM_{10} table could lead members of the public to conclude that there is a single unclassifiable PM_{10} area in the State for the purposes of the prevention of significant deterioration (PSD) program. However, based on the regulatory history described below, for PSD baseline purposes, the term "rest of state" in the PM_{10} table for the State of Nevada refers to hydrographic areas, and in this action, we are clarifying the PM_{10} table accordingly to avoid further confusion.

---

[1] 40 CFR 81.329 does not contain a table for lead. The entire State of Nevada is in attainment with the national ambient air quality standard for lead.

[2] The state also submitted recommendations for carbon monoxide and oxidant (subsequently replaced by ozone). Today's action does not address area designations in Nevada for either of these two pollutants, with the exception of a correction in the classification shown in 40 CFR 81.329 for Las Vegas Valley as a carbon monoxide nonattainment area.

[3] Although EPA indicated that we would delete the TSP designations in 40 CFR part 81 when EPA approves a State's revised PSD program containing the PM_{10} increments, promulgates the PM_{10} increments into a State's SIP where the State chooses not to adopt the increments on their own, or approves a State's request for delegation of PSD responsibility under 40 CFR 52.21(u) (See 58 FR 31622, 31635 (June 3, 1993)), we are not deleting any section 81.329 TSP designations in today's action, because of the significance of the designations to the implementation of the PSD program for PM_{10}. EPA believes this is a reasonable approach given the confusion that has arisen in the State of Nevada regarding implementation of the PSD program for PM_{10}.

VOL 67 ISS 53 MR 19 2002 UMI

In 1980, EPA revised the regulations implementing the PSD program to define "baseline areas" in terms of the attainment or unclassifiable areas listed in 40 CFR part 81, i.e., the section 107(d) areas. 45 FR 52676 (August 7, 1980). In 1987, we revised the National Ambient Air Quality Standard (NAAQS) for particulate matter (52 FR 24634), replacing TSP as the indicator for particulate matter with PM_{10}, and in 1993, we revised our PSD regulations to address the revision in the NAAQS for particulate matter from TSP to PM_{10}. Among other changes in our 1993 rule related to PSD, we decided to retain the TSP baseline areas as part of the program for implementing the newly-promulgated PM_{10} increments. See 58 FR 31622, 31630 (June 3, 1993). The TSP baseline areas had been defined as the section 107(d) areas, and in the State of Nevada, as discussed in the previous section, the section 107(d) areas for TSP are comprised of hydrographic areas. Thus, the effect of our 1993 rule was to retain the hydrographic areas as PM_{10} baseline areas for the purposes of implementing the PM_{10} increments in the State of Nevada. Today's action clarifies the PM_{10} table in 40 CFR 81.329 to indicate, in accordance with EPA's 1993 rule, that for PSD baseline area purposes, the term "rest of state" refers to the hydrographic areas that had been approved by EPA as TSP baseline areas in the State of Nevada.

III. Correction of CO Table

On October 2, 1997, we published a final rule that found that the Las Vegas Valley carbon monoxide (CO) nonattainment area did not attain the NAAQS for CO by the applicable attainment date. Our final rule reclassified the area from "moderate" to "serious" nonattainment under section 186(b)(2) of the Act. See 62 FR 51604 (October 2, 1997). However, we inadvertently failed to codify this final action in the CO table for Nevada in 40 CFR 81.329. The CO table in 40 CFR 81.329 currently lists the prior classification ("Moderate > 12.7 ppm") for Las Vegas Valley Hydrographic Area 212. In this action, we are therefore correcting the CO table so that the classification of Las Vegas Valley Hydrographic Area 212 is correctly identified as "serious," effective November 3, 1997, reflecting our final action published on October 2, 1997 in the **Federal Register**.

IV. EPA's Final Action

In this action, we are clarifying and correcting the tables in 40 CFR 81.329 that identify nonattainment, attainment, and unclassifiable areas designated by EPA under the Clean Air Act within the State of Nevada. Specifically, we are clarifying the TSP, SO_2, and NO_2 tables to identify exactly which geographic areas comprise the attainment or unclassifiable areas in the State of Nevada consistent with our final rules published in the **Federal Register** on March 3, 1978 (43 FR 8962); July 11, 1980 (45 FR 46807); and May 14, 1982 (47 FR 20772). We are also clarifying the PM_{10} table consistent with our final rule related to PSD published in the **Federal Register** on June 3, 1993 (58 FR 31622). Lastly, we are correcting the table showing the classification of the Las Vegas Valley nonattainment area for the NAAQS for CO consistent with our final rule published in the **Federal Register** on October 2, 1997 (62 FR 51604). In so doing, we are not revising any area designations or classifications in the State of Nevada nor are we changing the underlying method used by the State of Nevada in implementing the PSD program in that State. (The State has been implementing the PSD program on the basis of hydrographic areas consistent with our designations of such areas in 1978.) Rather, we are aligning the contents of the tables in 40 CFR 81.329 with the effective results of prior EPA rules that did establish or revise the area designations or classifications.

V. Effective Date of EPA's Final Action

Section 553 of the Administrative Procedure Act, 5 U.S.C. 553(b)(B), provides that, when an agency for good cause finds that notice and public procedure are impracticable, unnecessary or contrary to the public interest, the agency may issue a rule without providing notice and an opportunity for public comment. EPA has determined that there is good cause for making today's rule final without prior proposal and opportunity for comment because EPA is clarifying and correcting the section of the CFR that lists designations and classifications under the Clean Air Act to reflect prior EPA rules rather than promulgating new or revised designations or classifications. These prior rules had been subject to notice and comment. Thus, notice and public procedure are unnecessary. EPA finds that this constitutes good cause under 5 U.S.C. 553(b)(B). Also, because the contents of the existing tables of section 107(d) areas in 40 CFR 81.329 have lead to confusion, particularly in the context of implementing the PSD program in Nevada, we are invoking the good cause exception to the 30-day notice requirement of the Administrative Procedure Act and making today's final action immediately effective. See 5 U.S.C. 553(d)(3).

Administrative Requirements

Under Executive Order 12866 (58 FR 51735, October 4, 1993), this action is not a "significant regulatory action" and is therefore not subject to review by the Office of Management and Budget. For this reason, this action is also not subject to Executive Order 13211, "Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use" (66 FR 28355, May 22, 2001). Because the agency has made a "good cause" finding that this action is not subject to notice-and-comment requirements under the Administrative Procedure Act or any other statute (see section V., above), it is not subject to the regulatory flexibility provisions of the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), or to sections 202 and 205 of the Unfunded Mandates Reform Act of 1995 (UMRA) (Public Law 104–4). In addition, this action does not significantly or uniquely affect small governments or impose a significant intergovernmental mandate, as described in sections 203 and 204 of UMRA. This rule also does not have tribal implications because it will not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes, as specified by Executive Order 13175 (65 FR 67249, November 9, 2000). This rule will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government, as specified in Executive Order 13132 (64 FR 43255, August 10, 1999). This rule also is not subject to Executive Order 13045 (62 FR 19885, April 23, 1997), because it is not economically significant.

This technical correction does not contain technical standards; thus, the requirements of section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) do not apply. The rule also does not involve special consideration of environmental justice related issues as required by Executive Order 12898 (59 FR 7629, February 16, 1994). In issuing this rule, EPA has taken the necessary steps to eliminate drafting errors and ambiguity, minimize potential litigation, and provide a clear legal standard for affected conduct, as required by section 3 of Executive Order 12988 (61 FR 4729, February 7, 1996).

EPA has complied with Executive Order 12630 (53 FR 8859, March 15, 1988) by examining the takings implications of the rule in accordance with the "Attorney General's Supplemental Guidelines for the Evaluation of Risk and Avoidance of Unanticipated Takings" issued under the executive order. This rule does not impose an information collection burden under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

The Congressional Review Act (5 U.S.C. 801 *et seq.*), as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. Section 808 allows the issuing agency to make a rule effective sooner than otherwise provided by the CRA if the agency makes a good cause finding that notice and public procedure is impracticable, unnecessary or contrary to the public interest. This determination must be supported by a brief statement. 5 U.S.C. 808(2). As stated previously, EPA has made such a good cause finding, including the reasons therefor, and established an effective date of March 19, 2002. EPA will submit a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. This action is not a "major rule" as defined by 5 U.S.C. 804(2).

Under section 307(b)(1) of the Clean Air Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by May 20, 2002. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this rule for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. (See section 307(b)(2).)

List of Subjects in 40 CFR Part 81

Environmental protection, Air pollution control, National Parks, Wilderness areas.

Dated: March 8, 2002.

Wayne Nastri,

Regional Administrator, Region 9.

Part 81, chapter I, title 40 of the Code of Federal Regulations is amended as follows:

PART 81—[AMENDED]

1. The authority citation for part 81 continues to read as follows:

Authority: 42 U.S.C. 7401, *et seq.*

Subpart C—Section 107 Attainment Status Designations

2. Section 81.329 is amended by:

a. Revising the tables for "Nevada—TSP" and "Nevada—SO_2".

b. In the table for "Nevada—Carbon Monoxide" by revising the entry for Las Vegas Area.

c. Revising the tables for "Nevada—PM–10" and "Nevada—NO_2".

The revisions read as follows:

§ 81.329 Nevada.

NEVADA—TSP

Designated area	Does not meet primary standards	Does not meet secondary standards	Cannot be classified	Better than national standards
(Township Range):				
Las Vegas Valley (212) (15–24S, 56–64E)	X			
Carson Desert (101) (15–24.5N, 25–35E)	X			
Packard Valley (101A) (24.5–28N, 31–34E)				X

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 300

[FRL–7159–5]

National Oil and Hazardous Substance Pollution Contingency Plan; National Priorities List

AGENCY: Environmental Protection Agency (EPA).

ACTION: Removal of the direct final notice of deletion amendment.

SUMMARY: On November 28, 2001, EPA published a notice of intent to delete (66 FR 59393) and a direct final notice of deletion (66 FR 59363) for the Compass Industries Landfill Superfund Site from the National Priorities List. The EPA is removing the direct final notice of deletion amendment due to adverse comments that were received during the public comment period and restores the regulatory text that existed prior to the direct final notice of deletion.

EFFECTIVE DATE: This action is effective as of March 19, 2002.

ADDRESSES: Comprehensive information on the Site, as well as the comments that were received during the comment period are available at: Beverly Negri, Community Involvement Coordinator, U.S. EPA Region 6 (6SF-LP), 1445 Ross Avenue, Dallas, TX 75202–2733, (214) 665–8157 or 1–800–533–3508 (*negri.beverly@epa.gov*).

Information Repositories: Repositories have been established to provide detailed information concerning this decision at the following address: U.S. EPA Region 6 Library, 12th Floor, 1445 Ross Avenue, Suite 12D13, Dallas, Texas 75202–2733, (214) 665–6427, Monday through Friday 7:30 a.m. to 4:30 p.m.; Tulsa City-County Library, 400 Civic Center, Tulsa, Oklahoma, 74103, (918) 596–7977, Monday through Friday 9:00 a.m. to 9:00 p.m.; Friday and Saturday 9:00 a.m. to 5:00 p.m.; Sunday, September through mid-May 1:00 p.m. to 5:00 p.m.; Oklahoma Department of Environmental Quality, Contact: Eileen Hroch, 5th floor file room, 707 N. Robinson, P.O. Box 1677, Oklahoma City, Oklahoma, 73101, (405) 702–5100, Monday through Friday 8:30 a.m. to 3:30 p.m.

FOR FURTHER INFORMATION CONTACT: Katrina Coltrain, Remedial Project Manager (RPM), U.S. EPA Region 6 (6SF–LP), 1445 Ross Avenue, Dallas, TX 75202–2733, (214) 665–8143 or 1–800–533–3508 (*coltrain.katrina@epa.gov*).

List of Subjects in 40 CFR Part 300

Environmental protection, Air pollution control, Chemicals, Hazardous substances, Hazardous waste, Intergovernmental relations, Penalties, Reporting and recordkeeping requirements, Superfund, Water pollution control, Water supply.

Dated: March 1, 2002.

Lawrence E. Starfield,

Acting Deputy Regional Administrator, Region 6.

For the reasons set out in this document, 40 CFR part 300 is amended as follows:

PART 300—[AMENDED]

1. The authority citation for part 300 continues to read as follows:

Authority: 33 U.S.C. 1321(c)(2); 42 U.S.C. 9601–9657; E.O. 12777, 56 FR 54757, 3 CFR, 1991 Comp., p. 351; E.O. 12580, 52 FR 2923; 3 CFR, 1987 Comp., p. 193.

2. Table 1 of appendix B is amended under Oklahoma ("OK") by adding an entry, in alphabetical order, for "Compass Industries Landfill (Avery Drive)" to read as follows:

Appendix B to Part 300—National Priorities List

TABLE 1—GENERAL SUPERFUND SECTION

State	Site name	City/County	Notes(a)
OK	Compass Industries Landfill (Avery Drive)	Tulsa.

[CMS–2134–N]

RIN 0938–AL05

Medicaid Program; Modification of the Medicaid Upper Payment Limit for Non-State Government-Owned or Operated Hospitals: Delay of Effective Date

AGENCY: Centers for Medicare & Medicaid Services (CMS), HHS.

ACTION: Delay of effective date of a final rule.

SUMMARY: This document delays the effective date of the final rule entitled "Modification of the Medicaid Upper Payment Limit for Non-State Government-Owned or Operated Hospitals," published in the **Federal Register** on January 18, 2002 (67 FR 2603).

As published, the rule was to be effective March 19, 2002. We are postponing the effective date of the rule to April 15, 2002.

DATES: The effective date of the final rule, Medicaid Program: Modification of the Medicaid Upper Payment Limit for Non-State Government-Owned or Operated Hospitals, which amended 42 CFR part 447 and published in the **Federal Register** on January 18, 2002, at 67 FR 2602 is delayed until April 15, 2002.

BILLING CODE 4120–01–P

FEDERAL EMERGENCY MANAGEMENT AGENCY

44 CFR Part 67

Final Flood Elevation Determinations

AGENCY: Federal Emergency Management Agency (FEMA).

ACTION: Final rule.

SUMMARY: Base (1% annual chance) Flood Elevations (BFEs) and modified BFEs are made final for the communities listed below. The BFEs and modified BFEs are the basis for the floodplain management measures that each community is required either to adopt or to show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

EFFECTIVE DATE: The date of issuance of the Flood Insurance Rate Map (FIRM) showing BFEs and modified BFEs for each community. This date may be obtained by contacting the office where the FIRM is available for inspection as indicated in the table below.

ADDRESSES: The final BFEs for each community are available for inspection at the office of the Chief Executive Officer of each community. The respective addresses are listed in the table below.

FOR FURTHER INFORMATION CONTACT: Matthew B. Miller, P.E., Chief, Hazards Study Branch, Federal Insurance and Mitigation Administration, FEMA, 500 C Street SW., Washington, DC 20472, (202) 646–3461, or (e-mail) *matt.miller@fema.gov*.

SUPPLEMENTARY INFORMATION: FEMA makes the final determinations listed below of BFEs and modified BFEs for each community listed. The proposed

BFEs and proposed modified BFEs were published in newspapers of local circulation and an opportunity for the community or individuals to appeal the proposed determinations to or through the community was provided for a period of ninety (90) days. The proposed BFEs and proposed modified BFEs were also published in the **Federal Register**.

This final rule is issued in accordance with Section 110 of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4104, and 44 CFR Part 67.

FEMA has developed criteria for floodplain management in floodprone areas in accordance with 44 CFR Part 60.

Interested lessees and owners of real property are encouraged to review the proof Flood Insurance Study and FIRM available at the address cited below for each community.

The BFEs and modified BFEs are made final in the communities listed below. Elevations at selected locations in each community are shown.

National Environmental Policy Act

This rule is categorically excluded from the requirements of 44 CFR Part 10, Environmental Consideration. No environmental impact assessment has been prepared.

Regulatory Flexibility Act

The Acting Administrator, Federal Insurance and Mitigation Administration certifies that this rule is exempt from the requirements of the Regulatory Flexibility Act because final or modified BFEs are required by the Flood Disaster Protection Act of 1973, 42 U.S.C. 4104, and are required to establish and maintain community eligibility in the NFIP. No regulatory flexibility analysis has been prepared.

Regulatory Classification

This final rule is not a significant regulatory action under the criteria of Section 3(f) of Executive Order 12866 of September 30, 1993, Regulatory Planning and Review, 58 FR 51735.

Executive Order 12612, Federalism

This rule involves no policies that have federalism implications under Executive Order 12612, Federalism, dated October 26, 1987.

Executive Order 12778, Civil Justice Reform

This proposed rule meets the applicable standards of Section 2(b)(2) of Executive Order 12778.

List of Subjects in 44 CFR Part 67

Administrative practice and procedure, Flood insurance, Reporting and recordkeeping requirements.

Accordingly, 44 CFR Part 67 is amended to read as follows:

PART 67—[AMENDED]

1. The authority citation for Part 67 continues to read as follows:

Authority: 42 U.S.C. 4001 *et seq.*; Reorganization Plan No. 3 of 1978, 3 CFR, 1978 Comp., p. 329; E.O. 12127, 44 FR 19367, 3 CFR, 1979 Comp., p. 376.

§ 67.11 [Amended]

2. The tables published under the authority of § 67.11 are amended as follows:

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Parts 2, 27 and 73

[GN Docket No. 01–74; DA 02–607]

Reallocation and Service Rules for the 698–746 MHz Spectrum Band (Television Channels 52–59)

AGENCY: Federal Communications Commission.

ACTION: Final rule; deadlines for filing oppositions to petitions for reconsideration and replies to oppositions to petitions for reconsideration.

SUMMARY: This document gives notice of petitions for reconsideration of the Report and Order in GN Docket No. 01–74, FCC 01–364, concerning the reallocation and service rules for the 698–746 MHz spectrum band (Television Channels 52–59), and sets an expedited schedule for filing oppositions to the petitions for reconsideration and replies to such oppositions.

DATES: Oppositions are due on or before March 25, 2002, and replies are due on or before April 1, 2002.

ADDRESSES: Oppositions and replies may be filed by paper or electronically. If filed by paper by hand delivery, documents should be delivered to 236 Massachusetts Avenue, NE., Suite 110, Washington, DC 20002. If filed by overnight delivery service (other than U.S. Postal Service Express and Priority Mail), filings must be received at the Commission's headquarters at 445 12th Street, SW, Washington, DC 20554; those deliveries will then be diverted to the Commission's Capitol Heights facility. Oppositions and replies filed electronically (by email or by facsimile) should be done as set forth in this document. In addition, one copy of each opposition and reply must be delivered to the Commission's duplicating contractor, Qualex International, Portals II, 445 12th Street, SW, Room CY–B402, Washington, DC 20554, telephone (202) 863–2893, by facsimile (202) 863–2898, or via e-mail at *qualexint@aol.com*.

FOR FURTHER INFORMATION CONTACT: G. William Stafford, Wireless Telecommunications Bureau, at (202) 418–0563, email: *wstaffor@fcc.gov;* Michael Rowan, Wireless Telecommunications Bureau, at (202) 418–1883, email: *mrowan@fcc.gov;* or Jamison Prime, Office of Engineering and Technology, at (202) 418–1883, email: *jprime@fcc.gov*.

SUPPLEMENTARY INFORMATION: This is a summary of a Public Notice released March 14, 2001. The complete text is available for inspection and copying during normal business hours in the FCC Reference Center (CY–A257), 445 12th Street, SW., Washington, DC. It may also be purchased from the Commission's copy contractor, Qualex International, Portals II, 445 12th Street, SW., Room CY–B402, Washington, DC 20554, telephone (202) 863–2893. It is also available on the Commission's web site at *http://www.fcc.gov*.

1. Notice is hereby given that the parties listed have petitioned the Commission for reconsideration and clarification of the Report and Order in GN Docket No. 01–74, FCC 01–364, 67 FR 5491 (February 6, 2002). In the Report and Order, the Commission adopted allocation and service rules for the 698–746 MHz spectrum band ("Lower 700 MHz Band"), currently comprising television Channels 52–59, in order to reclaim and license this spectrum in accordance with statutory mandate. This spectrum is being reclaimed for new commercial services as part of the transition of television broadcasting from analog to digital transmission systems. The Communications Act of 1934, as amended, requires the Commission to assign spectrum reclaimed from

VOL
67
ISS
53
MR
19
2002
UMI

broadcast television using competitive bidding, and envisions that the Commission will conduct an auction of this spectrum by September 30, 2002.

2. In light of the upcoming auction of licenses in the Lower 700 MHz band at 698–746 MHz (Auction No. 44), which is scheduled to commence on June 19, 2002, good cause exists in this instance to alter the periods specified in § 1.429 of the Commission's rules, 47 CFR 1.429, for the filing of oppositions to petitions for reconsideration and replies to oppositions. The petitions filed by the parties listed seek reconsideration or clarification of a number of the policies and procedures adopted in the Report and Order, which are relevant to the transition of the 698–746 MHz band from broadcasting to new services. An expedited schedule will give the Commission an opportunity to provide timely guidance regarding these issues to prospective bidders and incumbent broadcasters in advance of Auction No. 44. Accordingly, oppositions to petitions for reconsideration of the Report and Order shall be filed no later than March 25, 2002, and replies to oppositions will be due no later than April 1, 2001.

Procedural Matters

4. Parties submitting oppositions or replies should address the issues raised in the petitions for reconsideration in light of the relevant statutory requirements, procedures, and public interest considerations. All responsive filings should reference the docket number of this proceeding, i.e., GN Docket No. 01–74.

5. This proceeding has been designated as a "permit-but-disclose" proceeding in accordance with the Commission's ex parte rules. 47 CFR 1.1200(a), 1.1206. Persons making oral ex parte presentations are reminded that memoranda summarizing the presentations must reflect the substance of the presentations and not merely list the subjects discussed. More than a one or two sentence description of the views and arguments presented is generally required. Other rules pertaining to oral and written ex parte presentations in permit-but-disclose proceedings are set forth in Section 1.1206(b) of the Commission's rules, 47 CFR 1.1206(b).

6. Parties may obtain copies of the Report and Order and petitions for reconsideration at the FCC website, *http://www.fcc.gov/e-file/ecfs.html*. The petitions are also available for public inspection and copying in the Reference Center, Room CY A257, 445 12th Street, SW., Washington, DC 20554. Copies of the petitions are also available from Qualex International, Portals II, 445 12th Street, SW., Room CY–B402, Washington, DC 20554, telephone (202) 863–2893, facsimile (202) 863–2898, or e-mail at *qualexint@aol.com*.

7. Oppositions to petitions for reconsideration and replies may be filed using the Commission's Electronic Comment Filing System ("ECFS") or by filing paper copies. Oppositions and replies filed through the ECFS can be sent as an electronic file via the Internet to *http://www.fcc.gov/e-file/ecfs.html*. Each filing should be submitted into the following docket: GN Docket No. 01–74. In completing the transmittal screen, parties should include their full name and Postal Service mailing address. Parties may also submit an electronic filing by Internet e-mail. To get filing instructions for e-mail filings, parties should send an e-mail message to *ecfs@fcc.gov*, including "get form to <your e-mail address>" in the body of the message. A sample form and directions will be sent in response.

8. Due to the threat of contamination that resulted in the disruption of regular mail, the Commission released on November 29, 2001, an Order, temporarily amending certain procedural rules on an emergency basis. Oppositions to petitions for reconsideration and replies thereto must be filed electronically (i.e., by e-mail or facsimile), or by hand delivery to the Commission's Massachusetts Avenue location.

9. If filed electronically by e-mail, oppositions to petitions for reconsideration and replies thereto shall be filed at the following e-mail address: *WTBSecretary@fcc.gov*. Please also copy (CC) G. William Stafford at *wstafford@fcc.gov*, Michael J. Rowan at *mrowan@fcc.gov*, and Jamison Prime at *jprime@fcc.gov*. For security purposes, we recommend that documents filed via electronic mail be converted to PDF format.

10. If filed by facsimile, oppositions to petitions for reconsideration and replies thereto shall be faxed to 202–418–0187. The fax transmission should include a cover sheet listing contact name, phone number and, if available, an e-mail address. In addition to the official filing, please also fax copies to G. William Stafford, Room 4-A124, Policy and Rules Branch, Commercial Wireless Division, Wireless Telecommunications Bureau, Michael J. Rowan, Room 4–A131, Policy and Rules Branch, Commercial Wireless Division, Wireless Telecommunications Bureau, and Jamison Prime, Room 4–A734, Office of Engineering and Technology, at (202) 418–7447.

11. If filed by hand delivery, documents shall be delivered to 236 Massachusetts Avenue, NE, Suite 110, Washington DC 20002. Please address documents to the Secretary, and copies thereof to the attention of G. William Stafford, Room 4-A124, Policy and Rules Branch, Commercial Wireless Division, Wireless Telecommunications Bureau, Michael J. Rowan, Room 4-A131, Policy and Rules Branch, Commercial Wireless Division, Wireless Telecommunications Bureau, and Jamison Prime, Room 4-A734, Office of Engineering and Technology.

12. If filed by overnight delivery service (other than U.S. Postal Service Express and Priority Mail), filings must be received at the Commission's headquarters at 445 12th Street, SW., Washington, DC 20554. As noted in the October 17 and October 18, 2001 public notices, the Commission will divert those deliveries to the Capitol Heights facility.
